BRUNER, D.O. BY MR. SCHNEIDER: Q. Doctor, I know you recall my taking your deposition back in early 2000. This is a continuation of that deposition. You realize that you're still under oath? A. Yes. MR. BARRON: Kent, just before you get your questions, I'djust like the record to reflect I want to pose an objection to the deposition. I'm not certain exactly why we're having a second deposition. I spoke briefly with Mr. Bonezzi, but I'djust like to show an objection to it. Q. Doctor, I will endeavor to confine myself to a couple of subjects that we did not cover at your last deposition, primarily because we learned some new information. Have you reviewed anything regarding this case since the time of your deposition? A. Just off and on, not anything recently. Q. Have you seen the continuation of Holy Durbin's deposition?

Could you just pass that to the court reporter forme? MR. BONEZZI: This one, I don't mind, because all it sets forth are the names of the individuals whose depositions I'm sending. Otherwise, I wouldn't give it to him. MR. BARRON: Let me just show an objection. I think it's communication between attorney-client and I object. MR. SCHNEIDER: Would you pass that over, please? Q. Doctor, have you seen any records that have been produced from Providence Hospital related to the Health Line operator emergency surgery call notification list? A. No, I haven't.

 you changed it to a stat C-section at 3:38, I take it you assumed at that point that the necessary notifications to the surgical nursing team had already been made after you called for the 3:30 section, is that right? A. Yes. MR. BARRON: Objection as to time reference. Q. Yes? A. Yes. Q. Doctor, were you aware of the fact that Holly had never in her, her brief professional career made the necessary calls to assemble a surgical team before? Did you know that? A. Yes, I did. MR. BONEZZI: At what time? Q. We're talking, I believe you came in the room aboutthat's when you called for the stat C-section at 3:30, right? A. Uh-huh. 	 Q. So all you knew was, when you called for a C, the nurse was supposed to make whatever notification was needed to be made to assemble a team? A. Yes. Q. Doctor, when you just looked at that piece of paper that I showed you from the Health Line operator, the emergency surgery notification list, do you see that? A. Yes. Q. When you looked at that, did you see that the Health Line operator indicates that she first received a call telling her about this C-section at 3:44? A. Yes. Q. What was your when did you first see that, just now? A. Just now. Q. So when I just showed this to you today, that's the first time you saw that record indicating that nobody notified the Health Line operator until 3:44, right? A. That's right. Q. What was your reaction, doctor, when you looked at that and saw that nobody
 Q. Remember seeing the bradycardia? A. Yes. Q. Would you expect the nurse to have realized by looking at that strip at that time that the baby was in trouble? A. Yes. Q. And at that time, doctor, is it fair to say that you knew that every minute was important at this point in time as far as expediting that baby's delivery? A. Yes. Q. And you would expect her to know that also, wouldn't you? A. Yes. Q. Doctor, did you know that the procedure in place on that particular day at Providence was that the nurse was supposed to call the Health Line operator rather than the nursing supervisor, and then the Health Line operator was supposed to make the calls to the surgical nurses? A. No, did not. Q. Did you ever know anything about the Health Line operator? A. No. 	 1 made a call to the Health Line operator until 3:44? MR. BONEZZI: Objection. Go ahead and answer. MR. BARRON: I'll join in the objection to the extent that you've made reference to his contacting her at 3:38. MR. SCHNEIDER: Who's contacting her? MR. BARRON: The doctor contacting or indicating to Holly at 3:38. MR. SCHNEIDER: Well, I'm my question is A. Well, this is 14 minutes past the time that I asked for a C-section, Q. And what was your reaction when you saw that piece of paper showing that nobody made the call until 3:44? A. Ithink that's a horrible. I justthat's too long. Q. It's a horrible what, doctor? You said that's a horrible something? A. Just realization, you know, 14 minutes had gone by when I asked for a C-section. I didn't know that. I thought that

 1 was Q. You, Itake it, on that day assumed that that call was placed to, whomever it needed to be placed to, within a minute or two at the time you called for the C at 3:30, is that right? A. Yes, sir. Q. I take it you also assumed that the necessary calls had gone out to the surgical personnel within a couple of minutes of the time you called for the C-section at 3:30, is that right? A. Yes, Yes. Q. Now, if you look further on that, you will see that the Health Line operator record indicates that she was first called at 3:44, correct? A. Yes. Q. And then you see that the record indicates that she called, placed a call to anesthesia at 3:45, correct? A. Yes. Q. And received a call back from anesthesia at 3:46, correct? A. Yes. 	 Health Line operator placed a single call to a nurse? MR. BARRON: Show an objection as to assumption. A. Well, I would have liked to have seen the call made much earlier than that. Q. And I take it you were under the assumption the calls were made much earlier than that? A. Already made, uh-huh. Q. Doctor, the Health Line operator has testified that the way things worked at Providence Hospital at that time was that the Health Line operator had more jobs than just making this type of call to assemble surgical personnel. That, for instance, people could call in from the community if they had questions of the Health Line operator of a general nature or a specific nature and the Health Line operator, being a nurse, would endeavor to answer those questions. Health Line operator testified further that she may very well have been receiving and answering those type of community
 1 Q. Now, anesthesia was on the premises, weren't they? 3 A. Yes. 4 Q. Do you have any idea why anesthesia 5 was called first since they were already 6 available as opposed to calling a surgical nursing team who was off the premises? 8 A. I don't know. 9 Q. Would you agree with me that it 10 would have made a lot more sense in terms of 11 expediting this baby's delivery to place the 12 calls to the surgical personnel that were off 13 the premises first? 14 A. Yes. 15 Q. Doctor, you see further on that 16 record that it indicates that the first phone 17 call to a nurse was placed, a surgical nurse 18 was placed at 3:49, correct? 19 A. Yes. 20 Q. Another three full minutes after 21 the time that anesthesia called at 3:46, 22 correct? 23 A. Yes. 24 Q. What is your reaction to the fact 25 that three more minutes went by before the 	 1 calls in that three-minute gap preventing her from making the call to the surgical nurse. What's your reaction to a producer? MR. BARRON: Show an objection as to possibilities. A. That's too many responsibilities. Q. Did you have any idea that there would be that type of delay in assembling your surgical nursing team because of a procedure like that? A. No. Q. It shouldn't be that way, should it, doctor? A. No. Q. Please note further that the next call to a nurse was placed at 3:52, an additional three minutes. The Health Line operator's explanation is the same as I just gave you before. I take it you would tell me for the same reasons as you just did that that's inappropriate? A. Yes, Q. Now, that nurse who gets called at 3:52, you need her in order to begin that

So my question to you is, based on what was going on, you were there, is there any explanation that you can provide me as to why that didn't occur immediately? You were there. MR. BARRON: Objection. A. No. MR. I want to read you several pages from Nurse Sanford's deposition. Will you please pay attention? I then am going to ask you a couple of questions about your thoughts on the matter. MR. BARRON: Show an objection as to picking piecemeal from a deposition and then asking him to comment. Q. Beginning at the top of page 131 we have a comment from Mr. Barron that will fall into context for you, doctor. He says, "I think she was referring to the awareness at 2:30 regarding late and variable decelerations." There's then a question from myself. "Well, I want to make sure I understand." Answer: "Yeah, because" these answers are from Nurse Sanford. Answer: "Yeah, because he was already advised that she existed."
 1 Q. Is that a no? 2 A There is none. 3 Q. Doctor, you've worked with OB nurses for many years, haven't you? 5 A. Yes. 6 Q. And as a result, you're familiar 7 with what constitutes reasonable conduct on 8 behalf of an OB nurse, aren't you? 9 A. Yes. 10 Q. Would you agree with me that the 11 nurse's failure to make the notifications that 12 we've discussed constitutes a deviation from 13 the standard of care that she's obligated to 14 provide? 15 MR. BARRON: Objection. 16 MR. BONEZZI: Objection. Go ahead 17 and answer. 18 A. Yes. 19 Q. Doctor, in this case, I took the 20 deposition of a woman named Sue Sanford, who is 21 the director of obstetrical services at 22 Providence Hospital and also the woman who has 23 been put forth as the expert for Providence 24 Hospital in this case. 25 And she rendered a couple of 	1"Yes."2Question: "You have no reason to3believe that he was aware," he referring to4you, doctor, "of whatever the tracings had on5them or showed from 2:30 forward until 3:30, do6you? You have no reason to believe that he7knew what was on those strips?"8Answer: "My sense tells me that9they don't go away. They weren't going away,10so he certainly knows they are there."11Question: "So what you are saying12to me is, you assume that the doctor was13assuming that the late, that the decelerations14that occurred before 2:30 were continuing on15from 2:30 to 3:30?"16Answer: "Right."17Question: "And therefore, there18was no need for the nurse to notify him of the19fact that they continued during that time20period because you assumed he was aware of it?"21Answer: "Yes."22Question: "You think it's fair for23the nurse to assume that at that time the24doctor would have assumed that the late and25variables continued from 2:30, is that right?"

 MR. SCHNEIDER: Objection. That exact question was asked and answered at the last deposition. Q. Go ahead, doctor. A. I believe at 3:30 it was because of the tracing. Q. Is it your testimony here today that the order at 3:30 was given for a reason other than failure to progress? MR. SCHNEIDER: Objection. MR. BONEZZI: Hang on. I'm going to read the transcript. MR. SCHNEIDER: Right. MR. BARRON: Well MR. SCHNEIDER: Let me finish the objection, please. Exact same question asked on two occasions in the last transcript and he answered it twice. MR. BARRON: Well, you've covered a number of subject matters that were covered during the prior deposition, so MR. BARRON: Well, I've heard at least three or four different areas. 	 not what he testified to in his original deposition. He didn't use the term stat. However, what he meant was a stat section. MR. BARRON: Well, I'm going to object to you characterizing. MR. BONEZZI: No. You can object all you want to, John, but don't misstate what he said in his first deposition. MR. BARRON: I'm not saying anything. I'm asking him whether or not he acknowledges that when you gave your initial C-section order at or about 3:30 p.m., it was given on a nonstat basis. MR. BONEZZI: No, don't answer that. That has already been asked in the previous deposition. I'm going to find all of this stuff. The stuff that I allowed Kent to ask had nothing to do with what was John, here. You can give me all the looks you want to. Look, here is the transcript. MR. BARRON: Well, if there's been a representation that Kent has not inquired into subject matters that were inquired into during the first deposition MR. BONEZZI: He never had this.
1A.What did I say, Mr. Barron.2Q.No. My question is, is it the case3that when you assessed the patient at 3:30, you4gave the first order for a C-section, a nonstat5C-section, that you did so because of your6concern that Julie Gregory had not progressed7satisfactorily and that that was the reason for8the order for the nonstat C-section?9MR. SCHNEIDER: Objection. He just10said it was the tracing when you asked him it11again.12Q.13A.14she was not progressing, but it was the tracing15in the previous 15 or 20 minutes that had16changed that initiated the call for the17C-section. In other words, I could not18accomplish delivery vaginally because she had19not progressed.20Q.21Okay. But you do acknowledge that22the first time that you gave the order for a23C-section, it was not given on a stat basis,24MR. SCHNEIDER: Objection.25MR. BONEZZI: Objection. That's	1That's what I'm talking about. He was never2asked questions.3MR. He8asked the questions relative to 2:30 because of9the testimony of your nurse.10MR. BARRON: Yes, and he also asked11questions about his prior testimony about what12happened at 3:18.13MR. SCHNEIDER: No. I told him14what his prior testimony was to refresh his15recollection.16MR. BARRON: Obviously, the lawyers17aren't going to reach an agreement here.18MR. BONEZZI: No, we're not.19Q. My question to you, doctor, is you20do acknowledge, don't you, that when you gave21the initial C-section order, it was not given23MR. BONEZZI: Don't answer it.24You've already answered that.25MR. 	 Would it be fair to say that in terms of what the clock read when you gave the stat C-section order, the second order, you don't know from your own recollection, what time it was on the clock, is that right? A. No, that's fair. Q. Okay. So if the record should indicate in one place that it was given about 3:38 and in another place given about 3:42, you wouldn't be able from your own memory to referee between those two times, correct? MR. SCHNEIDER: Objection. A. The only times that are important are the times that are present in the room in the department. Q. Right. But this is my question: If the hospital chart for this labor should indicate in one notation that your stat 165 C-section order was given at 3:38 p.m., and in another portion of the record of this labor, there should be a notation that the order was given at 3:42, you couldn't, from your own recollection, referee between whether it was the 3:38, which was accurate, or the 3:42 which is accurate, is that fair? MR. SCHNEIDER: Objection. I want to state that you mischaracterizedthe record. 	not to answer the question? 1 MR. BONEZZI: I don't believe I 2 have to say it a second time. 3 Q. Doctor, Mr. Schneider asked you 4 some questions regarding timing occurring after 5 3:30. Let me begin by asking a couple of 6 questions regarding memory. 7 Would it be fair to say that in 1 terms of what the clock read when you gave the 9 stat C-section order, the second order, you 10 don't know from your own recollection, what 11 time it was on the clock, is that right? 12 A. No, that's fair. 13 Q. Okay. So if the record should 116 arid in another place given about 3:42, you 16 wouldn't be able from your own memory to 17 referee between those two times, correct? 18 MR.  called for, and that's in the nursing note. Is there another one? MR. BARRON: If you want at some point, you can make reference to the electronic fetal monitor strip. I'm sorry. Court reporter, where were we? I had stated my question and then there was an answer to it? THE NOTARY: Yes. The answer was yes. Q. Am I right that this so-called 30-minute rule didn't just come out of thin air in terms of its use or presence in obstetrical practice that the obstetricians as a group analyzed the provision of cesarean section in level hospitals like Providence Hospital and came forth with a guideline that said level 1 hospitals should be able to make stat C-sections feasible within one half hour of the time the obstetrician gives such an order, is that fair? MR. SCHNEIDER: Objection. MR. BONEZZI: Objection. A. Yes. Q. Are you a member of the ACOG? 	 Q. Okay. But you will acknowledge, I take it, that that is a widely recognized guideline? A. Yes. Q. In the practice of obstetrics? A. Yes, sir. Q. When you gave the initial C-section order after giving it, you went to another patient in another room at Providence Hospital? MR. SCHNEIDER: Objection. A. Yes. Q. There has been testimony in this case by one of the experts retained on behalf of the Gregorys that when a physician calls for a C-section to be done as a result of fetal distress, that such orders are always given on a stat basis. Do you agree with that? A. You know, I think you misunderstand this stat business. Q. Well, first, let me ask you MR. BONEZZI: No. Let him finish. MR. BONEZZI: No. Let him answer the question. Go ahead. A. When we call in circumstances like this, it's really a redundancy to say
 1 A. No. 2 Q. Okay. You're an osteopathic 3 physician? 4 A. Yes. 5 Q. Okay. The American College of 6 Obstetrics and Gynecologists is an organization 7 for allopathic or MD physicians? 8 A. Yes. 9 Q. Okay. Is there an equivalent 10 organization for osteopathic physicians? 11 A. Yes. 12 Q. What's the name of the 13 organization? 14 A. American College of Osteopathic 15 Obstetricians and Gynecologists, ACOOG, and, 16 yes, I'm a member. 17 Q. You're a member of that, did the 18 osteopathic obstetrical community also 19 participate in the discussions that led to the 20 creation of the 30-minute rule? 21 A. Not to my knowledge. 22 Q. That was a creation of the MD 23 obstetrician organization? 24 A. Actually, I don't know who created 25 it. 	 1 stat. These are of the utmost urgency and you know that by just looking at the strip. You know innately to progress as fast as humanly possible. I don't recall what my testimony was as far as using stat or not stat. I recall this being an issue. The tracing dictated a very urgent need to get this child out. Q. But you do acknowledgethat one of the things that physicians do to communicate urgency to people who are assisting them is to describe their orders as stat, correct? MR. SCHNEIDER: Objection. MR. BONEZZI: Objection. A. Yes. Q. Okay. And is it your testimony that you don't recall one way or the other regarding your initial C-section order? A. That's not what I said. MR. BONEZZI: Wait. No, don't answer the question. You've already answered that and that is in the transcript. Q. Doctor, do you know where you were between 2:30 p.m. and 3:30 p.m. on this date? MR.
