COUNTY OF CUYAHOGA )

57106

COURT OF COMMON PLEAS

PATRICK J. CONROY,  
ADMINISTRATOR OF THE  
ESTATE OF ROBERT E.  
CONROY,

Plaintiffs,

vs.

JEFFREY R. BECK, D.O.,  
et al.,

Defendants.

Case No. 246550  
Judge Sweeney

- - -

Telephone deposition of BRUCE DAVID  
JANIAK, M.D., a witness herein, called by the  
Plaintiffs as if upon Cross Examination under the  
Ohio Rules of Civil Procedure, taken before me,  
the undersigned, Philip H. Gaines, a Notary Public  
in and for the State of Ohio, pursuant to Notice  
and stipulations of Counsel as hereinafter set  
forth, at the Toledo Hospital Emergency Center  
Conference Room, Toledo, Ohio, on Thursday,  
December 22, 1994, commencing at 2:00 p.m..

## 1 APPEARANCES:

2 On behalf of the Plaintiffs:

3 SPANGENBURG, SHIBLEY, TRACI, LANCIONE  
& LIBER4 By: Ellen Simon Sacks  
2400 National City Center  
5 Cleveland, OH 44114-3062  
(216) 696-32326 On behalf of Defendant Jeffrey R. Beck,

2                   BRUCE DAVID JANIAC, M.D.,  
3   being first duly sworn as hereinafter certified,  
4   was deposed and testified as follows:

5                   CROSS EXAMINATION

6   BY MS. SACKS:

7   Q.       Doctor, can you please state your full  
8            name?

9   A.       Bruce David Janiak.

10   Q.       Your address?

11   A.       Home or office, which one?

12   Q.       It doesn't matter.

13   A.       Office is 2142 North Cove Boulevard,  
14            Toledo, Ohio, 43606.

15   Q.       Doctor, I'm not in front of you so I can't  
16            hand you a copy of your CV, but I was  
17            wondering if you could identify your  
18            current copy of your CV for the record. Do  
19            you have one there?

20   A.       It's in the other office. I can get one in  
21            about twenty seconds if you want to wait  
22            while I do it.

23   Q.       Maybe we can just do that at the conclusion  
24            of the deposition. I just would like to  
25            have a current copy of your CV identified

1 as Exhibit 1, if that's okay with everyone.

2 MR. WALTERS: We can agree to do  
3 that, Ellen, and just attach it to the  
4 depo, okay?

5 MS. SACKS: All right. I want  
6 to make sure I have the most current  
7 copy and if you want to attach it to  
8 the depo that's fine.

9 MR. WALTERS: That's fine.

10 Q. Okay, Doctor, you have that in your office  
11 and you can get that?

12 A. Yes, right. Will do.

13 Q. Where are you working?

14 A. Well, at the Toledo Hospital Emergency  
15 Department.

16 Q. Your position there?

17 A. Chairman of the Department Of Emergency  
18 Medicine.

19 Q. What are your responsibilities?

20 A. My responsibility is to make sure that the  
21 department is appropriately staffed, that  
22 quality standards are maintained, and  
23 patient satisfaction issues are addressed,  
24 and to participate in helping the

1 department grow and making the institution  
2 successful, but all of that is subservient  
3 to doing quality emergency care for all the  
4 patients that present.

5 Q. How much time do you spend directly with  
6 patients here, that is seeing patients?

7 A. I have to give you an average. I would say  
8 in the last six months probably a minimum  
9 of twenty to a maximum of twenty-six hours  
10 a week.

11 Q. And the remainder of the week work hours  
12 are administrative?

13 A. Well, some of it is administrative. Some  
14 of it is preparing lectures for grand  
15 rounds. Some of it is spending time  
16 one-on-one with residents. Some of it is  
17 just doing medical reviews and chart  
18 reviews because that's part of the quality  
19 issue. Then some is just strictly  
20 administrative such as developing a budget  
21 for the purchase of a new piece of  
22 equipment for instance.

23 Q. I want to ask you some questions about your  
24 work as an expert witness.

1 A. Go ahead.

2 Q. Can you tell me approximately how many  
3 times you have reviewed cases, that is  
4 medical/legal cases?

5 A. Correct. I would have to say now in taking  
6 a closer look at it since I first started  
7 back in the mid 1970's I would say  
8 somewhere between 150, maybe 175 total  
9 cases.

10 Q. How many in the last year or two?

11 A. In the last two years I think somewhere  
12 between fifteen and eighteen would be  
13 pretty close.

14 Q. You said about fifteen to eighteen?

15 A. In the year and a half to two years. I  
16 can't tell you exactly, but that's pretty  
17 close.

18 Q. So that's not per year, that's over about  
19 the last two years?

20 A. Well, yeah, year and a half to two years,  
21 and the reason for that is it has to do  
22 with my board service and sort of taking a  
23 small hiatus there.

24 Q. What about in the last four years?

- 1 A. I would guess fifty to sixty.
- 2 Q. What percentage of those cases have been on  
3 behalf of the defense?
- 4 A. It would be fairly close to 90 percent with  
5 the trend being closer to 85 percent in the  
6 last two years.
- 7 Q. So you said about fifty to sixty I believe  
8 in the last four years, was that your last  
9 answer?
- 10 A. Yes, ma'am.
- 11 Q. And, I'm sorry, did you say about 85  
12 percent on behalf of the defense?
- 13 A. That's correct within the last two years.  
14 It was closer to 90 percent four years ago.
- 15 Q. Have you ever testified for or been  
16 involved in a case with Mr. Walters before?
- 17 A. I don't believe so, no.
- 18 Q. How about any member of his law firm?
- 19 A. Yes.
- 20 Q. Would you tell me about that, please?
- 21 A. I have reviewed I would say six cases in  
22 the last ten or twelve years for Reminger &  
23 Reminger.
- 24 Q. Six cases in the last ten or twelve years

1 did you say?

2 A. Right.

3 Q. How did you get into the consulting  
4 business?

5 MS. WHITMORE: Objection.

6 A. No, I don't remember ten years ago or  
7 twenty years ago, but I know it had to have  
8 been because a local attorney contacted me,  
9 because I don't think I would have thought  
10 to do that, and it was actually a  
11 plaintiff's attorney the first case. I  
12 would have to assume after that that all  
13 other contacts from attorneys were by word  
14 of mouth.

15 Q. Do you know for example how the law firm of  
16 Reminger & Reminger happened to contact  
17 you?

18 A. Actually, no, I don't.

19 Q. Can you tell me who your insurance carrier  
20 is?

21 A. Mine?

22 MR. WALTERS: Objection, but go  
23 ahead, Doctor.

24 MS. WHITMORE: Objection.

1 A. My carrier is PIE.  
2 Q. How long have they been your carrier?  
3 A. I would guess eight to ten years.  
4 Q. Have you ever testified for PIE?  
5 A. Yes, I have.  
6 Q. How many?  
7 MR. WALTERS: Well, and I don't  
8 know that PIE is not involved in this  
9 case. I don't know where we're going  
10 with this.  
11 MS. SACKS: Just asking a  
12 question.  
13 MR. WALTERS: All right, go  
14 ahead.  
15 Q. Tell me?  
16 A. I would say if taking into account the fact  
17 that they have offices in several states  
18 that I probably have reviewed fifteen cases  
19 for PIE over the years.  
20 Q. You have reviewed, I'm sorry?  
21 A. Approximately fifteen cases over the years.  
22 Q. Okay, my speaker phone is not very good in  
23 here and the one I intended to use is in a  
24 room that is filled with people that I

1           couldn't ask to leave. So I'm sorry that I  
2           keep having to ask you to repeat some  
3           things here.

4    A.       That is no problem at all because this is  
5           the first time ever this speaker phone has  
6           worked.

7    Q.       Okay, so you understand?

8    A.       Yes.

9    Q.       Can you tell me how many cases you are  
10           involved in right now that are pending,  
11           that you are either reviewing or have  
12           written a report on?

13   A.       I understand and I would say it's probably  
14           twenty different cases.

15   Q.       Do you generally have about twenty going at  
16           a time?

17   A.       I think that's pretty fair. Every once in  
18           a while you go to your files and find out  
19           that many of them have been settled long  
20           ago and you never found out about it. So  
21           keeping that in mind I would say twenty.

22   Q.       About how much time a week do you spend in  
23           connection with your consulting work on  
24           these cases?

- 1 A. I probably, maybe a couple of hours a week  
2 on average.
- 3 Q. How do you charge?
- 4 A. By the hour.
- 5 Q. What do you charge per hour?
- 6 A. \$150.
- 7 Q. What about for testimony?
- 8 A. Same for testimony and same for trial. The  
9 only expenses I look for in terms of time  
10 are when I have to drive locally, but if I  
11 fly I don't charge for that time unless  
12 it's a turbo prop.
- 13 Q. How much time did you spend, have you spent  
14 all together on this case?
- 15 A. I could tell you that in just a minute,  
16 maybe less than a minute. Hang on.
- 17 Q. Okay, sure.
- 18 A. Somewhere between five and seven hours.
- 19 Q. Can you tell me how you spent that five to  
20 seven hours?
- 21 A. Sure, reading the medical records.
- 22 Q. About how long did that take?
- 23 A. Somewhere in the range of five to six.
- 24 Q. Five to six hours?

1 A. Right, and then the rest of the time would  
2 be just meeting with the attorney, Mr.  
3 Walters.

4 Q. What medical records did you review?

5 A. Fairview General Hospital's Emergency  
6 Department record dated -- boy, I can't  
7 read the date, sorry. Looks like 30  
8 January, '91.

9 Q. Any other medical records that you  
10 reviewed?

11 A. And that's it.

12 Q. And have you reviewed any other documents?

13 A. Yes, depositions.

14 Q. What depositions have you -- did you read  
15 them or just flip through them or what?

16 A. No, I read them and the answers are a  
17 deposition of Sue Ann O'Connor, Jeffrey  
18 Beck, Kathleen Quinn, Chad Murdock.

19 Q. How long did it take you to review the  
20 depositions?

21 A. I don't write down the number of minutes,  
22 but I can tell you that the total time was,  
23 let's see, one, two, three, just about five  
24 hours total, in that range.

- 1 Q. So you told me you had spent five to seven  
2 hours all together on the case?
- 3 A. Right.
- 4 Q. And was reviewing the depositions part of  
5 that time?
- 6 A. Yes, ma'am.
- 7 Q. And when you said reading the medical  
8 records did you include the depositions in  
9 that?
- 10 A. No.
- 11 Q. Okay, so let me try to go through that  
12 again. You said you read the medical  
13 records?
- 14 A. Correct.
- 15 Q. And you said that, I wrote down that you  
16 said that that took five to six hours?
- 17 A. No, no, I'm sorry.
- 18 Q. That's wrong?
- 19 A. Must have misunderstood. I said the total  
20 amount of time I spent was five to seven  
21 and of that around five was the depositions  
22 and the remainder was the medical records  
23 and the meeting with Mr. Walters.
- 24 Q. Okay, was there anything else that you

1 reviewed?

2 A. No.

3 Q. Did you meet with Mr. Walters today?

4 A. Yes.

5 Q. Did you meet with anyone else?

6 A. No.

7 Q. Did you meet at all with Miss Woodford?

8 A. Well, I met Miss Woodford, but I didn't  
9 meet with Miss Woodford. She wasn't here  
10 when I had the meeting.

11 MS. WHITMORE: Whitmore.

12 Q. Did you discuss this case with her at all?

13 A. Whitmore is the name she says.

14 Q. Sorry, Whitmore.

15 A. And, I'm sorry, I missed your last  
16 question.

17 Q. Did you discuss the case with her at all?

18 A. Did not.

19 Q. You did discuss the case with Mr. Walters?

20 A. Yes, I did.

21 Q. On how many occasions?

22 A. Well, I know today. I would imagine, and I  
23 don't have any direct memory, we must have  
24 had a conversation on the telephone, but I

1 don't have a record of it and I can't tell  
2 you when that was. I just have a vague  
3 memory of doing so.

4 Q. So the conversation, the one and only  
5 conversation that you remember was one  
6 which you had today before this deposition,  
7 is that right?

8 A. Yeah.

9 Q. I assume you had some contact in order for  
10 you to get the case?

11 A. Oh, of course, right.

12 Q. You don't remember that?

13 A. Well, that contact was with a different  
14 attorney in the same firm whose name was  
15 Mr. Marmaros, Pete Marmaros.

16 Q. Oh, Pete Marmaros.

17 A. Unless it's Marmaros and I have accented the  
18 wrong syllable.

19 Q. And do you remember speaking to him about  
20 the case?

21 A. Yes.

22 Q. Can you tell me what you recall about that?

23 MR. WALTERS: Wait one second.

24 Objection, and I would represent to

1                   you that that's attorney work product,  
2                   Ellen. You can certainly ask him what  
3                   his opinions are.

4                   MS. SACKS:                   That's a new  
5                   objection to me.

6                   MR. WALTERS:                   Well, I don't know  
7                   that it's a new objection. I don't  
8                   know that I've ever heard anybody ask  
9                   what they've discussed with opposing,  
10                  with counsel before.

11                  MS. SACKS:                   Really?

12                  MR. WALTERS:                   Yes. I mean I  
13                  don't --

14                  MS. SACKS:                   My experts are  
15                  always asked that, Steve.

16                  MR. WALTERS:                   I mean you were  
17                  fine to ask it. I'll let him answer  
18                  it, but he'll answer it over my  
19                  objection.

20                  MS. SACKS:                   Okay.

21                  MR. WALTERS:                   I don't care. Go  
22                  ahead, Doctor.

23                  Q.                  Do you remember your conversation with Mr.  
24                  Marmaros about the case?

1 A. The answer is no. I have a note on the  
2 file here that says I did have such a  
3 conversation. The only thing I could tell  
4 you is that he must have told me that there  
5 was such a case and outlined it, but I  
6 don't remember it.

7 Q. Okay, and what about your conversation with  
8 Mr. Walters today, what do you recall about  
9 that?

10 A. That we discussed the case from our  
11 standpoint on what I felt about the  
12 appropriateness of the evaluation by Dr.  
13 Beck of Mr. Conroy.

14 Q. Can you tell me about that in some more  
15 detail, please?

16 A. Sure. I told him that I thought Dr. Beck  
17 met the standard of care in the way he  
18 approached the case of Mr. Conroy and I  
19 told him that I thought that he, that I did  
20 not expect him to be responsible for  
21 actually arranging and being sure that the  
22 patient had a specific appointment at a  
23 specific time with a physician in that, and  
24 the way Dr. Beck dealt with it was within

1 the standard of care.

2 Q. I could not hear the last comment that you  
3 made.

4 A. I said the way Dr. Beck dealt with this  
5 case met the standard of care.

6 Q. The way that he dealt with the case?

7 A. Correct.

8 Q. Okay, anything else?

9 A. Boy, it was a pretty general conversation.  
10 Hang on a second. Oh, yes, I told him that  
11 I thought that it was appropriate that he  
12 documented a physical examination on a  
13 patient with psychiatric problems, that was  
14 good, and I told him that I thought that  
15 the medication that the patient was sent  
16 home on was more of an anti-anxiety agent  
17 and that was perfectly fine because  
18 anti-depressants would not take effect  
19 within the short time frame that he was to  
20 have a psychiatric appointment anyhow.

21 Q. Because anti what would not take effect?

22 A. Anti-depressants.

23 Q. Okay, and this was an anti-anxiety  
24 medication?

1 A. Yeah, more so. That's its predominant  
2 effect.

3 Q. Okay, anything else?

4 A. That's all I remember.

5 Q. And I guess in a way you're telling me what  
6 your opinions are as well?

7 A. I think that's what we're doing, yeah.

8 Q. Went over your opinions with Mr. Walters?

9 A. I think that's, yeah, see, you know how to  
10 say this better than I do.

11 Q. Well, I don't think so, Dr. Janiak.

12 Did Mr. Walters tell you anything in  
13 particular, anything specific?

14 A. No. I mean the only thing we talked about  
15 that was very specific was whether or not  
16 you were going to call us or he was going  
17 to call you when we started this  
18 deposition. Otherwise, we just talked as I  
19 said about my opinions.

20 Q. Let me make sure that I understand your  
21 opinions then. I think you wrote a report.  
22 Maybe we can have that report marked as  
23 Exhibit 2. Do you have a copy of your  
24 report, Doctor?

1 A. Yes, I do.

2 Q. Before I get into your opinions again I  
3 want to ask you just a few questions about  
4 the report.

5 A. All right, can I ask you, do you want me to  
6 have a copy of this given to the -- we'll  
7 do that then.

8 MR. WALTERS: We'll mark it at  
9 the end, yes.

10 A. Okay, go ahead.

11 Q. There's a report that's written to Mr.  
12 Abbarno?

13 A. That's correct.

14 Q. Do you know who he is?

15 A. I must have had a phone conversation with  
16 him to, but I don't know who he is.

17 Q. You have a reference here dated March the  
18 1st, 1994, and that's in the report that  
19 you have in front of you, is that right?

20 A. No, it is not. Hold on.

21 Q. Did you write more than one report?

22 A. No, I didn't. I'm just having trouble with  
23 the date though.

24 I've got one dated February 22nd, but

1 I don't have one dated March the 1st. I  
2 don't understand why that's, why that  
3 happened, because I only did one.

4 Q. But the report that's dated February 22nd,  
5 is marked as Exhibit 2, maybe you can read  
6 that to me?

7 A. I sure will. "Dear Mr. Abbarno, I have  
8 reviewed the materials you have sent me  
9 regarding this particular case. I have  
10 especially focused on the emergency  
11 department records of January 30th, 1991.

12 "Mr. Conroy came in to the emergency  
13 department with a history of depression.  
14 The history that was taken by Dr. Beck was  
15 adequate as was the physical examination.  
16 Dr. Beck specifically asked questions with  
17 regards to suicide and determined that the  
18 patient was, quote, not actively suicidal,  
19 unquote. This is a perfectly reasonable  
20 and appropriate approach for an emergency  
21 physician to take and certainly is within  
22 the standard of care.

23 "Based on these findings the  
24 outpatient referral was also completely

1 appropriate. Dr. Beck started the patient  
2 on Buspar, 5 milligrams, three times a day,  
3 but indicated most appropriately to the  
4 patient that this medication would not take  
5 effect immediately.

6 "Finally, Dr. Beck indicated in his  
7 referral that the patient should call Dr.  
8 Murdock as soon as possible for follow-up.  
9 This was also reasonable and appropriate in  
10 view of the history and physical findings.

11 "In summary, I find absolutely no  
12 deviation from the standard of care on the  
13 part of Dr. Beck. His evaluation,  
14 treatment and recommendations were  
15 completely within the standard of care for  
16 an emergency physician. Sincerely, Bruce  
17 Janiak."

18 Q. Doctor, I wanted to ask you in your report  
19 where you said Dr. Beck specifically asked  
20 questions with regard to suicide?

21 A. Right.

22 Q. What questions did he ask?

23 A. When I said that he specifically asked  
24 questions I was referring to the fact that

1 he noted that the patient was not actively  
2 suicidal. The inference is that you must  
3 ask the patient questions about suicide in  
4 order to be able to state that you're not  
5 actively suicidal. So you are technically  
6 correct in that there is no documented  
7 question, but there is a documented answer.

8 Q. What do you think in your opinion is the  
9 appropriate standard of care for an  
10 emergency room physician with respect to  
11 assessment of a suicide risk?

12 A. The emergency physician needs to do a  
13 history which is appropriate to that, in  
14 other words ask questions with regards to  
15 the patient's feelings, needs to do a  
16 physical examination, and then needs to  
17 make a judgment as to the appropriate  
18 disposition for that patient.

19 Q. You said needs to do a history and needs to  
20 do a physical and then you said make a  
21 judgment?

22 A. That is correct.

23 Q. Isn't that the same thing that you do with  
24 any patient?

1 A. Absolutely.

2 Q. So what specifically do you do with a  
3 patient with depression who may be a  
4 suicide risk?

5 A. Well, you ask appropriate questions and  
6 those questions are --

7 Q. I'd like some more detail relating to the  
8 case.

9 A. Sure. How do you feel. Tell me your  
10 story.

11 Q. Okay, what else?

12 A. And when the patient tells you the story --  
13 well, I can't tell you what else because  
14 everything, all the what elses, derive from  
15 the first answer, but in --

16 Q. There's no basic or standard type of  
17 questioning that is supposed to be done in  
18 order to determine whether or not someone  
19 is a high suicide risk or not?

20 A. Except for the question do you feel  
21 suicidal and that could be worded several  
22 different ways, or do you want to kill  
23 yourself, do you feel like killing yourself  
24 now.

1 Q. Anything else?

2 A. No, that's really it. Everything else is  
3 not standard.

4 Q. And do you feel like killing yourself now,  
5 are you suicidal?

6 A. Well, those are the topics. The wording  
7 could be somewhat different and still be  
8 acceptable. There is no standard wording  
9 which is absolute.

10 Q. Anything else that you can tell me about in  
11 terms of what an emergency room physician,  
12 emergency medical physician is supposed to  
13 do in a situation where a patient is  
14 depressed and an assessment needs to be  
15 made regarding suicide?

16 A. No, because all of the other things that  
17 one would do are really branches that  
18 depend on the answers to the first  
19 questions and what judgment you make with  
20 regard to the risk.

21 Q. Is there anything the physician is supposed  
22 to do other than talk to the patient?

23 A. Well, certainly, the physical examination  
24 as I indicated before.

- 1 Q. What is so important about the physical  
2 examination?
- 3 A. Every time you see a patient with a  
4 psychiatric problem you must have at least  
5 a cursory evaluation for the possibility  
6 that this is a physical problem and not a  
7 mental problem.
- 8 Q. Okay, you're making a determination whether  
9 it's medical or psychiatric?
- 10 A. That is correct.
- 11 Q. Organic versus psychiatric?
- 12 A. Yes, correct.
- 13 Q. Anything else the emergency room physician  
14 is supposed to do?
- 15 A. Well, certainly --
- 16 Q. Not generally, but specifically in a case  
17 like this?
- 18 A. Sure. Well, no. No, I guess the answer is  
19 no because you would always have a  
20 diagnosis and a plan. So that would be for  
21 any patient.
- 22 Q. So the diagnosis was depression?
- 23 A. Correct.
- 24 Q. You agree with the diagnosis?

1 A. Yes.

2 Q. Is that the same diagnosis you believe you  
3 would have made based on what's presented  
4 in the record?

5 MR. WALTERS: Objection.

6 Go ahead, Doctor.

7 A. Yes, I agree. I think I would have made  
8 the same diagnosis.

9 Q. And then you said that the next thing the  
10 doctor has to do is to exercise his  
11 judgment and come up with a plan?

12 A. Right.

13 Q. Do you agree with the plan in this case?

14 A. Yes.

15 Q. What was the plan?

16 A. The plan was to place the patient on  
17 medication, although the patient was  
18 notified that it was not expected to have a  
19 miraculous instantaneous effect, and then  
20 also to arrange for follow-up to a  
21 psychiatrist, and both of those things were  
22 done.

23 Q. In your emergency setting at your hospital  
24 do your emergency room physicians treat

1           psychiatric patients or are they seen by a  
2           psychiatrist?

3    A.       We, that is the emergency physicians, see  
4           the patients first.

5    Q.       We spoke to another doctor earlier this  
6           week who said at their hospital the  
7           psychiatrist saw the psychiatric patients.  
8           That's why I thought it was more standard  
9           that the emergency room physician would see  
10          the patient and then if needed would call a  
11          psychiatrist.

12   A.       You are exactly correct.

13   Q.       Now, would you have any criticism in a case  
14          like this if the emergency room physician  
15          would have called the psychiatrist on call?

16   A.       No.

17   Q.       That would be okay?

18   A.       Yes.

19   Q.       That would have been an okay thing to do?

20   A.       Correct.

21   Q.       What about calling the family? Do you have  
22          any feelings about or opinions about  
23          whether or not any family members should  
24          have been contacted?

1 A. Well, I would not have a criticism if the  
2 family were contacted, making an assumption  
3 that that was okay with the patient. I  
4 would have to assume that.

5 Q. If it was okay with the patient?

6 A. Yes.

7 Q. Then you think that would be acceptable?

8 A. I would not have a criticism.

9 Q. You would not have a criticism?

10 A. Right.

11 Q. Do you think that a family member should  
12 have been called?

13 A. No, I think that's another judgment. In  
14 this case I didn't see any indication that  
15 a family member needed to be contacted.

16 Q. Why is that?

17 A. Because there is no evidence of one of two  
18 possibilities. One is that the patient is  
19 so confused or mentally disabled that he is  
20 unable to communicate in a reasonable way,  
21 or, two, is that the patient has an organic  
22 impairment that, like alcoholism or heavy  
23 alcohol use, that renders him incapable of  
24 making reasonable judgments, and I guess I

1           should add, three, the patient, there's no  
2           documentation at least, that the patient  
3           requested that Dr. Beck call his relatives.

4    Q.     Have you ever heard of the concept of  
5           calling a family member in a situation  
6           where the patient is depressed and may be  
7           suicidal so that it can be a support  
8           mechanism for the patient until they get to  
9           a psychiatrist?

10                   MR. WALTERS:            Objection.  
11    Go ahead, Doctor.

12                   MS. WHITMORE:          Objection.

13    A.     Have I ever heard of that happening? The  
14           answer is yes, I have heard of that  
15           happening.

16    Q.     And are you critical of that kind of  
17           conduct?

18    A.     No, that is something else a physician can  
19           do, but not doing it is not a violation of  
20           the standard. It's perfectly reasonable to  
21           not do that.

22    Q.     Well, what is the objective of the plan  
23           when you let a patient go who needs to see  
24           a psychiatrist or needs to be treated?

- 1 A. The objective is that the patient will  
2 understand what your instructions are, in  
3 this case call Dr. Murdock ASAP, and  
4 actually carry through with that phone  
5 call, and I believe that the record show  
6 that that happened.
- 7 Q. And do you have any criticisms of any of  
8 the doctors who were involved in this case  
9 in any way?
- 10 A. You mean other physicians.
- 11 Q. Anybody other than Dr. Beck. I mean do you  
12 have any criticisms of any of the medical  
13 care providers?
- 14 A. I was never asked to look at this case from  
15 that viewpoint so I don't know. I haven't  
16 evaluated it from that viewpoint.
- 17 Q. So I take it that you're not going to be  
18 offering an opinion regarding any  
19 criticisms of any medical care providers?
- 20 A. You are correct.
- 21 Q. Okay, and what about Fairview General  
22 Hospital, do you have any criticisms of any  
23 of their procedures or policies?
- 24 A. I do not.

- 1 Q. Have you treated patients in emergency  
2 rooms who have come in with depression or  
3 where you have diagnosed depression?
- 4 A. Yes. I was going to say I wouldn't say  
5 I've actually treated them, but I certainly  
6 have diagnosed it.
- 7 Q. Diagnosed it, and then you haven't treated  
8 them you said?
- 9 A. I have not, right.
- 10 Q. Would a psychiatrist?
- 11 A. Either that or to their family physician  
12 depending on in my judgment what type of  
13 support the patient needs.
- 14 Q. Have you ever called the psychiatrist on  
15 call to see a patient because of  
16 depression?
- 17 A. Many times.
- 18 Q. And in this hospital or in the hospitals in  
19 which you have worked has there always been  
20 a system where there's been a psychiatrist  
21 on call?
- 22 A. Yes, ma'am.
- 23 Q. So then it would be the psychiatrist's  
24 decision at that point whether to admit the

1 patient or not?

2 A. I think the answer to that is somewhat  
3 complex. It technically is the decision of  
4 the psychiatrist or for purposes of  
5 discussion any potential attending  
6 physician who has to rely on the  
7 information given to him or her by the  
8 emergency physician. So in that sense it  
9 is a somewhat joint decision, but the  
10 technical act of admitting and the  
11 responsibility for the patient rests solely  
12 with the attending physician.

13 Q. Okay, but it might be, are you saying that  
14 it might be a joint decision of the  
15 emergency room doctor, the psychiatrist,  
16 maybe the family physician?

17 A. Right, that's always a possibility because  
18 the psychiatrist or family physician or  
19 surgeon or whoever may need more  
20 information, ask more questions, and end up  
21 being a joint type of decision.

22 Q. In a situation where a patient has been in  
23 an emergency psychiatric setting has been  
24 diagnosed with depression and the

1           psychiatrist, where a patient has been  
2           diagnosed with depression, when do you  
3           think it is appropriate to call the  
4           psychiatrist on call?

5       A.     That decision is in most cases a judgmental  
6           one which falls on the shoulders of the  
7           emergency physician and it is so because  
8           except for some very explicit pieces of  
9           information, for instance I am going to  
10          kill myself right now, quote/unquote,  
11          absent that it is a judgment the emergency  
12          physician has to make and it's made based  
13          on the constellation of information  
14          acquired in evaluating the patient.

15       Q.     Well, what kind of information would lead  
16           you or in your opinion lead a reasonable  
17           emergency room physician to call the  
18           psychiatrist on call?

19       A.     When I see a patient --

20       Q.     Again, it's a judgment call, but I want to  
21           know under what circumstances that judgment  
22           would be exercised in terms of making the  
23           phone call.

24                   MR. WALTERS:           You're asking that

1 absent the example he's given you  
2 already, is that correct? He's given  
3 you one example already.

4 THE WITNESS: Did you hear that?

5 MS. SACKS: Yes. I guess I'm  
6 not sure I heard it that way, but I  
7 heard what he said.

8 MR. WALTERS: Okay, go ahead,  
9 Doctor.

10 A. Then I'll give you another example. A  
11 patient comes in who actually has slashed  
12 his wrist or her wrist deep enough to  
13 injure the artery. To me that is a rather  
14 severe message that a patient is quite  
15 disturbed.

16 Another example would be a patient who  
17 says that they are thinking constantly  
18 about suicide and that they are going to  
19 commit suicide and they don't really want  
20 to do it and that's why they came in to see  
21 a physician because they need help.

22 Those are two where it's pretty clear  
23 that a psychiatrist needs to be called and  
24 of course we call them when we see patients

1           like that.

2   Q.       Okay, any other examples you can think of?

3   A.       Sure, the answer is now a gradation of ways  
4           patients present with an infinite variety  
5           and judgment has to be exercised. That's  
6           the only way I can answer it.

7   Q.       Judgment has to be exercised as to how to  
8           treat the patient and whether or not to  
9           call a psychiatrist, is that fair?

10   A.       That's right, because we're looking at one  
11           end of the spectrum being admission to the  
12           psychiatric intensive care unit and the  
13           other end of the spectrum being discharge  
14           without any follow-up whatsoever, and in  
15           between there's a lot of gray zones.

16   Q.       Is the purpose of the psychiatric consult  
17           only for purposes of admitting or is it  
18           also for purposes of consultation?

19   A.       It can be both. In many institutions it's  
20           both where a psychiatrist will render their  
21           opinion to be additive to that of the  
22           emergency physician or the emergency  
23           physician may simply feel they don't have  
24           the data or the expertise to make a

1 judgment. That happens not just in  
2 psychiatry but of course in every other  
3 disease entity.

4 Q. Do you know, Doctor, and I don't know if  
5 this is beyond your field or not, but do  
6 you know whether or not people who suffer  
7 from depression or patients who suffer from  
8 depression are notoriously good or bad  
9 about following up on appointments such as  
10 this, following up on things that need to  
11 be done?

12 MR. WALTERS: I'll object to the  
13 form.

14 Go ahead, Doctor.

15 A. No, I think I will tell you that I have  
16 never read a study on that and so I just  
17 don't know.

18 Q. Okay, so that may be beyond your expertise  
19 then?

20 A. Maybe.

21 Q. In any event you didn't have any problem  
22 with Mr. Conroy being released with saying  
23 follow up as soon as possible?

24 A. No, because now we're talking about Mr.

1 Conroy. Your question was about  
2 psychiatric patients and I don't know the  
3 data there.

4 Q. Right.

5 A. But I do know that patients who seem to be  
6 alert and oriented and respond normally  
7 have an excellent chance of following  
8 through with what you tell them to do.

9 Q. Are you talking about depressed patients or  
10 are you just talking about generally as an  
11 emergency room physician?

12 A. No, I'm talking about, well, I'm talking  
13 both I guess, but depressed patients that  
14 are alert and oriented and fairly  
15 comfortable, who are thought to be not  
16 actively suicidal, are motivated to come in  
17 to the Emergency Department and are  
18 motivated to follow through, and actually  
19 are I think quite grateful to have access  
20 to a support system. So they in my  
21 experience do follow through.

22 Q. How do you know?

23 A. The answer to that is that you do over a  
24 period of years get feedback from your

1 colleagues in other specialties including  
2 psychiatry as you walk past them in the  
3 hall and say did Mr. Jones, quote/unquote,  
4 see you as he was supposed to and the  
5 answer is yes. Or, occasionally, you'll  
6 even ask a nurse to call a patient and find  
7 out how they're doing and the answer seems  
8 to be yes.

9 Q. Which leads me to another series of  
10 questions and that is whether or not you've  
11 ever been involved in any hospital where  
12 there's been follow-up to see if the  
13 patient did go see who he was supposed to  
14 see or do what he or she was supposed to do  
15 by either having a doctor call or a nurse  
16 call or some sort of procedure where a  
17 follow-up was verified?

18 A. The answer is that I've been involved in  
19 places, including the Toledo Hospital, in  
20 which that is done on a random basis, but  
21 I've never been in an institution where  
22 it's done on a 100 percent basis or even a  
23 50 percent basis for that matter.

24 Q. But sometimes it might be done if there's a

1 particular concern about a patient for  
2 example?

3 A. Correct.

4 Q. Is that what you mean by random?

5 A. That's correct.

6 Q. Okay, so you really want to make sure that  
7 Mr. Smith did what he was supposed to do?

8 A. Correct.

9 Q. Okay, and would you call under those  
10 circumstances where there were these  
11 random, I guess what you call random  
12 follow-up was made, would it be with the  
13 physicians to whom the patient was referred  
14 or to the patient or to a family member?

15 A. I would say 90 percent of the time it would  
16 be to the patient. 9 percent of the time,  
17 and I obviously don't have a study here by  
18 the way, 9 percent of the time it would  
19 probably be to the physician, and 1 percent  
20 of the time it would be to a family member  
21 and the reason for that is that they're the  
22 ones who answer the phone when you call.

23 Q. Have you worked in an emergency department  
24 where there has been any system in place,

1           whether formal or informal, of letting the  
2           referring doctors know that these patients  
3           had been referred to you, they were in the  
4           emergency room and they were given your  
5           name, by either leaving part of the record  
6           or any other kind of communication?

7    A.       Yeah, I think the answer is that in most  
8           places that communication is done by virtue  
9           of a copy of the emergency record.

10   Q.       Where does it go?

11   A.       If the system works correctly the Medical  
12           Records Department would forward a copy to  
13           the attending physician that was identified  
14           as the follow-up physician.

15   Q.       Is that fairly standard as far as you know?

16   A.       Excellent question.  Actually it's one I'm  
17           going to write a note about to try to see  
18           if I can figure it out.

19               I would say that I don't know.  I'm  
20           going to be real honest.  I don't know if  
21           it's a standard so I can't answer.

22   Q.       Okay, but that's the way it is at your  
23           institution?

24   A.       Right.

1 Q. Are the referrals made to physicians that  
2 are on the staff of the hospital?

3 A. That's correct. Mostly that's true.

4 Q. Okay, and so would they, would the sheet  
5 from the emergency room that goes to the  
6 referring doctor, do you know if that would  
7 be left in a box or that would be mailed or  
8 how that communication is made, at least in  
9 your hospital?

10 A. At this institution it would be either  
11 mailed or faxed depending on a number of  
12 circumstances and how fast the chart was  
13 ready and how soon the doctor needed it.

14 Q. Is that done each day?

15 A. Yes. Well, I can't speak for holidays and  
16 Sundays, but I think it's done the rest of  
17 the days of the week.

18 Q. So that's a normal routine?

19 A. Right.

20 Q. And you do have some familiarity with  
21 hospitals outside of your own?

22 A. Correct.

23 Q. From teaching or speaking or whatever, and  
24 do you know if there's other hospitals that

1           have a similar kind of system, that is that  
2           the referring doctors are notified?

3    A.       As far as I know that's what most of the  
4           hospitals in the Toledo area do in  
5           northwest Ohio. You know, I have my  
6           experience with southern Ohio hospitals is  
7           now over ten years old so I can't speak for  
8           what they do now.

9    Q.       What do you understand the reason to be for  
10          that communication?

11   A.       The reason for that communication is that  
12          it is always helpful, well, nothing's  
13          always, it is frequently helpful for one  
14          physician to know what another physician  
15          thought about a patient because it sets  
16          them off on a, hopefully on the correct  
17          path with regards to that patient's  
18          evaluation.

19   Q.       Doctor, I want to ask you a couple of  
20          questions about the medications here.

21   A.       All right.

22   Q.       Do you prescribe Buspar?

23   A.       No.

24   Q.       Have you?

1 A. No.

2 Q. Why not?

3 A. I limit the medications I use and Buspar is  
4 not on that list. If I want an  
5 anti-anxiety agent for an adult I usually  
6 use Valium. It's just a personal choice.

7 Q. Do you prescribe medications to psychiatric  
8 patients who you believe have a diagnosis  
9 of depression?

10 A. Yeah. Not on all of them, but I certainly  
11 have. I've given anti-depressants before,  
12 sure.

13 Q. I mean if some -- I guess you would have  
14 the view that the psychiatrist should be  
15 prescribing the anti-depressants. I just  
16 didn't know what your view was on that.  
17 But you have?

18 A. Yes, and I also understand the other view,  
19 and I think both views are okay.

20 Q. Would you have prescribed medication based  
21 on what we know from the chart to Mr.  
22 Conroy?

23 A. All right, you want me to assume that I'm  
24 seeing Mr. Conroy and I've gotten through

1 to the diagnosis and I know he's going to  
2 be calling his doctor as soon as possible?

3 Q. You know you're giving him a slip saying  
4 call your doctor as soon as possible.

5 A. I understand.

6 Q. Yes, you know what we know here from this  
7 record.

8 A. Okay.

9 MR. WALTERS: Show my objection.  
10 Go ahead, Doctor.

11 A. No, I probably wouldn't have.

12 Q. You probably would not have prescribed any  
13 medication?

14 A. That's right.

15 Q. Because you would think he's going to be  
16 going to a psychiatrist and he needs to go  
17 to a psychiatrist?

18 A. Well, I think that's part of it. The other  
19 part of it is just personally I don't like  
20 medicines so I try to stay away from them,  
21 period. So no matter what the disease is I  
22 am less likely to prescribe medicines than  
23 some of my colleagues.

24 Q. I want to ask you, Doctor, about Dr. Beck's

1 plan which is he's got it as part of the  
2 chart here.

3 A. Correct.

4 Q. The patient was started on Buspar and that  
5 I believe you have said, and I think is  
6 what has been said by others, is an  
7 anti-anxiety medication?

8 A. That's correct.

9 Q. And then it says that he was told it would  
10 take two to three weeks for the medicine to  
11 work?

12 A. That's what it says.

13 Q. What do you understand that to mean?

14 A. Well, there are a number of psychiatric  
15 medicines that seem to reach their maximal  
16 therapeutic effect after they've been taken  
17 for a couple of weeks, and I think that's  
18 all it was. He was trying to indicate to  
19 the patient that he shouldn't expect much  
20 in the way of a change in the way he feels  
21 just from this.

22 Therefore, one could infer that's also  
23 a reason that you need to see the  
24 psychiatrist because medicine is not going

1 to cure you.

2 Q. Well, that medicine wouldn't cure the  
3 depression anyway, right?

4 A. That's right.

5 Q. And you understand that that was made clear  
6 to Mr. Conroy, that he was not given  
7 medication for depression but he was given  
8 medication for anxiety but it would take  
9 two to three weeks to work, or don't you  
10 know?

11 A. I think I know he was told it would take  
12 two to three weeks to work. I'm not clear  
13 about exact wording on whether or not what,  
14 I don't believe there's any way for me to  
15 know what Mr. Conroy understood the  
16 medicine would do. So I don't --

17 Q. I'm not sure that there is either. I just  
18 wanted to make sure that we were on the  
19 same page here.

20 A. I think we are.

21 Q. So what you understand is that it is I  
22 guess medically or clinically correct that  
23 Buspar would take two to three weeks to  
24 work as a medication?

- 1 A. As far as I understand. As I said I don't  
2 prescribe it myself.
- 3 Q. Okay, so what it was prescribed for, for  
4 whatever it was prescribed for?
- 5 A. Right.
- 6 Q. Okay, and you don't understand that that  
7 was prescribed for the depression, correct?
- 8 A. Correct.
- 9 Q. Did you say that you read Dr. Murdock's  
10 deposition?
- 11 A. Yes, I did.
- 12 Q. And maybe a report by him, a short report,  
13 did you read that?
- 14 A. You know, I think that that's true. Hang  
15 on, let me just confirm that. Yep, I do, I  
16 have it. Dated December 14th, 1993?
- 17 Q. I don't have it in front of me, but it's a  
18 very short report.
- 19 A. Okay, yes, I have it.
- 20 Q. Letter, it's really a letter. Did you  
21 understand from reading Mr. Murdock's  
22 deposition and that report that he feels  
23 that he should have been called that  
24 evening, that morning actually, he as the

1           psychiatrist on call believes that he  
2           should have been called in this case?  
3    A.       That's what he said.  
4    Q.       And do you have any, can you understand his  
5           perspective?  
6                   MR. WALTERS:           I object.  
7                                   Go ahead, Doctor.  
8                   MS. WHITMORE:        Objection.  
9    A.       Well, I think I have a very clear  
10           understanding of his objective.  
11   Q.       Perspective.  
12   A.       Perspective, I'm sorry. Yes, I think I --  
13   Q.       You said you have a clear understanding of  
14           his perspective?  
15   A.       I think I do.  
16   Q.       Okay, is that because you worked with  
17           psychiatrists in emergency psychiatric  
18           settings?  
19   A.       No.  
20   Q.       Okay, why is that?  
21   A.       Because I think I work with people and I  
22           understand some things about human nature,  
23           or at least I think I do.  
24   Q.       And what do you mean by that?

1     A.     I mean when any of us feel we might be in  
2           trouble we tend to look for ways to defend  
3           ourselves.

4     Q.     And do you think that Mr. Murdock did  
5           anything wrong or do you think he was  
6           giving this opinion because he felt that  
7           others may think that or something along  
8           those lines?

9     A.     Well, I think in answer to your first  
10          question I already said I wasn't going to  
11          testify about the behavior of Dr. Murdock  
12          so I'm not sure, you know, what I'm  
13          supposed to say there.

14    Q.     So you don't have an opinion as to whether  
15          Dr. Murdock acted negligently?

16    A.     Not now because I've not been asked to  
17          review it from that standpoint. I haven't  
18          even looked at Mr. Murdock. I just read  
19          the letter.

20    Q.     Have you ever had any conversations with  
21          any psychiatrists in an emergency setting  
22          where maybe it didn't involve you but  
23          somebody else on your staff in reviewing  
24          the disposition of a patient where

- 1 psychiatrists had said well I think we  
2 should have been called in this case or I  
3 think it would be a good idea to call us in  
4 cases like this, any dialogue of that kind?
- 5 A. Let me think just a moment because that's  
6 another good question. No, I have to tell  
7 you that I don't remember having that kind  
8 of issue. I've had psychiatrists say why  
9 did you call me, but I've not had them say  
10 why didn't you call me.
- 11 Q. Oh, you've had them say you really didn't  
12 need to call me in this case?
- 13 A. Correct.
- 14 Q. So sometimes they feel like they're being  
15 overused?
- 16 A. I don't know if I could --
- 17 Q. You're speaking of a specific example?
- 18 A. No, I'm not thinking of a specific example.  
19 I just am not sure what their motivation  
20 would be for that. I don't know.
- 21 Q. Do you go over cases with them at all, like  
22 either, you know, weekly, yearly,  
23 quarterly?
- 24 A. The answer to that is there may have been

1 cases that have been presented at our  
2 Emergency Medicine Grand Rounds, but I  
3 personally have not participated in those  
4 particular rounds.

5 Q. Have you ever, are you aware of the  
6 circumstances in your own experience or in  
7 your position of Chair of the Department,  
8 where that had a similar to this one where  
9 someone was seen at the emergency room and  
10 released and then committed suicide?

11 A. Yes.

12 MR. WALTERS: I'll object.

13 Go ahead.

14 A. The answer is yes.

15 Q. Yes?

16 A. Yes.

17 Q. Are those reviewed internally, those cases?

18 MR. WALTERS: Objection.

19 Go ahead, Doctor.

20 A. Yes.

21 Q. And in any of those situations do you ever  
22 recall any involvement of the psychiatrist?

23 MR. WALTERS: I'm going to  
24 object because I think this is

1                   dangerously getting close to what's  
2                   protected information, Ellen, under  
3                   the Peer Review Statutes in the Ohio  
4                   Revised Code. So I don't think the  
5                   doctor is allowed to testify to what  
6                   he's learned in a peer review meeting.

7                   MS. SACKS:                   I think he can if  
8                   it's not, we're not talking about a  
9                   specific case or a specific patient.

10                  MR. WALTERS:                I'll leave that to  
11                  the doctor, but I don't think that's  
12                  true. I don't think you're allowed to  
13                  discover information at all from those  
14                  meetings because if you could you  
15                  could go a long way in a lot of  
16                  different cases of proving different  
17                  things based upon peer review.

18                  A.            Maybe I could simplify this by saying that  
19                  I am thinking of a specific case and it  
20                  happened so long ago that that particular  
21                  case was not presented at any conference.

22                  Q.            Okay, so you remember a case where somebody  
23                  was released and committed suicide, but you  
24                  don't remember it being reviewed?

- 1 A. That is exactly right.
- 2 Q. Am I right?
- 3 A. I don't remember it being reviewed in a  
4 formal way. I mean other than knowing  
5 about it within the department, no, there  
6 was no presentation or case discussion.
- 7 Q. I wasn't really asking about peer review or  
8 anything formal frankly. I was just  
9 wondering if you had a circumstance that  
10 was similar or that you knew of where  
11 somebody was released and committed suicide  
12 and I think you said the answer was yes.
- 13 A. I did say that.
- 14 Q. Was that only one time and was that the one  
15 that you were remembering?
- 16 A. It's the only one I can remember.
- 17 Q. Okay, and that was quite a while ago?
- 18 A. As a matter of fact it was probably 1975.
- 19 Q. I want to make sure, Doctor, that I have  
20 covered all of your opinions. Do you  
21 believe that you have expressed all the  
22 opinions about the care given to Mr. Conroy  
23 about any other issues in which you intend  
24 to express an opinion?

1 MR. WALTERS: I'll object, but  
2 you've had the opportunity to ask him  
3 questions. I don't know that he's got  
4 to, that he can exhaust his memory.

5 But go ahead,  
6 Doctor, as best you can.

7 A. No, right now I think you've asked me all  
8 the pertinent points.

9 Q. So in other words you believe that the  
10 history was taken properly?

11 A. Yes, ma'am.

12 Q. Do you believe everyone was contacted who  
13 should have been contacted or interviewed,  
14 which was Mr. Conroy?

15 A. Right.

16 Q. And you think the history was appropriate,  
17 correct?

18 A. Correct.

19 Q. The judgment was appropriate?

20 A. Correct.

21 Q. And you don't believe that there was  
22 anything more that Dr. Beck should have  
23 done?

24 A. No, I don't.

1 Q. And I take it you don't feel that he failed  
2 in any way?

3 A. That is correct.

4 Q. And you don't think that there's anything  
5 more that should have been done in terms of  
6 policy or procedure with respect to the  
7 disposition of the patient?

8 A. That is also correct.

9 Q. By the hospital or the procedures or --

10 A. Right, no hospital procedures.

11 MS. SACKS: Okay, Doctor, I  
12 don't think I have any other  
13 questions.

14 We have the two  
15 exhibits?

16 MR. WALTERS: Right, the CV and  
17 the report.

18 MS. SACKS: 1 and the report  
19 is 2.

20 MR. WALTERS: Right. I think  
21 that's what we said.

22 THE WITNESS: That's all I  
23 remember.

24 MS. SACKS: And those will be

1 attached to the transcript?  
2 MR. WALTERS: Correct.  
3 THE WITNESS: That's right.  
4 MS. SACKS: I don't know if  
5 you want the doctor to read or waive.  
6 MR. WALTERS: He'll read it.  
7 MS. SACKS: Okay, then I think  
8 we're all set.  
9 (Whereupon, Plaintiff's Exhibits 1 and  
10 2 were marked for identification.)  
11 (Whereupon, the deposition was  
12 concluded at 3:05 p.m..)  
13 I, BRUCE DAVID JANIAK, M.D., do hereby  
14 certify that I have read the foregoing  
15 transcript of my deposition given on  
16 December 22, 1994, and that together  
17 with the correction page attached  
18 hereto, noting changes in form or  
19 substance, if any, it is true and  
20 correct.  
21  
22  
23

DATE

BRUCE DAVID JANIAC, M.D.

- - -

C E R T I F I C A T E

STATE OF OHIO     )  
                              ) SS.  
COUNTY OF LUCAS )

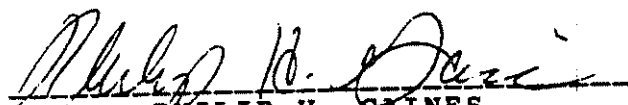

I, Philip H. Gaines, a Notary Public in  
and for the State of Ohio, duly commissioned and  
qualified, do hereby certify that the within-named  
witness, BRUCE DAVID JANIAC, M.D., was by me first  
duly sworn to tell the truth, the whole truth,  
and nothing but the truth in the cause aforesaid;  
that the testimony then given by him was by me  
recorded on audio cassette in the presence of  
said witness, afterwards transcribed upon a word  
processor, and that the foregoing is a true and  
accurate transcription of the testimony so given  
by him as aforesaid.

I do further certify that this deposition  
was taken at the time and place in the foregoing  
caption specified and was completed without  
adjournment.

I do further certify that I am not a  
relative, counsel, or attorney of any party or  
otherwise interested in the event of this

1 action.

2 IN WITNESS WHEREOF, I have hereunto set  
3 my hand and affixed my seal of office at Toledo,  
4 Ohio, on this 3<sup>rd</sup> day of January 3, 1995.

5  
6   
7 PHILIP H. GAINES  
8 Notary Public  
in and for the State of Ohio.

9 My Commission expires February 1, 1998.
