RE: Carolyn Brown, E/O Robert Brown v. Ellet Family Practice, et al
Summit County Common Pleas Court Case # 2002-11-6271
File # 30006-00003

Dear Colleen:

I have reviewed the file on Robert Brown, which include the following:

1. 2-23-96 Doppler study
2. 2-29-96 - 3-3-96 femoral artery bypass, right to left, and arteriogram
3. Ellet Family Medical Center
4. 2-25-98 - 2-26-98 arteriography of femoral and LE, aortography
5. 3-3-98 - 3-8-98 arterial embolism or thrombus of LE
6. 12-5-98 - death, Summa health
7. Coroner's information

I have also reviewed the depositions of Carolyn Brown, David Fox, Suzana Sarac Leonard, M.D., expert reports by Richard Weinberger, M.D., Steven G. Lalka, M.D., and Dennis Olivares, PA-C. I reviewed the expert report of George E. Anton, M.D. After critical review of the above listed depositions, documents, and expert reports, I have comfort in giving my opinion with regard to the care of Dr. Suzana Sarac Leonard and David Fox, who are part of the Ellet Family Practice. Dr. Sarac's care of Mr. Robert Brown on 4-21-98 was well within the standard of care. Mr. Fox's evaluation of Mr. Robert Brown on 12-4-98 was within the standard of care as well. I do not feel that Mr. Robert Brown's clinical course could have been altered by any available medical intervention. I hope this information is of value to you in the defense of this case.

Sincerely,

Donald W. Junglas, M.D.
