

ORIGINAL

IN THE COURT OF COMMON PLEAS

OF CUYAHOGA COUNTY, OHIO

EDWARD COLLINS, et al.,
Plaintiffs,

v.

MICHELE KOSTURA, et al.,
Defendants.

:
: Case No. 258554
: Hon. Kenneth Callahan
:
:
:

- - -

Deposition of CHRISTOPHER C. LAYNE, Ph.D., a
Witness herein, called by the Plaintiffs as upon
Cross-Examination, pursuant to the Ohio Rules of
Civil Procedure, taken before Constance L.
Boyden, Registered Professional Reporter and
Notary Public in and for the State of Ohio, at
Layne Psychological Services, 2800 West Central
Avenue, Suite A, Toledo, Ohio, on Monday,
December 5, 1994, commencing at 9:27 a.m.

1 APPEARANCES:

2 On behalf of the Plaintiffs:

3 SPANGENBERG, SHIBLEY, TRACI, LANCIONE & LIBER:
4 John A. Lancione
Suite 2400, 1900 East Ninth Street
Cleveland, Ohio 44114-3062 (216) 696-3232

5 On behalf of the Defendants:

6 KITCHEN, DEERY & BARNHOUSE:
7 Eugene B. Meador
Suite 1100, 55 Public Square
8 Cleveland, Ohio 44113 (216) 241-5614

9 - - -

10 CHRISTOPHER C. LAYNE, Ph.D.,

11 being first duly sworn, as hereinafter certified,
12 testified and said as follows:

13 - - -

14 CROSS-EXAMINATION

15 BY MR. LANCIONE:

16 Q Would you state your full name for the record,
17 please.

18 A Christopher Layne, L-a-y-n-e.

19 Q Dr. Layne, as you know, my name is John Lancione,
20 and I represent Ed and Karen Collins in this case
21 that's been brought against Michele Kostura
22 arising from an automobile accident on September
23 23rd, 1991.24 I'm sure you know the rules for a
25 deposition, but just so your understanding is on

1 the record, I'm going to go over them with you
2 real quick. During my questioning, if you don't
3 understand a question, please tell me, and I'll
4 rephrase it and ask it in a more understandable
5 manner. Also keep your answers verbal so the
6 court reporter can take down your testimony.
7 Okay?

8 A Okay.

9 Q Thank you. What is your professional address?

10 A 2800 West Central, Suite A, Toledo, Ohio, 43606.

11 Q Is that your only office?

12 A Yes.

13 Q And what is your home address?

14 A 3436 Brookside, Toledo, Ohio.

15 Q Is that in Ottawa Hills?

16 A Yes.

17 Q Right off of Talmadge?

18 A It is about three quarters of a mile from
19 Talmadge going east. It's also about two blocks
20 from Secor.

21 Q Okay. Are you married?

22 A Yes.

23 Q How many children?

24 A One.

25 Q Doctor, you've been kind enough to provide me

1 with a copy of your CV. I'd just like you to
2 identify it for the record, and we'll mark it as
3 Exhibit 1.

4 A This is the vita that I just handed you, yes.

5 Q And it was dated, printed on October 21st, 1994?

6 A Yes.

7 Q Is there anything that you would consider
8 important to add to this?

9 A No.

10 MR. LANCIONE: Okay. Would you
11 mark that as Exhibit 1.

12 (Plaintiffs' Exhibit 1 marked.)

13 Q Doctor, since receiving your license in Ohio as a
14 licensed psychologist in 1980, have you
15 continuously -- it appears that you've
16 continuously been holding yourself out as Layne
17 Psychological Services; is that correct?

18 A Yes, that's -- I guess I started using that name
19 around 1985.

20 Q Okay. But you entered private practice in 1980?

21 A Well, I practiced also in Mississippi before I
22 arrived here, so I've been in practice since
23 about 1976.

24 Q Right after you received your Ph.D. from
25 University of Alabama?

1 A Right.

2 Q All right. But in terms of private practice in
3 Ohio, it's been from 1980?

4 A Correct.

5 Q What was your thesis topic at the University of
6 Alabama?

7 A My thesis was on the incentive values of rewards
8 for children.

9 Q Do you have a subspecialty or a focus in your
10 practice on child psychology or is it --

11 A No. Although I do treat a lot of children now,
12 my primary focus is on the treatment of anxiety
13 and depression.

14 Q You're a diplomate in the -- in clinical
15 psychology of the American Board of Professional
16 Psychology and you received that certification in
17 1980?

18 A Correct.

19 Q What does it take to be eligible to take the
20 board examination administered by the American
21 Board of Professional Psychology?

22 A To be eligible you have to have five years of
23 experience in the field, and of course you have
24 to have a legitimate doctorate and internship
25 training. That's eligibility.

1 Then the second stage is to hand in a lot of
2 written work samples and a tape recording of your
3 therapy skills, and if those go well then you get
4 a face-to-face day-long examination with three
5 board certified psychologists.

6 Q Did you need to take the test only once?

7 A The entire exam is a one-shot situation, yeah,
8 consisting of those three phases.

9 Q So you passed on the first occasion?

10 A Yes.

11 Q Now, this board, this is not a medical board,
12 American Board of Professional Psychology?

13 A No. I'm not a physician.

14 Q You need an M.D. to -- **it's** not a requirement
15 that you have your medical -- your M.D.

16 A No.

17 Q Okay. You're also listed here as being a tenured
18 professor. Well, your report said you're a
19 tenured professor at the University of Toledo,
20 the Department of Psychology or Psychology
21 Department.

22 A Correct.

23 Q Now, your CV says associate professor, but
24 somewhere in your report it says tenured
25 professor. Is there a difference?

1 A No, no, tenure is something that's awarded for
2 basically people who have been professors for a
3 long time, and associate professor is a rank, so
4 they're sort of different domains.

5 Q A rank among tenured professors?

6 A Yes.

7 Q Does associate professor mean something with
8 respect to the amount of time you devote to
9 teaching?

10 A No. It's not relevant to that. It's more
11 relevant to the amount of time you've been at the
12 university, more than anything else.

13 Q Are you currently engaged in teaching students
14 right now?

15 A Yes.

16 Q How many courses are you involved in currently?

17 A This year I'm on sabbatical so that means I'm
18 doing research, but generally I teach about 200
19 students per quarter for three academic quarters.

20 Q That's the calendar year, three quarters at UT?

21 A Yes, yes.

22 Q Those 200 students, is that one class or is that
23 several classes?

24 A Two classes.

25 Q Two classes of 100 approximately?

1 4 What's correct

2 Q And what are -- what is your normal curriculum
3 that you teach?

4 A Usually it is principle of psychology, which is
5 the introductory course for undergraduates, and
6 then personality psychology, which is rd course in
7 giving an overview of personality theories

8 Q Those are all undergraduate courses?

9 A Right.

10 Q Have you taught any graduate courses ever?

11 A Yes At the University of Southern Mississippi I
12 taught graduate courses in psychological testing
13 and psychotherapy, and I wish that at the
14 University of Toledo too.

15 Q They have a graduate school there?

16 A Yes.

17 Q What's your topic that you're involved in right
18 now in research while on sabbatical?

19 A It is on the tendencies of people to exaggerate
20 mental problems I'm asking the question about
21 what the effects of exaggeration are on people's
22 personality testing I'm comparing these groups
23 of people, people who are involved in litigation,
24 patients who are not involved in litigation and
25 then people who are not patients

1 Q Litigants, patients and nonpatients?

2 A Right.

3 Q And the issue is -- or the topic is the tendency
4 of people to exaggerate what?

5 A Mental problems.

6 Q Mental problems?

7 A Right, whether or not that's detectable and
8 whether or not it correlates particularly with
9 psychological test results.

10 Q Have you reached any conclusions at this point?

11 A No, no, just gathering the data.

12 Q Just gathering. Did you utilize your examination
13 and evaluation of Karen Collins as part of
14 this --

15 A No.

16 Q -- research?

17 A No.

18 Q Did you apply any of the research issues or
19 testing to Karen Collins in this evaluation?

20 A No, since it's in its formulative stage, there's
21 nothing available to apply.

22 Q So with respect to Karen Collins, you have
23 formulated no opinion as to whether or not she is
24 exaggerating her symptoms or malingering or
25 anything like that?

1 A I have formulated opinions about that.

2 Q Okay.

3 A She's not a part of my research, but I can
4 still --

5 Q Briefly what are your opinions about whether
6 she's exaggerating her symptoms?

7 A She's not exaggerating her symptoms.

8 Q With respect to the issues involved in your
9 research or concerning your research other than
10 not exaggerating, have you formulated any other
11 opinions about Karen Collins that may be germane
12 to your research, current research?

13 A I can't think of any, no. That's the one place
14 that the research and Karen Collins intersect is
15 the notion of exaggeration, and she does not,
16 so --

17 Q Okay. In this field, there's always concern, I
18 think, on the part of some parties involved that
19 the patient is malingering or trying to become
20 enriched monetarily because of the litigation.
21 Do you find that Karen Collins has any of those
22 factors motivating her in this case?

23 A Well, the --

24 MR. MEADOR: Well, I think I'm --
25 unless Dr. Layne evaluated her for that

1 purpose, I would object to him
2 expressing opinions on that subject
3 because I don't think, John, unless I'm
4 wrong, I don't think he's indicated them
5 in the report.

6 MR. LANCIONE: No, he hasn't, but I
7 just -- I'm going -- I should just ask a
8 global question if he has any other
9 opinions, but I'll ask your question.

10 Q Did you evaluate her for that purpose?

11 A I -- that wasn't my primary purpose, but it is
12 always a concern. I mean, I have to --
13 particularly in the area of psychological
14 litigation, I've got to ask the question, is the
15 person exaggerating or is the person not, so I'm
16 always concerned about that.

17 Q Okay. Then with respect to this specific
18 question about being motivated by factors
19 involving monetary gain, is that something that
20 was within that inquiry of exaggerating?

21 A The interest in monetary gain is, of course, a
22 part of the whole domain of exaggeration. Karen
23 Collins is not exaggerating in my opinion.

24 Q So you don't feel she's motivated by monetary
25 gain?

1 A Well, she is suing, and people can be motivated
2 for monetary gain for reasons other than
3 exaggeration or those motives can well up out of
4 reasons other than exaggeration. For example, if
5 a person is actually damaged by someone else,
6 they could want compensation, they could be
7 motivated by money but not be exaggerating, so
8 again, two points.

9 Q Sure.

10 A She's not exaggerating. She may very well be
11 motivated by money, but it could be legitimate.

12 Q Do you have an opinion one way or the other
13 whether she is -- whether she has a legitimate
14 motivation for money?

15 MR. MEADOR: Objection, just for
16 the same reasons I stated before.

17 A Right. The fact that she filed a lawsuit makes
18 it clear that she's motivated by money. If she
19 were unmotivated by money, she wouldn't have
20 filed a lawsuit, it seems to me.

21 It is possible, I grant, that someone could
22 file a lawsuit asking for money and yet not be
23 motivated by it, but it's unlikely. My purpose
24 was to ask the question, is she justified in
25 suing this particular person. Is she justified

1 in blaming the accident? There my answer is no,
2 that I don't believe that she's justified in
3 blaming the accident.

4 Q And that gets into the ultimate opinion that you
5 rendered in your report that the accident's not
6 the cause of her depression, right?

7 A Correct.

8 Q All right. We'll get into that later. How would
9 you describe your private practice?

10 A It's one that specializes in the treatment of
11 anxiety and depression. It is, I think, a fairly
12 objectively oriented practice, one that has a
13 problem oriented focus, one that likes to cure
14 people as quickly as possible. It's a practice
15 that does not particularly like hospitalizations,
16 believing that many people can be treated without
17 going to the hospital, and I believe we have a
18 great respect for patients here.

19 We don't have a waiting list and we don't
20 have a waiting room, we like to say. If we're
21 late for a patient by over 10 minutes, we give
22 them \$10. We don't do that with attorneys
23 though. That was a joke.

24 We like to use behavioral techniques and
25 what are called cognitive techniques for those

1 two disorders of anxiety and depression because
2 experiments have shown them to be the most
3 effective.

4 Q All right. But in terms of giving it a
5 classification, you are -- your private practice
6 is a practice of clinical psychology?

7 A Yes.

8 Q Okay. Being involved -- well, being a teacher
9 and also on sabbatical and being involved in
10 research and I see your CV notes you're an
11 editor, how much time do you currently devote to
12 the active clinical practice of clinical
13 psychology? How much of your professional time?

14 A Right. I would say roughly half my time is
15 devoted to my practice and half of my time is
16 devoted to the university.

17 Q So 50 percent give or take on either side?

18 A Right.

19 Q What are your office hours for your private
20 practice?

21 A 8:30 till 6:00, Monday through Friday.

22 Q And during that five-day week, what -- how many
23 hours do you spend seeing patients and how many
24 hours do you spend involved -- do you do your
25 research here in your office?

1 A Yes, often, yeah.

2 Q So you're not -- you're not engaged in treating
3 patients all day on that 8:30 to 6:00 day?

4 A That's right.

5 Q But you are involved in -- spend hours here
6 researching as well?

7 A Yes.

8 Q Do you have an office at the university?

9 A Yes.

10 Q Do you do some research there?

11 A Yes, but I generally have consolidated a lot of
12 my activities here.

13 Q With how many patients do you currently engage in
14 a psychologist-patient relationship?

15 A I'm guessing 60.

16 Q In terms of the practice over the last five
17 years, is that high, low, is that the average at
18 any given time?

19 A I think it's low average in terms of number of
20 patients treated, yeah.

21 Q Is that because of your research or just because
22 of fluctuation?

23 A Because of my university stuff and also the legal
24 work which is what I call this deposition and so
25 on.

1 Q Of the 60 patients you're currently treating, how
2 many have you made a diagnosis of depression?

3 A I'm guessing about six or so.

4 Q On the first page of Exhibit 1 which is your CV,
5 under the affiliations topic there are several
6 hospitals, Mercy, Riverside, St. Charles, Flower,
7 St. Vincent?

8 A Uh-huh.

9 Q What's the nature of that affiliation?

10 A I'm on the adjunct staff or some call it the
11 auxiliary staff, some call it the courtesy staff.
12 Psychologists in general are -- don't have full
13 privileges at hospitals because we don't admit
14 many patients to hospitals.

15 There's one exception to that now and that's
16 Riverside where I can admit patients if I want.
17 I don't, never have, but I could if I wanted to.

18 Q All right. So with the exception of Riverside,
19 you don't have admitting privileges at any of the
20 hospitals listed here?

21 A Right, and no psychologist does.

22 Q That's what I was going to ask.

23 A Right.

24 Q Psychologists generally don't have admitting
25 privileges. Why at Riverside? What have they

1 done?

2 A They've just changed. There was a law passed
3 several years ago, a law that indicates that
4 psychologists are eligible to admit people to
5 hospitals. It didn't require hospitals to open
6 their doors to psychologists though.

7 Q Sure. Have you ever admitted a patient to a
8 hospital?

9 A No.

10 Q Are psychologists allowed to prescribe
11 medications?

12 A No.

13 Q Have you ever ordered an x-ray?

14 A No.

15 Q Have you ever interpreted an x-ray for purposes
16 of patient care?

17 A No.

18 Q Have you ever ordered that -- or prescribed
19 physical therapy for a patient?

20 A No.

21 Q Have you ever recommended that a patient take up
22 exercise as part of your treatment of them?

23 A Rarely, and with some caution because it has
24 about it a physical aspect that it could send me
25 a little bit over the border outside the bounds

1 of my expertise, but with caution, yes.

2 Q Have you ever treated a suicidal patient?

3 A Sure.

4 Q Have you ever lost a patient to suicide?

5 A No.

6 Q Are you currently involved in any editorial
7 consultant work?

8 A No, not now. I have no manuscripts that I'm
9 editing.

10 Q When was the last time you were involved in that
11 kind of work?

12 A About a year ago.

13 Q In your report at footnote 58 you said that you
14 are consulting editor of scholarly journals, and
15 on page 4 of your CV, it says Dr. Layne has been
16 a consultant to Addison-Wesley Publishing
17 Company, American Psychologist, Behavior Therapy,
18 Journal of Abnormal Psychology, Journal of
19 Consulting and Clinical Psychology, Journal of
20 Personality Assessment, Journal of Research in
21 Personality and Journal of Social and Clinical
22 Psychology. By identifying these or describing
23 these as scholarly journals, do you consider
24 these journals authoritative in the field of
25 clinical psychology?

1 A Yes.

2 Q You also have on your CV and stated in your
3 report on this case books and publications on
4 psychological assessment, and the first book is
5 by Christopher Layne, 1983, Psychological Torts
6 Manual. What is that? What is Psychological
7 Torts Manual?

8 A It's 1993.

9 Q What did I say, '83? I'm sorry, 1993.

10 A That's all right. It's a review of mental health
11 litigation, recent mental health litigation, and
12 from the late '80s and '90s mostly that has been
13 filtered through the eyes of a psychologist, me,
14 and a treatise at the beginning of the review of
15 these cases, one that tries to put them in some
16 perspective psychologically. So the two aspects
17 are commentary, psychological commentary, and
18 just a review of the cases themselves.

19 Q And that's -- you're the author of that book?

20 A Yeah.

21 Q Is it on sale anywhere?

22 A Yeah. You can get it from this office, for
23 example.

24 Q How much?

25 A \$39.

1 MR. MEADOR: Is that today only?

2 A What's that?

3 Q Is that a special thing? Okay. Can I get one of
4 these before I leave here today?

5 A Sure.

6 Q Thanks. I might have to run out to a money
7 machine. My wife robbed me before I left the
8 house this morning.

9 Now, you talked about mental health
10 litigation. How do you describe mental health
11 litigation?

12 A It is -- there are several types. The main one
13 is people claiming psychological damages for
14 accidents, terminations, harassment, that sort of
15 thing. There are a few others though, custody
16 evaluations for the purpose of finding out which
17 parent a child will stay with when there's a
18 divorce. That's psychological litigation in the
19 sense that generally the best interests of the
20 child come down to psychologically oriented
21 issues.

22 Then there's competence, competence to stand
23 trial, not guilty by reason of insanity
24 litigation. Involuntary commitment is another
25 myriad of psychological litigation as well.

1 Q Okay. The next book listed in 1992 is Know Your
2 Psychological Experts. What's that book about?

3 A That is a book that critiques bad psychological
4 evaluations and puts forth a model for good
5 psychological evaluations.

6 Q Is that in the -- let me just interrupt for a
7 minute if I can. Is that in the context of
8 personal injury litigation?

9 A Yes. That is pretty much focused on personal
10 injury litigation, although -- yes, although it
11 can -- the notions can be applied to the other
12 areas of litigation, personal injury is heavily
13 emphasized.

14 Q Can we also get a copy of that book today?

15 A Yeah.

16 Q For \$39?

17 A On sale. You may get -- sorry. You may get, of
18 course, a refund today because depending on how
19 long you stay, you know, you left us some money.
20 So if you want to deduct it out of that, that's
21 fine.

22 Q Well, I'll try and hurry along so I don't use up
23 my full three hours. The next book down there or
24 publication is 1990, The Science of Psychological
25 Damages, and was that an article that appeared in

1 the Ohio Association of Civil Trial Attorneys?

2 A Right.

3 Q Do you have a copy of that here, that article?

4 A I think so, although we have had trouble locating
5 that. The reason for that is that it actually
6 was a publication of a speech that I did which is
7 another way of saying it wasn't much.

8 Q Uh-huh.

9 A So we will look for that.

10 Q Was the speech given to that association?

11 A Yeah, yeah. I made a speech and they published
12 the transcript of it and so we had copies, but we
13 weren't very compulsive about keeping them
14 around. I'll check.

15 Q Okay. Let me just understand something about
16 this speech. Was it a continuing legal education
17 seminar?

18 A I don't know. It was about five years ago here
19 in Toledo. I don't even -- I rarely remember the
20 name of the organization. Some attorney asked me
21 to give a speech at a lawyer's organization.

22 Q Are you aware that the Ohio Association of Civil
23 Trial Attorneys is a group of attorneys primarily
24 comprised of defense lawyers or insurance defense
25 lawyers?

1 A Yes.

2 Q Okay. Let's talk about your work as an expert
3 witness in litigation. Obviously you've given a
4 deposition before.

5 A Yes.

6 Q Now, you said earlier in your testimony something
7 about legal work, that you describe what we're
8 doing here, depositions, as legal work. In the
9 field of personal injury litigation, are you
10 aware that there is a rule of civil procedure
11 that allows for an opposing party to a personal
12 injury case to have the -- a person examined by
13 an independent doctor called an independent
14 medical examination?

15 A Yes, that sounds familiar.

16 Q And just so we can use the same terminology and
17 understand each other, when I refer to a medical
18 examination in the questions to follow, I'm
19 referring to the type of examination you did on
20 Karen Collins, an examination of a plaintiff in a
21 personal injury case claiming they are injured,
22 and so when I ask you these questions, the number
23 of these you've done and so forth --

24 A Okay.

25 Q -- I'm asking about examining an injured or

1 allegedly injured plaintiff in an action.

2 A I understand.

3 Q Okay. Sometimes they're referred to as defense
4 medicals --

5 A Uh-huh.

6 Q -- or independent medical examinations, okay.
7 What percentage of your practice do you devote
8 to -- of your private practice do you devote to
9 legal work, doing medical examinations of
10 plaintiffs?

11 A About a third.

12 Q How many times in the last year have you given a
13 deposition in a legal case such as this, in a
14 medical examination?

15 A Say seven.

16 Q How about in the last five years? Can you give
17 us an evaluation of that?

18 A 30.

19 Q In all of these seven cases in the last year, did
20 you conduct an examination of an alleged --
21 allegedly injured victim, an examination similar
22 to the type given or done of Karen Collins?

23 A Yes, yes.

24 Q And the same with respect to the 30 in the last
25 five years?

1 A Yes.

2 Q How long have you been doing legal work like
3 this?

4 A Since about 1986.

5 Q Have you ever been retained by Tim McGrail or his
6 law firm of Kitchen, Deery & Barnhouse?

7 A No.

8 Q First time you've done any work for them?

9 A Correct.

10 Q Have you done any of this type of legal work for
11 any Cleveland law firms, any other Cleveland law
12 firms?

13 A Yes.

14 Q Can you tell me which ones?

15 A Gallagher Sharp.

16 Q Do you know the name of the attorney or
17 attorneys?

18 A Joe Papalardo, Pat Foy, a guy named Travis, a
19 fellow named Calderone. There may be one or two
20 others as well.

21 Q Okay. Any other law firms in Cleveland besides
22 Gallagher Sharp?

23 A Yeah. Rhoa, I think it's R-o-h-a.

24 Q Rhoa and Follen, uh-huh.

25 A Uh-huh.

1 Q Okay.

2 A That's another Cleveland firm.

3 Q Can you think of any others?

4 A I can't think of any -- I believe that there is
5 one more. I just don't remember the name of the
6 firm.

7 Q What about Toledo law firms?

8 A Yes. Examples are Eastman & Smith.

9 Q Do you have any cases currently open that involve
10 the plaintiff's firm of Williams, Marty Williams'
11 firm?

12 A That doesn't sound familiar, but as you can tell,
13 I have some difficulty remembering the names of
14 law firms and the names of the opposing law firms
15 as well. I just -- it's not something I keep in
16 my head very well.

17 Q How many legal cases do you have open at this
18 time?

19 A At various stages, I would say four or five.
20 Some of them may be a year old.

21 Q Have you given testimony in open court in the
22 last year?

23 A Yes.

24 Q Where, Lucas County, Cuyahoga County, Wood
25 County?

1 A In Akron. It was a -- an attorney for Gallagher
2 Sharp.

3 Q Do you remember the plaintiff's attorney's name?

4 A He was -- the name of the firm had three Greek
5 names involved with it.

6 Q Nukes, Perantinides & --

7 A No.

8 Q -- Nolan?

9 A No. His name was Cherpas.

10 Q What about in Lucas County? Have you given
11 testimony in court in Lucas County for trial?

12 A I have given testimony in Lucas County. The
13 question is when.

14 Q Within the last year?

15 A Probably so. I just don't recall.

16 Q All right. Do you advertise your services as an
17 expert for these legal type cases?

18 A No.

19 Q Have you ever testified in a case involving the
20 onset of depression after a motor vehicle
21 accident, similar to this case?

22 A I'm sure that I have.

23 Q Do you remember when the last one was?

24 A None -- no one case strikes me. It's just that
25 that's -- that is one of the claims that's made

1 after an auto accident. Let me think. I can
2 think of no specific case.

3 Q Do you -- have you ever testified on behalf of a
4 patient of yours --

5 A Yes.

6 Q -- who was a victim of an accident?

7 A I think so, yes. That is rarer, but I believe
8 that it has happened.

9 Q In all the legal work you do, what percentage of
10 your legal work is for defense lawyers and
11 involving examinations of victims that are not
12 your patients as opposed to testimony on behalf
13 of your patient who is a plaintiff? Do you
14 understand the question?

15 A Let me perhaps answer a different question that
16 might help you. In my legal work, about
17 two-thirds of my work is for defense, about
18 one-third for plaintiff. I often get plaintiff
19 cases that are not my cases but rather are sent
20 to me for essentially an evaluation by the
21 plaintiff's attorney.

22 Q Okay.

23 A It is much rarer for me to be an expert for a
24 patient.

25 Q Can you remember the names of any plaintiff's

1 attorneys that consulted you or sent their
2 patient or client to you for this type of work,
3 this type of legal work?

4 A One was Jim Schuller, I think that's
5 S-c-h-u-l-l-e-r, here in Toledo. I'm involved in
6 one even as we speak. Now, who is the attorney?
7 If you'll give me a second, I'll get that name.

8 Q Yeah. I want to use the restroom, get a cup of
9 coffee and you can get the name.

10 A That sounds great.

11 Q Is that fair?

12 A Okay.

13 (Recess taken.)

14 Q Let's talk about the issue of charges. My
15 secretary marked this up, but I'm going to ask
16 the court reporter to mark this as Exhibit 2.

17 (Plaintiffs' Exhibit **2** marked.)

18 MR. LANCIONE: Have you seen that,
19 Gene?

20 Q Doctor, let me hand you what's been marked as
21 Exhibit **2**. Would you identify that for the
22 record, please?

23 A A letter that I sent to you.

24 Q After we set up this deposition, you sent me that
25 letter for the purpose of establishing the

1 deposition date and confirming and also setting
2 forth your charge?

3 A Correct.

4 Q Okay. Is that your typical charge for a
5 deposition, \$200 an hour?

6 A Yes.

7 Q And do you always require a \$600 advance?

8 A Yes.

9 Q The last sentence of the first paragraph, and
10 this is just out of curiosity, I may charge you
11 \$100 if you cancel less than 24 hours before our
12 scheduled time. What are the circumstances that
13 you may and may not?

14 A That is hard to say. Generally we don't. If it
15 were a situation where, for example, there was
16 some other thing for me to do that became very
17 important and we got lots of pressure to cancel
18 the other thing and stick with this, you know, we
19 might charge it. I don't think we've ever done
20 it in the past.

21 Q Do you have a standard letter or form that sets
22 forth all your charges for all your legal work?
23 For example, I get .. for some experts in
24 malpractice cases, I get X amount for testimony,
25 X amount for records review, X amount for in

1 court testimony, X amount for traveling
2 out-of-state, that kind of stuff.

3 A Right, right.

4 Q Do you have something like that?

5 A We do -- when people ask us, we send them a
6 letter and the letter's not the same every time,
7 but close.

8 Q Have your charges for legal work changed at all
9 in the last year or have they been pretty
10 consistent?

11 A Consistent.

12 Q Do you have a different charge for record review?

13 A Yes.

14 Q What's that?

15 A \$100 an hour for my time. My time's at 100 an
16 hour, for anything else besides really testimony,
17 and then when others do records review, other
18 people in here, then it's at \$40 an hour.

19 a Is there a different charge for in court
20 testimony as opposed to video testimony?

21 A No. Testimony is at 200.

22 Q What about travel time? For example, you came to
23 Cleveland to examine Karen Collins.

24 A \$100 an hour.

25 Q Okay. Have you submitted a bill thus far to

1 Mr. McGrail for the time you've spent on this
2 case?

3 A Probably so, though I don't track those things.

4 Q Who tracks that, your staff?

5 A Yes.

6 Q Do you have that hourly -- do you have that
7 accumulation readily available now?

8 A I think so.

9 Q Would you ask someone to get that for us while we
10 continue?

11 A Yeah.

12 (Off the record.)

13 Q The charge during examinations is also \$100?

14 A That's right.

15 Q And this bill we're getting would be an
16 accumulation of everything up to today?

17 A Probably up till today, that's right.

18 Q Writing the report is \$100 an hour?

19 A Correct.

20 Q You do that yourself here at the computer?

21 A Yes.

22 Q Other than completing this deposition today and
23 coming to Cleveland on Thursday for your trial
24 testimony at 8:00 -- we're still on for that?

25 A Yes.

1 Q -- do you plan to do anything else with respect
2 to this case?

3 A No.

4 Q How much is your patient charge for one hour of
5 psychological services?

6 A \$90 an hour.

7 Q This issue recently came up in a significant
8 Supreme Court opinion, so I'm going to ask you
9 about it. Where does your income from legal work
10 go? Is it for personal use or is it directed
11 toward a charity or research foundation,
12 something along those lines?

13 MR. MEADOR: Objection.

14 A My income goes to myself, yeah.

15 Q All right. In this one case, there was a
16 question about the percentage of income an expert
17 derived from testifying as an expert in
18 malpractice cases, and he gave a figure and he
19 said, but it all goes to charity. It goes to a
20 research foundation.

21 A Uh-huh.

22 Q And there was a Supreme Court opinion about that.
23 Yours goes to yourself. It's personal use?

24 A Yeah. In turn, we, of course, do some charitable
25 giving, but there's no direct relationship

1 between, for example, this case and some charity.

2 Q Do you have a file that you have kept for this
3 case?

4 A Yes.

5 Q Can I take a look at it real quick?

6 A While you are looking, I wonder if I could get on
7 the record that I gave you the name of the
8 plaintiff's attorney.

9 Q Sure, good idea.

10 A Bonfiglio.

11 Q Mike Bonfiglio.

12 A Right. I had given you a slip of paper with that
13 name on it.

14 Q Sure.

15 MR. MEADOR: Is he out of
16 Cleveland or Toledo?

17 THE WITNESS: Toledo.

18 Q Connelly, Soutar & Jackson?

19 A Right.

20 (Discussion held off the record.)

21 MR. LANCIONE: Why don't we mark
22 this as Exhibit 3.

23 (Plaintiffs' Exhibit 3 marked.)

24 Q Doctor, I'm going to hand you what's been marked
25 as Exhibit 3 and ask you if you can identify that

1 for the record.

2 A My file on Karen Collins.

3 Q Just let me ask you something. You can hold it.
4 On this last portion, the last tab says not in
5 report.

6 A Right.

7 Q What does that mean? Why wasn't that --

8 A Sometimes we receive records after we've written
9 the report. I believe that was true in this
10 case, although I haven't had time to confirm
11 that. It's -- that's typically what happens. We
12 get records sometimes after a report is written,
13 get additional records, so I assume that's what
14 it is, but I'll have to double check to make sure
15 that this isn't a mistake.

16 Q Do you know whose records these are?

17 A They look like Physician Walborn's records.

18 Q Well, let's see. You marked Walborn, McCoy
19 physical therapy records?

20 A Yeah.

21 Q What about these right here, this last tab with
22 the post-it note?

23 A I've got that marked as Psychologist Martin.

24 Q And you understand that to be the psychologist
25 who conducted the neuropsychological evaluation?

1 A Right.

2 Q All right. Can I see that again real quick?
3 Under the tab identified as **LPS**, there's a letter
4 dated November 3rd, **1994** from Tim McGrail to
5 you --

6 A Uh-huh.

7 Q -- referring to a conversation with the firm's
8 paralegal, Pam. Concerning November 3rd, **1994**,
9 is that the first contact you had with
10 Mr. McGrail, or with his office, I mean?

11 A I believe so.

12 Q Do you know how he came about finding you?

13 A No.

14 Q What was the scope of the task he asked you to
15 perform for him?

16 A To evaluate her to -- for the purpose of
17 determining, or helping to determine what, if
18 any, effects the accident had on her mental
19 health.

20 Q Everything you were provided by Mr. McGrail is
21 contained in this three-ring binder, Exhibit 3?

22 A Yes.

23 Q Were you provided any facts about the case over
24 the phone or in other conversations with
25 Mr. McGrail other than what's contained in this

1 file?

2 A No.

3 MR. LANCIONE: Your report to us,
4 that we'll mark as Exhibit 4.

5 (Plaintiffs' Exhibit 4 marked.)

6 Q First of all, would you identify Exhibit 4 for
7 the record?

8 A Yes. The front page is actually not a part of
9 the report, but is just a fax cover sheet, so the
10 report really starts on page 2 of this set of
11 stapled documents, and beyond that, this is the
12 report that I wrote.

13 Q The first endnote says, Layne Psychological
14 Services began analyzing Ms. Collins' records
15 around November 8 and mas began -- what's that
16 supposed to mean?

17 A Those are the initials for Marcy Skirvin.

18 Q Oh, Marcy Skirvin, who typed the report, okay.
19 So that's when the records were received in this
20 office, November 8th, based on this note?

21 A Let me look again. Well, that's not necessarily
22 true. They probably were received days before
23 that. We began to review them on that day.

24 Q So that's the first work done on the case was
25 began on November 8th and it involved records

1 review?

2 A Correct.

3 Q And footnote 2 sets forth all the records you
4 reviewed?

5 A No. The -- it sets forth the major records. The
6 statement is the documents that I reviewed
7 included, so it's not exhaustive. There may be
8 some handwritten notes or something that are
9 there too.

10 Q So handwritten notes from what, the examination?

11 A No, that we received from other doctors.

12 Q All right.

13 A This is not an exhaustive list.

14 Q Do you know whether you received Robert Weiss'
15 records?

16 A I believe that we did.

17 Q Okay.

18 A But we got his letter of September 1st, 1994.

19 Q Okay.

20 A And I believe we also received some handwritten
21 records from him.

22 Q Okay. Good. Now, you examined Karen on November
23 16th, 1994, correct?

24 A That's right.

25 Q Eight days after you started reviewing the

1 records?

2 A That's right.

3 Q All right. Now, you came to Cleveland for that?

4 A Correct.

5 Q Is that correct? Why did you come to Cleveland
6 for that as opposed to have her come here?

7 A That's what I was asked to do, and I don't know
8 why.

9 Q Did you have a court appearance that day or were
10 you in Cleveland for another legal case other
11 than Karen Collins?

12 A I was in Akron the day before. That wasn't
13 relevant to it being scheduled in Cleveland, as I
14 recall, but --

15 Q What about on the 16th? Did you have any other
16 commitments in Cleveland other than the Karen
17 Collins examination?

18 A No, no.

19 Q What -- was there a letter that sets up this
20 examination in the file, or was that all done
21 over the phone?

22 A I'm not sure. I'm going to get some water.

23 Q Sure. Go ahead.

24 (Off the record.)

25 A I have just given you the bill for this case. At

1 least that's what I'm told by my secretary.

2 MR. LANCIONE: Okay. Why don't you
3 mark this as, I believe, 5.

4 (Plaintiffs' Exhibit 5 marked.)

5 Q Doctor, I'm going to hand you what's been marked
6 as Exhibit 5 and ask you to identify that for the
7 record.

8 A This is our billing format, and appears to be the
9 bill for this case, for the Karen Collins case,
10 sent to Tim McGrail.

11 Q And that bill is current up to today?

12 A Yes.

13 Q Okay. Now, that does not include the \$600 that I
14 have paid you, correct?

15 A Correct.

16 Q And that does not include whatever your billing
17 will be for the deposition on Thursday?

18 A Correct.

19 Q All right. Now, I turned to Exhibit 4, your file
20 on this, to a letter concerning --

21 A Yeah, I see it.

22 Q -- concerning -- I'm sorry, exhibit -- your
23 report's 4. That's 3?

24 A Exhibit 3.

25 Q 3, okay.

1 A Is the file.

2 Q The file. That concerns a letter setting up the
3 appointment from 9:00 to 4:00 p.m., 9:00 a.m. to
4 4:00 p.m.

5 A Yes.

6 Q And a written portion taken from 9:00 to 11:00
7 a.m.

8 A Yes.

9 Q And then a -- what was the other portion,
10 discussion?

11 A After the paper-pencil tasks essentially I then
12 interviewed the plaintiff, Karen Collins.

13 Q Is there time for lunch in there or do you work
14 straight through typically?

15 A That varies. Sometimes we break for lunch and
16 sometimes we don't.

17 Q All right. What time do you recall arriving at
18 Mr. Deery's office for this examination on the
19 16th?

20 A I recall being somewhat late, like, I think I was
21 there 12:30, maybe even 1:00.

22 Q Now, did she have the written portions to work on
23 in the morning in your absence? Were those
24 provided to his office?

25 A Yes.

1 Q Why were you late? You were supposed to be there
2 at 11:00. Do you know why you were late?

3 A I was testifying in the case in Akron that I told
4 you about earlier.

5 Q What kind of case was that?

6 A That was a -- the case involving the Greek
7 attorney whose name was Cherpas.

8 Q Do you know that case caption, case name?

9 A The plaintiff's name was Pamboukis.

10 Q Do you know the defendant's name, your client?

11 A The name of the plaintiff was Pamboukis. That's
12 the person who I evaluated.

13 Q Oh, that was the -- oh, I'm sorry.

14 A Her attorney's name was Cherpas. And so I had
15 testified the day before, and my testimony
16 continued over into the next day unexpectedly, so
17 I was a bit late.

18 Q Now, for your testimony in this case, we're
19 starting at 8:00 in the morning at Cleveland. Do
20 you also have a court appearance or an
21 arbitration this Thursday afternoon as well? Is
22 that why you're coming to Cleveland to testify?

23 A I think that I do. That sounds familiar, but I'm
24 not sure. I can check the calendar if you want
25 to know.

1 Q Yeah, just so we can make sure what we're talking
2 about.

3 A Do you want to do that?

4 Q Yeah.

5 (Off the record.)

6 A Yes. I have an arbitration hearing in Cleveland
7 this Thursday after I do your case.

8 Q What kind of case is that arbitration?

9 A It's another personal injury case. Beyond that I
10 don't recall the details of it.

11 Q Sounds like you're going to be busy between now
12 and Thursday getting ready for your two cases
13 on --

14 A That's probably right.

15 Q -- the same day.

16 A Yeah.

17 Q Did you check on your calendar whether, besides
18 this case and the case on Thursday, you have any
19 other appointments to do any legal work, any
20 depositions or any examinations this week?

21 A No, I didn't.

22 Q Okay. Do you know whether you have anything else
23 legally related this week besides this case and
24 the arbitration on Thursday?

25 A I don't think that I do. I think this is it.

1 Q Okay. How long did you spend with Karen once you
2 got there at around 12:30 or 1:00?

3 A I believe that I spent about four or five hours.
4 It will be on the bill, and I don't recall
5 specifically, four or five hours. Boy, I don't
6 know the codes, but it should be a -- okay, here
7 we go, diagnostic interview per person, that
8 implies about two and three quarter hours --

9 Q Okay.

10 A -- I think -- I know. The reason for that is
11 that I also gave her some face-to-face tests. I
12 gave her the Bender which is a face-to-face
13 administered test and the Slosson which is
14 another face-to-face test, so the amount of time
15 I spent in front of her is about four hours,
16 maybe five, but of that four or five hours, two
17 and three quarter hours were involved in
18 exclusively talking with her and asking her
19 questions.

20 Q Okay.

21 A Hence the interview time.

22 Q Sure. Did you make any notes other than test
23 results or any notes from your conversation for
24 that?

25 A The answer to that is no. The reason is that, as

1 she will tell you, I did my work on a laptop
2 computer, and the way laptop computers work is
3 that in our case, I enter what she tells me into
4 the report itself. Soon after I see her, I
5 smooth out those pieces of information into the
6 report that you have.

7 Q SO --

8 A So while it's not exactly -- while I can't say
9 that the report that I have consists of
10 contemporaneous notes, the -- it's pretty close
11 to it. They are contemporaneous notes edited
12 later for clarity. But in the process, the
13 computer basically throws out the preceding
14 drafts and they're -- they don't exist anymore.

15 Q What did your evaluation consist of, history
16 and -- I mean, tell me what the aspects of it
17 were.

18 A There are three components to this evaluation,
19 and all others really, and they are getting an
20 accurate history and I get that through records
21 and what she tells me, and then how she acts in
22 front of me, the behavior observations, and then
23 finally her psychological testing.

24 Within the psychological testing I
25 administered, I think, four different tests, and

1 they are the Slosson Intelligence Test, a Bender
2 Motor Gestalt Test, an MMPI which is a
3 personality test, and a Personality Assessment
4 Inventory, so those were the four tests.

5 Q Do these -- do any one of these four tests
6 duplicate any test that Dr. Martin gave her?

7 A I don't think so, although I'm -- I'm thinking he
8 may have given an MMPI.

9 Q Yeah. You made a reference to that in your
10 footnotes.

11 A Okay. Yeah, I believe that I did, and my problem
12 is that I didn't have his raw data so I thought I
13 better not emphasize it, but I believe he also
14 administered an MMPI, yes, the MMPI-2.

15 Q 2?

16 A Footnote 49.

17 Q Right. Is there a difference between MMPI-2 and
18 MMPI?

19 A Yeah, the MMPI-1 is 40 years old, and the MMPI-2
20 was published in 1989. The -- there's some
21 debate about the use of the newer version over
22 the older version, and people like me, and I
23 remain in the majority, continue to adhere to the
24 MMPI-1 because there's so much more research to
25 guide us in the interpretation of the MMPI-1.

1 Q It's time tested?

2 A What's that? Yeah.

3 Q Time tested.

4 A The MMPI-2 is --

5 Q Let me just ask you this. You have Martin's
6 opinion on his MMPI results. He wrote in his
7 report that the profile was entirely consistent
8 with Mrs. Collins' history of severe to moderate
9 depression with attending anxiety, and how do you
10 pronounce --

11 A Anhedonia.

12 Q Anhedonia, what's that mean?

13 A It means she doesn't get any pleasure out of
14 anything.

15 Q -- and low energy, reduced ability to cope with
16 additional stressors, symptoms of post-traumatic
17 stress, intrusion ideation, hyper arousability.
18 What were -- was your interpretation of the MMPI
19 that you gave Karen consistent with Martin's
20 interpretation of the results of the MMPI-2?

21 A I believe that they are. I think that they're
22 fairly consistent. The differences are trivial.

23 Q All right.

24 A Again, the differences between my interpretation
25 and what I read about his interpretation in his

1 report are -- I have no suspicions about his
2 interpretation.

3 Q With respect to the history you took from the
4 patient, any contemporaneous notes would be
5 reduced to this exam or incorporated within this
6 exam and they don't exist anywhere else?

7 A Correct.

8 Q Are all her test results included within that
9 medical records binder, number 3?

10 A Yes.

11 Q You can hold that. I want to flip through
12 something. Turning to a page with some pencil
13 drawings on it under the tab marked LPS, what's
14 this, these markings in pencil?

15 A That's called her Bender, B-e-n-d-e-r, Bender
16 Motor Gestalt.

17 Q What's -- how is that administered?

18 A The person is given nine nonsensical figures and
19 is asked to make a copy of them, a drawing copy
20 of them using a pencil. It has been shown that
21 certain kinds of neurological problems will
22 impair a person's ability to copy nonsensical
23 drawings, so it's a simple quick assessment of at
24 least some kinds of brain damage.

25 Q How did she do on the Bender?

1 A Fine. No errors.

2 Q Okay. So that what was your impression from her
3 performance on the Bender?

4 A That it showed no neurological problems.

5 Q Okay. And the Slosson -- I can't even read my
6 own writing, Slosson what?

7 A It's a Slosson Intelligence Test.

8 Q Intelligence?

9 A Right.

10 Q This is it right here?

11 A Yes.

12 Q All right. Now, questions 1 through 108, those
13 appear not to be answered; is that correct?

14 A Correct.

15 Q Why is that?

16 A The method for administration is that you -- the
17 questions get harder and harder beginning at the
18 very easy question number 1 and ending at the
19 very difficult question number 187. Examiner
20 tries to pick a spot where the person is sort of
21 in the middle where she can answer some but not
22 others. Then what the examiner does is to back
23 up until the person passes 10 in a row. At that
24 point you have their -- you assume that they're
25 going to answer all the rest of them correctly.

1 Q Okay.

2 A Then it's a matter of going forward until she
3 misses 10 in row, and you stop, so you notice
4 questions 181 through 187 are not administered.

5 Q So checks mean correct; zeros mean wrong?

6 A Correct.

7 Q Are the questions that you asked her contained in
8 your file?

9 A No. Those are in a Slosson administration
10 booklet.

11 Q Can I get a copy of that --

12 A Yeah.

13 Q -- before I leave? All right. What kind of
14 questions are on the Slosson test, math questions
15 or --

16 A There are a wide range of primarily verbal
17 questions where verbal is loosely defined to mean
18 mathematical, knowledge of information,
19 short-term memory.

20 Q Is this a test where they purposely repeat the
21 same questions?

22 A No.

23 Q Is there a test like that where you purposely
24 repeat some questions?

25 A The MMPI repeats some questions. That's a

1 personality test and it repeats some questions.

2 Q The purpose of repeating some questions is to --

3 A Actually it's not as sneaky as everybody thinks.

4 The purpose was that back before we had

5 sophisticated computers, it was still found that

6 some questions were great predictors, they were

7 outstanding predictors of people's future

8 problems or current problems, and so they would

9 put the question in twice just to -- assuming

10 that the person would answer it consistently both

11 times, just to load up the importance of that

12 question. It wasn't -- the repetition wasn't

13 there to trick people or something, so that's why

14 that was done.

15 Q Did you give Karen a complete exam that you

16 ordinarily give all other people in this category

17 of legal work?

18 A I think that's fair. I mean, everybody's

19 different. I threw in two intellectually

20 oriented tests because there had been a vague

21 question of brain damage, and I wanted to nail

22 that down.

23 Q The Slosson and the Bender?

24 A Correct, yes.

25 Q So the only other two tests you administered were

1 the MMPI and the Personality Assessment
2 Inventory?

3 A Correct.

4 Q Did you skip any portion of the test or certain
5 questions of any one test because of time
6 constraints?

7 A No.

8 Q Okay. On the math portion or on math questions
9 is there any requirement to repeat questions?
10 Are any of the questions repeated in the math
11 portion?

12 A No.

13 Q Now, for this case, when you testify Thursday
14 you'll have seen the patient one time?

15 A Correct.

16 Q For the amount of time previously stated?

17 A Yeah.

18 Q She's not a patient of yours?

19 A That's correct, in the sense of --

20 Q Treatment.

21 A -- I'm not treating her. That's sort of
22 ambiguous as to whether she's a patient whom I'm
23 evaluating.

24 Q Right. Well, is there some kind of a -- like,
25 doctors have the Hippocratic oath. Is there a

1 similar thing with psychologists?

2 A I mean, I think that's -- no, we don't have an
3 oath. But we're supposed to do things in the
4 best interests of the patient.

5 Q And your examination of her was a little over
6 three years after her motor vehicle accident?

7 A Right.

8 Q And you have no plans in the future to treat her?

9 A Correct.

10 Q All right. I'm going to hand you Exhibit 4
11 because we're going -- would you rather go
12 through this or the one in your book?

13 A The one in my book is fine.

14 Q All right. I have my copy. Now, on the front
15 fax transmission page, there's an LPS and that
16 stands for Layne Psychological Services?

17 A That's correct.

18 Q And that's just an acronym or abbreviation of
19 your professional corporation?

20 A Correct.

21 Q Is that an Ohio corporation?

22 A Yes.

23 Q Did you incorporate in 1980 or whenever you said,
24 '84?

25 A We were incorporated around 1988.

1 Q '88. Then there's a cover page for the report of
2 confidential psychological evaluation of
3 Ms. Karen Collins.

4 A Right.

5 Q Okay. Then there's a contents page?

6 A Yes.

7 Q And then there's a, I guess it must be a
8 continuation of a contents page, a visual aids
9 and summary?

10 A Yes.

11 Q Okay. The summary, what's the purpose of setting
12 forth that summary there?

13 A It is no more or less than the purpose of any
14 summary, namely to give the person an overview or
15 road map of what they're about to read.

16 Q All right. First statement in the summary is,
17 parental rejection predisposed Ms. Collins to
18 depression.

19 A Yes.

20 Q What does that mean? Does a predisposition --
21 what does that mean in clinical psychology?

22 A It raises the probability that the person will
23 one day be depressed without causing the
24 depression immediately.

25 Q Meaning the person can be enjoying a completely

1 normal mentally healthy life, but because she has
2 some predisposing factors that there could be
3 events that could make this -- make depression
4 come out in her or she can get depression? I
5 mean how does that happen? Can you get
6 depression --

7 A Yes.

8 Q -- like a cough or a virus or something?

9 A In -- I mean the statement that it was possible
10 that when she became an adult she would not be
11 depressed. She's only predisposed. She needs
12 another cause in adulthood to become depressed.
13 The predisposer is not sufficient.

14 Q So there are a lot of people walking around today
15 whose parents rejected them and they're not
16 depressed?

17 A Correct, but they are predisposed.

18 Q Predisposed?

19 A If the rejection were of this caliber.

20 Q And it's possible that Karen Collins could have
21 lived her life through her normal life expectancy
22 and never become depressed?

23 A That's correct.

24 Q Just because she was predisposed didn't mean
25 before she became depressed, the depression we

1 know about, that she suffered any mental illness?

2 A Correct.

3 Q The next sentence, then, she endured job and
4 health problems, including a hysterectomy. Why
5 do you describe the job situation, her job
6 situation, as a problem? What was problematic
7 about them for Karen?

8 A As you'll notice in the report, the -- when she
9 began to work, she worked as a secretary for 11
10 years but then she was laid off. The layoff was
11 one minor problem.

12 Q Okay. Why do you interpret that as a problem?
13 Was there something she said that upset her or
14 was a problem to her or it caused financial
15 hardship? I mean what -- people get laid off.
16 In fact, the first -- footnote 12, Ms. Collins'
17 jobs before accident, date and job and why leave?

18 A Yes.

19 Q '72 to '81 secretary, quit, got married and drive
20 too long to work, and then 1981 to '83,
21 secretary, then it says laid off. Is that the
22 problem you're referring to?

23 A Yes. Well, that's one of them, yeah.

24 Q All right. Let me see something in your notes
25 here. I saw something. Maybe **it's** closer up

1 here. Yeah, employer and duties, company
2 cut-backs, laid off. These are your notes or
3 hers?

4 A Those are hers.

5 Q She filled that out?

6 A That's correct.

7 Q Now, did she say anything like -- did you ask
8 her, did that layoff cause you to become upset or
9 was it a financial hardship? I just don't
10 understand how you can say it's a problem without
11 hearing from her that it was a problem. I mean,
12 a layoff may or may not be a problem with
13 somebody, and how can you define it as a problem
14 unless she said it was a problem to her?

15 A Well, two tacks on that. First is I guess the
16 common sense point and that is nobody wants to be
17 laid off. I believe that's a fair statement.
18 Layoffs are generally not regarded as neutral
19 events. People are generally disappointed when
20 they are -- or bothered when they're laid off.

21 Secondly, I believe that I briefly touched
22 on that issue with her in the course of going
23 over the form that she had filled out. But in
24 the -- as I recall, in going over it, it was a
25 very brief -- I just very briefly touched on it.

1 I said that must have been a lousy situation.

2 She said, yeah, well, and went on.

3 Q Okay. You didn't go into anything deeper than
4 just a lousy situation?

5 A Right, right, and her acknowledging that.

6 Q So you don't know if she became depressed over
7 that, do you?

8 A No, and I'm not indicating that that layoff
9 caused her to become depressed.

10 Q You don't know whether that caused a financial
11 hardship, that '83 layoff?

12 A While I don't know that, again, I sort of think
13 common sense is the rule here. We're back to the
14 notion that if you had a room full of laid off
15 people and you asked, is there anybody overjoyed
16 by this, is there anyone that feels neutral about
17 this, you just don't care one way or the another,
18 you wouldn't have a whole lot of hands raised in
19 a room full of laid off people.

20 Q Well, aren't you looking for a response in your
21 patient rather than speculating about whether
22 she's found it problematic or felt that her
23 layoff was problematic? It seems to me common
24 sense approach is pure speculation, where if you
25 ask a person directly, was it a problem, was it a

1 hardship, did you become upset, did it cause
2 problems with your husband, did you have to go on
3 Unemployment, things like that, that would seem
4 to me to be more indicative of whether it was a
5 problem as opposed to speculating about common
6 sense.

7 MR. MEADOR: Objection to, John,
8 your characterization and your problem
9 with using a common sense approach.

10 MR. LANCIONE: Okay.

11 A Yeah. I touched on it with her, and again I
12 would maintain that it is something I checked
13 with her about.

14 Q And then the last one, own import business, deal
15 with buyers' reps, sold goods wholesale and
16 retail, okay, product became too common at end,
17 unable to deal with people anymore. Okay. And
18 that was 1992?

19 A Right.

20 Q Now, 1992 is after the onset of her depression,
21 correct?

22 A I believe so, yes.

23 Q Is inability to deal with people anymore a
24 manifestation or a common symptom you find in
25 depressed people?

1 A It can be, yes.

2 Q Can you state whether her depression at all
3 contributed to her not continuing with her import
4 good business?

5 A That's ambiguous. As she says on her form,
6 the -- she stopped her import business for two
7 reasons. One is the craft that she was selling
8 became commonplace. That wasn't caused by the
9 accident. The second reason that she mentions is
10 that she can't deal with people anymore. That
11 probably came from her depression.

12 Q Okay. Then you also said health problems,
13 including a hysterectomy.

14 A Yes.

15 Q Same question with respect to health problems.
16 Why do you define hysterectomy as a problem?
17 What about it was problematic for Karen?

18 A Well, we have to start again with the -- our
19 knowledge of hysterectomies. It is clear from
20 the opinions of experts in this field that
21 hysterectomies are nearly universally stressful
22 for people, for women, for several reasons, one
23 of which is purely psychological.

24 Those psychological reasons involve the idea
25 of aging. It's a marker for advancing age. It's

1 also the end of one's ability to bear children,
2 and so that's another psychologically oriented
3 problem with hysterectomies.

4 Q Well, did you ask Karen, was this a problem for
5 you?

6 A Yes.

7 Q Were you upset about the hysterectomy?

8 A Yes. We talked about that fairly extensively.
9 She says that it didn't bother her at all.

10 Q And is -- on the same -- in the same sense that
11 it's common sense that what the literature
12 suggests, isn't it also common sense that if
13 someone endures a lifetime of painful periods and
14 heavy bleeding and when someone has a
15 hysterectomy and that pain and discomfort and
16 heavy bleeding is gone, common sense says that
17 that might cause someone to feel relief over --
18 that a hysterectomy might bring relief to
19 somebody and withdraw an additional stressor that
20 is involved in someone's life?

21 A Yes. It could also, however, be a mixed
22 blessing, meaning that it -- those are the
23 benefits, that there would also be some
24 liabilities.

25 Q Have you ever treated a patient who became

1 depressed after a hysterectomy?

2 A I believe so, yeah.

3 Q How many patients have you treated who became
4 depressed after a hysterectomy?

5 A Oh, I would guess 15 or so.

6 Q When was the last time you treated a patient who
7 became depressed after a hysterectomy?

8 A I have one in treatment now who's in marital
9 counseling. This is a person who had
10 hysterectomy several years ago and continues to
11 refuse to take hormone replacement therapy. I'm
12 not really quite sure why, but she does, and
13 meanwhile her mood is a lot worse than it used to
14 be.

15 Q In these 15 patients is the sole cause of the
16 depression hysterectomy or are there additional
17 related stressors that you believe all
18 contributed to causing onset of depression?

19 A They're probably related .. there are certainly
20 related problems with the marriage, particularly
21 now. I'm still trying to tease apart whether the
22 real initiator of the problem though was the
23 hysterectomy.

24 Q Okay. Now, in the body of your report on page 2,
25 you refer to medical and psychiatric experts

1 caution that hysterectomies can cause negative
2 mental reactions, including anxiety, fatigue,
3 tension, emotional lability, irritability,
4 dizziness, depression and insomnia, especially in
5 women suffering from low self-esteem and low
6 life-satisfaction.

7 Then there's footnote 10, and when we turn
8 to footnote 10 there's a statement, psychiatrists
9 wrote, and then there's a big quote there and it
10 says page 1173, Kaplan and Sadock.

11 A Yes.

12 Q Now, in writing this report, did you have to go
13 look up that quote, or --

14 A Yes.

15 Q -- is that something you had on your disk?

16 A No. I had to go look that up.

17 Q So before making this statement, did you have to
18 actually conduct research to figure out whether
19 there was literature out there that stated that
20 there are psychiatric or psychological effects of
21 a hysterectomy?

22 A No. I knew that there was literature out there.
23 I wasn't quite sure where. So it was a problem
24 of rekindling my memory of exactly where I had
25 seen that stuff, and this is one of actually

1 other many sources that deal with the rough
2 psychological side effects of hysterectomies.

3 Q Okay. In the summary then you state, after a
4 benign accident -- what was benign about the
5 accident? Why do you define it as benign?

6 A It is involved in telling the story of the
7 accident, and so let me do it in summary fashion,
8 and then we can go back and maybe amplify. They
9 were rear-ended from a car going about 25 miles
10 an hour.

11 Q Just let me stop you for a minute, please,
12 Doctor. You're on page 3 of the report?

13 A Yes.

14 Q Section entitled your accident -- or Her
15 Accident?

16 A Yes.

17 Q All right.

18 A All right. It was her behavior. She was wearing
19 her seat belt, had a headrest. Her behavior
20 after the accident, it seems to me, is the key to
21 calling the accident benign, and in sum it is the
22 story of a person who gets out of the car and
23 checks on various things that, at least from my
24 perspective, are not life-threatening issues.

25 The first thing she did was to leave the

1 car, go over and berate the person who rear-ended
2 her. Then she walked back to the car, checked on
3 her husband again, then she decided that she
4 needed to cancel a dinner engagement for that
5 night. So she went over to a house somewhere and
6 called her mother and said, we're not coming to
7 dinner tonight. We've had an accident.

8 Again, I want to emphasize there's something
9 about checking your social calendar, yelling at
10 the offender, that strikes me as not the behavior
11 of somebody whose life, physical or mental, has
12 been devastated.

13 Q Let me stop you for a minute. Why do you use the
14 term berate? Why do you define what she said to
15 the driver of the other car as a beratement?

16 A Those are quotes from her, and I think if --

17 Q Wait a minute. 'What's the matter with you?
18 Didn't you see the turn signal?' That's her
19 quote, right?

20 A Correct.

21 Q Why do you define that as berating?

22 A The way that she told me she told these people, I
23 think her words were that, "I went over to them
24 and yelled at them."

25 Q There're more than two people or more than one

1 person?

2 A No. I may have that wrong. She went over and
3 yelled to the driver.

4 Q All right.

5 A Yeah. Okay, I believe that -- well, I'm sure
6 that it is her statement to me that these things
7 were not said in a cool, calm way.

8 Q All right.

9 A Getting back, we have her berating the driver,
10 making a call to adjust her social calendar, and
11 then coming back, and then as the ambulance
12 people were putting her husband in the ambulance,
13 she decided that her dogs were getting restless
14 and needed to have some space to run around, so
15 she decided -- she got worried about her dogs and
16 decided to take them home to let them out to run.

17 And so she drove her car off the premises.
18 When she got home she placed another phone call
19 then went to the hospital to check on her
20 husband, not for herself but to check on her
21 husband. And so I left out that the very first
22 impulse that she had once the accident occurred
23 was to check on her dogs. That was the very
24 first thing she did. Again, in total, I would
25 argue that that's not the behavior of somebody

1 who's been physically devastated or mentally
2 shocked.

3 Q Let me ask you something. Do you think it's
4 reasonable for someone who is on their way to
5 have dinner with their mother when she knows
6 they're not going to be able to make the dinner
7 engagement to call ahead and say, hey, we're not
8 going to make it. That's reasonable, isn't it?

9 A Well, let me rephrase it. Of course it's
10 reasonable as stated. It is not reasonable in
11 the context of somebody who's arguing that her
12 life has been ruined by an accident or that her
13 life has been significantly damaged by an
14 accident.

15 Q Would you expect -- first of all, you would agree
16 that someone that has a physical injury like a
17 car accident can cause the onset of depression
18 where someone is predisposed; would you agree
19 with that generally?

20 A It can happen, yeah.

21 Q Would you expect -- strike that. Do you have any
22 patients or have you treated anybody or given the
23 opinion that someone's depression was a direct
24 and proximate result of a motor vehicle accident
25 or other bodily injury?

1 A I believe -- I believe so.

2 Q Okay. In those -- first of all, would you expect
3 that someone who was rear-ended, would you expect
4 them to immediately become depressed even before
5 undoing their seat belt or getting out of the
6 car?

7 A No.

8 Q That the symptoms of depression would have an
9 immediate onset?

10 A Not the symptoms of depression, no.

11 Q All right. In the cases in which you've
12 testified that you believed, it was your
13 professional opinion that depression was brought
14 on by a motor vehicle accident or other physical
15 injuries, did the patients manifest the
16 depression immediately after the impact or the
17 bodily injury or did it take time for the
18 depression to come on?

19 A It took time because what happens is uniformly
20 the person shows lasting physical damage. The
21 physical damage in turn becomes a depressing
22 event, so what I'm looking for in this case is
23 lasting physical damage.

24 Q Okay.

25 A Such people having been afflicted by lasting

1 physical damage don't make social calls
2 immediately after the accident. They are in fact
3 hurt, badly hurt.

4 Q We'll get into that. On page 1 of the report,
5 under the section entitled Roots of Depression,
6 the first sentence is, Ms. Collins suffered
7 several stressors which may or may not have been
8 sufficient to produce a mental depression, and
9 you talk about, one, parental rejection; two,
10 gynecological problems; three, hysterectomy four
11 months before, and, four, job problems.

12 A Okay.

13 Q And then five, I guess her accident is a whole
14 different topic?

15 A Correct.

16 Q All right. So am I correct in stating that you
17 do not include the motor vehicle accident as one
18 of the several stressors in that first sentence
19 on page 1 that may or may not have been
20 sufficient to produce a mental depression?

21 A That's not exactly correct. This is all under
22 the heading of Roots of Depression, that is to
23 say the predisposers and the other things that
24 precede the accident that may or may not have
25 been sufficient to cause it, yeah.

1 Q All right. So parental rejection is one of the
2 predisposers?

3 A Yes.

4 Q Gynecological problems you feel is one of the
5 predisposers?

6 A That, no. The parental rejection is a
7 predisposer. The gynecological problems in
8 general could be sufficient to cause a
9 depression, but I wouldn't call them
10 predisposers. They would be actuators, triggers.
11 Same thing for the hysterectomy and the job
12 problems. So we have one predisposer and three
13 traumatic events or stressful events, I should
14 say.

15 Q So the gynecological problems, the hysterectomy
16 and the job problems are potential actuators?

17 A Yes.

18 Q All of those happened before the accident?

19 A Correct.

20 Q And is there any history of depression in this
21 woman before September 23rd, 1991?

22 A None that I know of.

23 Q Do you think that if there was a history of
24 depression that you'd know about it in the case
25 where depression is the injury being claimed?

1 A That is generally true, yes.

2 Q Okay. Now, under the section entitled Parental
3 Rejection, the last sentence says, perhaps as a
4 consequence, Ms. Collins had no children. She
5 told me, "I decided I wanted **dogs**."

6 What from your interview with her makes you
7 make that statement, perhaps as a consequence of
8 parental rejection she had no children? Did she
9 say, because I had such a horrible childhood I
10 didn't want kids, or because of the way my mother
11 treated me, I didn't want kids? Did she make
12 that kind of statement to you?

13 A No. I don't recall her making a statement like
14 that.

15 Q Do any of the medical records contain any
16 evidence that she did want kids?

17 A None that I can recall, no. She generally says
18 that she did not want kids, and I'm sure that she
19 told me that.

20 Q All right. So based on the fact that there's no
21 history of depression before September 23rd,
22 1991, say to a reasonable degree of psychological
23 certainty that Mrs. Collins' painful periods, her
24 gynecological problems did not cause the onset of
25 depression before September 23rd, 1991?

1 A That's .. the information that we have at hand
2 suggests that, that's right.

3 Q Besides depression, do any of the medical records
4 that you have indicate any unusual mental
5 reaction to any of her health problems short of
6 depression?

7 MR. MEADOR: What was that
8 question again? I'm sorry.

9 Q Do any of the documents that he has in his file,
10 any of the medical records, indicate that Karen
11 Collins showed an unusual mental reaction to her
12 health problems short of depression? You used
13 the term odd in a couple places in your report,
14 any odd mental reactions or unusual mental
15 reactions?

16 A No. I don't recall any records showing that she
17 was depressed by her gynecological problems, for
18 example.

19 Q Okay.

20 A Yeah, I recall no such records.

21 Q Other than her hysterectomy .. strike that. If a
22 person .. if a woman who had a hysterectomy and
23 was predisposed to depression was going to get
24 depression from a hysterectomy, when would you
25 expect the onset of depression to occur following

1 the hysterectomy?

2 A Within months.

3 Q One month?

4 A Months, plural.

5 Q Months?

6 A Yeah.

7 Q She had the hysterectomy in April of '91?

8 A I believe that's correct.

9 Q Okay. And between April of 1991 and September
10 23rd of 1991, approximately five months after the
11 hysterectomy --

12 A Correct.

13 Q -- there's no onset of depression; is that
14 correct?

15 A I have seen no records to indicate an onset of
16 depression during that five-month period.

17 Q When you say -- getting back to that statement
18 about medical and psychiatric experts caution a
19 hysterectomy can cause negative mental reactions
20 including depression, is that something you
21 learned in your schooling or your education,
22 other education and training?

23 A Yes.

24 Q Have you ever -- strike that. Besides the
25 research you did for this quote on the

1 hysterectomy on footnote 10, did you do any other
2 research, medical research for this report to
3 this evaluation?

4 A Yes. In terms of pinning down what I had in my
5 head, what I had been trained to do, again, an
6 overview statement, I like to not only use my
7 training but to buttress it with the opinions of
8 others, particularly in medical areas where I'm
9 on less solid ground. Well, having said that as
10 a prelude, I did some research on drug side
11 effects.

12 Q In the Physicians' Desk Reference?

13 A Yes, and a few other references involving drugs.

14 Q Well, the problem list -- no, that's a medical
15 record. Footnote 22, is that the other source?

16 A Yeah. That is -- well, that's one of the other
17 sources dealing with drug side effects, that's
18 correct, yeah, there are two others there, as I
19 recall.

20 Q PDR?

21 A There's the PDR, there's Psychiatric News, and
22 then there's an article by Michelson and
23 Marchione.

24 Q I see, okay. Now, am I interpreting your report
25 correctly that the hysterectomy alone did not

1 actuate the onset of depression?

2 A That -- there are no records to support that
3 statement. This is a place where I'm -- I feel
4 quite ambiguous. Here we have an event that is
5 often targeted by experts as a cause of
6 depression, yet there is no written evidence that
7 it caused her depression, so I'm left kind of in
8 limbo.

9 Q So you did not formulate an opinion to a
10 reasonable degree of psychological certainty that
11 the hysterectomy alone actuated the onset of
12 depression?

13 A That's correct. I did not form such an opinion.

14 Q You feel that's a possibility, but it's not a
15 probability, right?

16 A Correct.

17 Q All right.

18 A Yeah.

19 Q Now, the job problems is another potential
20 actuator of depression?

21 A Correct.

22 Q Based on her predisposition of parental
23 rejection?

24 A Yes.

25 Q And it appears from her records that between 1972

1 and 1992 she enjoyed continuous employment. Laid
2 off but got right back into it in '83?

3 A That is ambiguous. She lists herself sometimes
4 as, occupation housewife.

5 Q That was in the medical records in 1991, right?

6 A Okay, yeah.

7 Q Is that correct?

8 A Correct.

9 Q Emergency room record?

10 A Yes, right. And so --

11 Q So that was after the accident, '91, September?

12 A Yeah. I thought your question was has she been
13 continuously employed for --

14 Q Well, let's look at footnote 12, Mrs. Collins'
15 jobs before accident, from '72 to '81.

16 A Right.

17 Q Nine years approximately she was a secretary.
18 Then from '81 to '83 she was also a secretary?

19 A Right.

20 Q Then from right after that, '84 to '92, import
21 business?

22 A Yes.

23 Q So for approximately 20 years she was gainfully
24 employed during all or most of those years?

25 A Yes, with --

1 Q Based on history?

2 A Well, again, I would say that she was gainfully
3 employed clearly between 1972 and 1983. If she
4 defines her craft business as a, I don't know, a
5 hobby or an avocation with her primary employment
6 being that of homemaker, then I couldn't really
7 agree with that, that she was employed from 1984
8 to 1992. All I'm saying is that she seemed
9 somewhat ambiguous about whether that was
10 employment.

11 Q You said she worked between zero and 65 hours a
12 week?

13 A Right. It sounds like employment to me. I will
14 grant you that.

15 Q Okay. It sounds like a pretty intense schedule,
16 doesn't it, 65 hours a week?

17 A Zero to 65 hours a week sounds often intense,
18 sometimes quite relaxing, for example, when the
19 zero -- when the hours are zero.

20 Q Now, a person who's predisposed to depression who
21 can work a 65-hour week, does that demonstrate to
22 you an ability to handle additional stressors in
23 life?

24 A Yes. A work week of 65 hours suggests ability to
25 handle psychological stressors.

1 Q Okay. And we also don't -- well, strike that.
2 Do you have an opinion based on a reasonable
3 degree of medical -- or reasonable degree of
4 psychological probability or psychological
5 certainty that her job problems, what you
6 describe as job problems, were a direct and
7 proximate actuator or cause of her -- of the
8 onset of her depression?

9 A No, I don't have an opinion with respect to that.

10 Q Okay. Again, with respect to the job problems,
11 it's a possibility, not a probability?

12 A Correct.

13 Q On page 3 in the first paragraph under job
14 problems, she listed herself as a homemaker, and
15 that's under medical records, that's footnote 13,
16 that's from the Southwest General Hospital
17 Emergency Room records on the day of the
18 accident?

19 A Did you say this was on page 3?

20 Q Page 3, first paragraph, very top.

21 A I see, okay.

22 Q And there's footnote 13.

23 A Uh-huh.

24 Q Footnote 13 references a Southwest General
25 Hospital --

1 A Yes.

2 Q -- record on the day of the accident?

3 A Yes.

4 Q Okay. And then later her counselor noted that
5 she suffered a burnout, and that is Lee Sweeney's
6 letter of 9-25 -- or, I'm sorry, 10-25-94?

7 A Correct.

8 Q And I have that and I see where it says -- yeah
9 she says job burnout. Let's mark this as -- what
10 are we up to -- 6.

11 (Plaintiffs' Exhibit 6 marked.)

12 (Off the record.)

13 Q I've handed you what's been marked as Exhibit 6.

14 A Yes.

15 Q Can you identify that for the record?

16 A The October 25th, 1994 letter from Lee Sweeney.

17 Q Is that something you have in your file?

18 A I believe so, yes.

19 Q Now, there's a reference in your report to job
20 burnout and there's a reference in Lee -- you can
21 hold on to that -- in Lee Sweeney's report to me
22 about job burnout.

23 A All right.

24 Q Did you go into that topic of job burnout with
25 Karen Collins at all?

1 A Briefly, yes.

2 Q What did she tell you about it?

3 A That she had two different problems. One was
4 that she was tired of beating her head against
5 the wall selling stuff that was increasingly --
6 for which there was increasing competition and
7 lower demand -- therefore, lower demand.

8 In addition to that, she became tired of the
9 business after the accident, and she suggested
10 that the accident somehow lowered her motivation
11 to work at this -- at this business.

12 Q What was it that lowered her motivation to work
13 after the accident? Was it the physical injury
14 from the accident or was it the onset of
15 depression after the accident?

16 A Well, that's what's so ambiguous about the case.
17 It was not the physical injury. She is the first
18 to say that she got over her physical injuries
19 relatively quickly, so we're really left with,
20 why is she depressed after this accident? What
21 is it about the accident that was depressing?

22 And here's in my opinion the big mystery in
23 the case. Why is it that someone can experience
24 an accident where she's somewhat concerned about
25 her dogs and her husband, is assured that both of

1 them are fine, she has some stiffness and gets
2 over that relatively quickly and then says that
3 the accident is depressing to her. I spent a
4 fair amount of time asking her what is it about
5 the accident that was depressing and there's
6 where I really got no answer.

7 Q What did she say?

8 A Something about the accident, and she shifted, it
9 seems to me, from implying that she was terribly
10 worried about her husband, at times she painted
11 the picture of someone who was so worried about
12 her husband during that particular period of time
13 immediately after the accident, so worried about
14 him that somehow that made her depressed later.
15 That just doesn't hold water.

16 At other times she indicated that somehow it
17 was the straw that broke the camel's back, a
18 phrase that is often used by plaintiffs in more
19 minor accidents. In trying to find out exactly
20 what that straw was besides just a stroke of bad
21 luck, again, I just couldn't find what it was
22 about the accident that was so depressing. I
23 mean, it didn't --

24 Q Well, we know she had a problematic relationship
25 with her mother, parental rejection.

1 A Yes.

2 Q Right? Are you aware that her husband had a
3 longstanding history of a back problem before the
4 accident?

5 A That does not ring a bell. At this moment I
6 don't recall that.

7 Q Might that be a legitimate reason to be very
8 concerned about your husband? If the evidence in
9 this case is that in 1983 he was diagnosed with
10 two herniated disks between the fourth and fifth
11 lumbar vertebrae and the fifth lumbar vertebra
12 and the sacrum, that he experienced many years of
13 pain and period of time off work and lost wages
14 because of a back problem, and then immediately
15 after the accident she asks, are you okay, and he
16 says, no, my back hurts, isn't that something
17 that might elicit a feeling of intense concern
18 for your husband?

19 MR. MEADOR: Objection.

20 Q If you have -- I'm sorry, let me finish my
21 question, if you have a concern that he's going
22 to be reinjured or aggravated or worsened his
23 already existing back condition?

24 MR. MEADOR: Objection, subject
25 to your proof there, John, on what

1 you've said.

2 Q Okay.

3 A As a hypothetical?

4 Q Sure.

5 A In this particular -- of course, in the abstract
6 it would raise one's worry. The question is in
7 this case how much would it raise one's worry
8 that, you know, that my husband here has been in
9 an accident, number one, and, number two, he has
10 a history of back problems.

11 Her behavior just doesn't conform with that
12 kind of panic. While they were loading him into
13 the ambulance, her thoughts were on the
14 restlessness of her dogs. While he was in the
15 car, her thoughts were on berating the people
16 behind her and making sure that a mother didn't
17 cook an extra dinner for them, or thoughts were
18 on her social calendar.

19 Q Well, they were on their way to a restaurant.
20 Did you know that?

21 A I believe that's correct -- well, that I don't
22 know about.

23 Q Okay. You don't know?

24 A But I do know that later on that day they were
25 scheduled to eat dinner with, I think **it's** his

1 mother. I don't remember, one of their mothers.

2 Q Do you know who called the ambulance or the
3 police?

4 A Hang on. I don't know.

5 Q Is it common for people who are injured to feel
6 anger toward the person that injured them?

7 A It depends how severe the injury. For minor
8 collisions where the person was not physically
9 injured, yes. For collisions where, you know,
10 there's a substantial brain damage or heavy
11 physical injury, the person's thoughts naturally
12 are not ones of being angry. They're struggling
13 to survive. They're terrified. They're anxious,
14 so on.

15 Q Was Karen Collins in your opinion injured in this
16 case from this accident, physically, bodily?

17 A The answer to that is, in my opinion -- let me
18 rephrase that. I have read records suggesting
19 that she was injured. It's just that the
20 injuries were minor and they -- she got over them
21 very quickly. By quickly I mean within about two
22 and a half weeks.

23 Q Okay. Now, the last sentence of the Her Accident
24 portion, you said then Mrs. Collins drove to the
25 hospital where physicians reassured her that her

1 husband was fine.

2 A Yes.

3 Q Do you know -- you understand that she was also
4 examined and treated at the hospital? She
5 underwent x-rays and was given medications for
6 pain?

7 A Yeah. That would be right after Her Accident
8 under Her Other Stressors Persisted. It goes on
9 to talk about the physician's diagnosing strain
10 and so on.

11 Q Right. You've heard of the term a cervical
12 sprain-strain or lumbar sprain-strain?

13 A Yes.

14 Q Okay. Have you ever treated injuries like that
15 before?

16 A Well, I've never treated physical injuries like
17 that. That's not my job.

18 Q Okay. You're not a medical doctor, so you're not
19 licensed to treat those types of injuries, right?

20 A Right, right.

21 Q Now, do you know whether it's a common -- whether
22 it's common that these types of injuries manifest
23 themselves hours after the impact? Is that a
24 common sequela that these things manifest later
25 as opposed to immediately?

1 A While this is not my area of expertise, **it's** my
2 understanding that there can be a delayed onset.
3 Sometimes **it's** immediate and sometimes it can be
4 delayed.

5 Q Okay. Now, the complaints of dizziness and
6 lightheadedness and stiff back, do you know
7 whether those are common symptoms in patients who
8 suffer cervical sprains and strains from car
9 accidents?

10 A Again, this is out of my area of expertise, but I
11 don't recall dizziness and lightheadedness being
12 symptoms. Stiffness, I believe, is.

13 Q But you're not a medical doctor --

14 A Right.

15 Q -- nor expert, so you can't say with any degree
16 of certainty?

17 A Right. I would rather just rely on the opinions
18 of the physicians.

19 Q Why did you comment that she refused to remove
20 her slacks because she insisted that she had pain
21 only in her neck?

22 A I don't know. She mentioned it or it was in a
23 record, and it's not a big deal, but it does show
24 someone that is in control of her life. She has
25 her wits about her.

1 Q All right. Your next statement is the physical
2 effects of her accident seemed to disappear
3 within weeks, but unrelated illls persisted. Let
4 me just -- okay. On Dr. Walborn's note of
5 November 19th, 1991 it says neck and upper back
6 pain resolved, under the title of **MVA, MVA**. In
7 physical therapy two times a week, neck and upper
8 back pain resolved. Is that --

9 A What is the date of that?

10 Q November 19th, improved, and **MVA**, in physical
11 therapy --

12 A Uh-huh.

13 Q -- two times a week, neck and upper back pain
14 resolved.

15 A Yes.

16 Q Then the impression is depression?

17 A Uh-huh.

18 Q Continue Prozac?

19 A Yeah.

20 Q So it's more than just a couple weeks or several
21 weeks from the accident that it took for her
22 physical effects to disappear. You say within
23 weeks, but it was actually almost two months.

24 A Well, I don't think that you can conclude that
25 from this document at all. It is also -- I could

1 write a note today if I were a physician and
2 write that Karen Collins' neck and upper back
3 pain have resolved. I could write that today and
4 I would be correct. They resolved years ago.

5 Q Well, the previous note of October 29th, 1991,
6 follow-up says neck pain improved. Complaint of
7 increased housework with something increased
8 pain, lumbar pain, walks with hands on back.
9 That's indicative of pain from the accident,
10 right?

11 A All right. Let me look. Where are we now?

12 Q Right here. Follow-up, October 29th.

13 A I see.

14 Q Neck pain improved, with increased housework,
15 increased pain, lumbar pain, walks with hands on
16 back.

17 A Yes.

18 Q So that's indicative of some pain, right?

19 A Yes, that appears to be indicative of at least
20 some pain. That's right. It says neck pain
21 improved. Also over here says something about
22 hot packs and massage two times a week.

23 Q Physical therapy?

24 A Suggesting, and I think it is Feldene, so, yeah.

25 Q That's a drug for --

1 A For pain.

2 Q -- for pain?

3 A Right, okay. So I think you've got some
4 handwritten notes suggesting a slightly longer
5 time frame.

6 Q Yeah. And that's a week -- that's the first
7 appointment after the accident, right, October
8 1st?

9 A Uh-huh. One other comment that I need to make,
10 the accident was on September 23rd. October
11 17th, this would be like four weeks we're
12 finding -- no, I'm sorry, October 29th would be a
13 little over a month, so instead of my two and a
14 half weeks, we've got basically four or five
15 weeks, okay. Go ahead.

16 Q Well, October 29th and then -- so between October
17 29th and November 19th apparently it resolved
18 because it says --

19 A Right.

20 Q -- neck and upper back pain resolved on November
21 19th, right?

22 A Yeah, yeah, so -- yeah, uh-huh.

23 Q So it's -- in reality it's actually longer than
24 stated in your report?

25 A By a few weeks, although again, it's -- there's

1 no doubt you are correct. The October 29th thing
2 suggests some pain. I'm just -- I guess the
3 reason I'm confused is that the October 17th note
4 which is typed doesn't mention pain, seems to be
5 much more focused on other things. The
6 typewritten note at the bottom of the October
7 29th thing doesn't mention it. I mean, **it's** --
8 but, yes, I will concede that instead of two and
9 a half weeks, **it's** more like five weeks, she was
10 well within five weeks instead.

11 Q All right. And possibly up until November 19th
12 based on the note, neck and upper back pain have
13 resolved, **it's** conceivable that the day before on
14 the 18th she could have said, gosh, I don't feel
15 any pain, but I had pain yesterday.

16 A Yes, **it's** conceivable.

17 Q The next section -- well, the next section is Her
18 Other Stressors Persisted.

19 A Yes.

20 Q What other stressors are you talking about there,
21 unrelated physical ills and her mother-in-law
22 dying?

23 A Unrelated physical ills, and that's the important
24 one and then the mother-in-law's death, and then
25 the third thing is the depressing drug side

1 effects. Those are also --

2 Q We'll get into that in a second. I want to talk
3 about unrelated physical ills.

4 A Okay.

5 Q You said, for the next two weeks she complained
6 of many physical ills but some seemed unrelated
7 to her accident. Which ones seemed unrelated to
8 her accident?

9 A Hot flashes, dry skin, can't stand heat and cold
10 and a change in her hair texture.

11 Q What's that related to?

12 A I'm sorry? What?

13 Q What's that related to?

14 A I don't know. It just seems unlikely to me, not
15 being an expert in this field, but it just seems
16 unlikely to me that a change in her hair texture
17 was caused by the accident.

18 Q But in terms of the dizzy, lightheaded, stiff
19 back, aching shoulder, back pain, neck pain,
20 spine tight, pressure and pain in the spine, you
21 think those are all related to the accident?

22 A Sound like it, yeah.

23 Q All right. Now, you said on page 4, the top of
24 the page, beginning four weeks after the
25 accident, documents suggest that her complaints

1 were unrelated to her accident. Now, the first
2 one is stomach queasy, poor sleep, and that's on
3 the 17th of October, 1991, Dr. Walborn?

4 A Uh-huh, yes.

5 Q Now, she was on Prozac from October 11th, right,
6 1991?

7 A That sounds correct.

8 Q Isn't stomach problems and gastrointestinal
9 problems a common effect of Prozac?

10 A I believe it is a side effect, that's correct.

11 Q So would that explain the queasy stomach on
12 October 17th?

13 A It may. My only point would be that Prozac is
14 not the accident.

15 Q Also constipation is a side effect of Prozac?

16 A That may be true.

17 Q And blood in stool is also a side effect of
18 Prozac? Did you check the PDR on that?

19 A I don't know.

20 Q Did you check the PDR for side effects on Prozac?

21 A No, I didn't think I did in this case.

22 Q Okay. 18 days after the accident, Dr. Walborn on
23 October 11, 1991, makes a note about depression,
24 October 11, '91 note?

25 A October 11th of '91. I think I've -- I don't

1 seem to have yours. I can look at yours.

2 Q October 11th, '91.

3 A All right.

4 MR. MEADOR: What are you
5 referring to?

6 Q This is Mary Walborn's office note, October 11th,
7 1991, was in car accident, seen last week.
8 What's Robaxin?

9 A It's some drug, but I don't know.

10 Q She was in an MVA and sustained cervical strain.
11 She currently is having problem with her lumbar
12 spine and increased pressure and pain. She has
13 paraspinal muscle tightness in the cervical
14 lumbar area. Impression, paraspinal muscle
15 tightness. She was to continue hot packs,
16 ultrasounds and massage.

17 Impression number 2, depression, it seems
18 like this accident clinched an underlying
19 despondent attitude since her hysterectomy. I
20 started her on Prozac and referred her to Dr.
21 Savinsky.

22 A Yes. You've read that correctly.

23 Q So it appears that at least or at the earliest on
24 October 11, 1991, she was feeling depressed.

25 A Yes, she was by that time, yes.

1 Q Okay. Do you agree that it was appropriate to
2 start her on Prozac at that time?

3 A I think that's fine to treat her for depression
4 using an antidepressant, yes.

5 Q What do you think about the statement, it seems
6 like the accident clinched an underlying
7 despondent attitude since her hysterectomy?

8 A That's ambiguous in my opinion. It is not
9 ambiguous in one respect, and that is clinching
10 an underlying attitude goes along with my point
11 that she was predisposed to depression. It
12 sounds like the experts are in agreement about
13 that point, that she was ready to be depressed
14 about something. This physician has chosen
15 the -- or has concluded that the accident was the
16 precipitator, and I don't agree with that.

17 But then again the physician is -- has not
18 strongly stated it either. The wording, it seems
19 that the accident clinched an underlying attitude
20 is very close.

21 MR. LANCIONE: Mark this as the
22 next one, up to 7.

23 (Plaintiffs' Exhibit 7 marked.)

24 Q Doctor, let me hand you what's been marked as
25 Exhibit 7. Can you identify it for the record?

1 A Okay, yeah.

2 Q Have you seen that before?

3 A Yes.

4 Q What is it?

5 A It's a letter from Physician Walborn to you dated
6 October 20th, 1994.

7 Q Okay. And in this report to me I think you
8 referred to this letter to me as having -- as Dr.
9 Walborn having reversed her opinion that the --
10 that she had depression following her
11 hysterectomy or that the accident clinched an
12 underlying despondent attitude from her
13 hysterectomy?

14 A Yes.

15 Q Okay. And in fact in this report Dr. Walborn
16 states that there is a causal relationship
17 between the depression and the automobile
18 accident?

19 A Let me --

20 Q Last paragraph.

21 A Yes, yes. See, this letter seems much firmer
22 than her statements in the past concerning the
23 role of the accident.

24 Q Okay. Now, on page 4 -- you can just set that
25 down, thanks -- you say medical tests seemed to

1 show no effects of the accident, and then you
2 list some x-rays done in the emergency room and
3 then other, a mammogram and chest x-ray and
4 ultrasound?

5 A Yes.

6 Q But really the only two tests that were done to
7 diagnose conditions from the accident were the
8 two x-rays in the emergency room, right?

9 A I believe so, yes.

10 Q Okay. What do you mean that the tests showed no
11 effects of the accident? You mean the two x-rays
12 were normal?

13 A Yes.

14 Q All right. That's not to say though that she
15 didn't suffer these cervical sprain and lumbar
16 strain, sprain-strain injuries from the accident?

17 A That's correct. It just goes on to say that she
18 didn't damage her spine.

19 Q Are you familiar with the term soft tissue
20 injury?

21 A Yes.

22 Q Do you know -- are you familiar with the fact
23 that accident victims, especially rear-end
24 collision victims are -- that this is a common
25 injury to the neck and back from a rear-end

1 collision?

2 A Yes.

3 Q Have you ever heard the term myofascitis?

4 A Yes.

5 Q Do you know what that is?

6 A Well, again, outside the area of my expertise,
7 but just sort of speculating along, it is within
8 a cluster of terms, myofascial strain, fibrositis
9 is another one that's similar.

10 Medical books generally are ambiguous about
11 the cause and indicate that it may be physical,
12 but then again it may be mental. No physical
13 cause has ever been found. By that I mean the
14 physicians don't understand the mechanism whereby
15 the condition causes pain.

16 Q Your testimony is doctors don't understand why
17 soft tissue whiplash injuries cause pain?

18 A Well, we're talking about myofascitis.

19 Q Yeah.

20 A What I'm saying is that the experts in the field,
21 for example, Harrison's Principles of Internal
22 Medicine, will tell you that the condition is not
23 well understood and may have psychological as
24 well as physical roots.

25 Q Harrison on internal medicine?

1 A Correct.

2 Q Opining about an orthopedic injury?

3 A Yes.

4 Q Okay.

5 A Harrison's Principles of Internal Medicine, yes.

6 Q Doctor, not being a doctor and not having treated
7 the types of injuries that Karen Collins suffered
8 in this accident, specifically cervical and
9 lumbar sprains and strains, you're not familiar
10 with what kind of pain these types of injuries
11 can cause patients, are you?

12 A Well, it is outside the area of my expertise,
13 that is true.

14 Q Okay.

15 A I do have some layman's knowledge of the problem.

16 Q Well, you didn't examine Karen and you didn't --
17 at the time that she was suffering these pains,
18 you didn't ask her to gauge the pains on a scale
19 of 1 to 10 or anything, so you don't know what
20 her pain level was from these injuries, do you?

21 A That's reasonable. I do know what physicians
22 have reported.

23 Q But you don't know specifically about Karen
24 Collins?

25 A Well, no.

1 Q Okay.

2 A I've also asked her about her impressions of the
3 accident, and she told me that she didn't think
4 that she had anymore pain from the accident. She
5 wonders if the depression isn't causing her
6 current physical discomforts.

7 Q That's not what I'm talking about. I'm talking
8 about her level of pain, the severity of pain.
9 You don't know about that?

10 A Well, I'm telling you that I asked her about that
11 issue when I examined her, and her response was
12 that she had a -- some pain but didn't know where
13 it came from, but if you're asking, did I ask her
14 to rate it on a 10-point scale, my answer is, no,
15 I did not ask her to rate it on a 10-point scale.

16 Q That was my question. Page 5 at the top,
17 depressing side effects -- Depressing Drug Side
18 Effects, physicians placed Ms. Collins on many
19 sedating drugs that may have aggravated her
20 depression and other preexisting complaints.
21 Now, as a predicate, all these drugs were
22 prescribed after the accident and after the onset
23 of depression, correct?

24 A I believe, yes.

25 Q So you're not saying that these drugs caused her

1 depression, are you, because they were given
2 after the depression came on, right?

3 A I believe that to be true, yes.

4 Q And you got your information from a -- let's take
5 a look at footnote 20, the problem list flow
6 sheet, and medication flow sheet, 1-92. Is that
7 this? Do we have the same document?

8 A Yes, that's the one.

9 Q Okay. Look at that. Now, the first entry is
10 January of '92, right?

11 A Yes.

12 Q So under the problem, second problem, depression,
13 we have Prozac, right?

14 A Yes.

15 Q But we know that was started in October of '91 --

16 A Uh-huh.

17 Q -- from Dr. Walborn's office note, right?

18 A Yes.

19 Q October 11th, okay. And that was continued
20 through at least 1-93?

21 A Yes.

22 Q And we have Valium and that was started in when,
23 January of '92, it looks like?

24 A Looks like January of '92, yes.

25 Q Do you know whether it was started earlier?

1 A That I don't know.

2 Q Okay. And the Klonopin, is that how you
3 pronounce that?

4 A I believe so, yes.

5 Q Let me back up to Xanax.

6 A Yes.

7 Q What's Xanax?

8 A Xanax is a drug that's very much like Valium.
9 It's a tranquilizer.

10 Q And that was also started in January of '92?

11 A Well, you know, I'm not sure how to read these
12 notes. There's an X under Xanax for October of
13 '92, and I don't know whether that means that it
14 was just represcribed then as refills or whether
15 it was started then for the first time. I just
16 don't know.

17 Q Well, looks like April 13th, '92, Xanax, 25 qd,
18 on Prozac, and I didn't see Xanax anywhere else
19 in the records, so --

20 A Uh-huh. Well, she was taking that at the time of
21 my exam --

22 Q All right.

23 A -- as well.

24 Q So also the Xanax was prescribed and taken
25 several months after the accident, after the

1 onset of depression, correct?

2 A That I believe is true.

3 Q Same with the Klonopin, the anticonvulsant?

4 A Yes.

5 Q It looks like 12-92 and 1-93?

6 A Uh-huh.

7 Q I'm just going by her chart here, if you go back
8 to a note in December of '92 --

9 A Yeah.

10 Q -- it says Klonopin, .5 milligrams.

11 A Yes.

12 Q Okay. So that's, again, well over a year after
13 her accident?

14 A Yes.

15 Q First time?

16 A Well, I don't know whether this document purports
17 to list the very first time she took these
18 medications.

19 Q But looking in the chart we can tell.

20 A We do know she was taking them.

21 Q Let me just ask hypothetically, if her depression
22 was actuated by the accident, does it follow that
23 these drugs are then prescribed as a result of
24 the accident because they're prescribed for her
25 depression, hypothetically?

1 MR. MEADOR: Objection.

2 Q Noting your opinions in this case.

3 A Right.

4 MR. MEADOR: Objection.

5 A No, that does get at the root of the problem
6 here. These drugs were also prescribed, and
7 again I don't mean to be facetious here, but
8 these drugs were also prescribed after her
9 birthday and after she closed her business and,
10 you know, the point is the drugs were prescribed
11 after a number of events.

12 Q Sure.

13 A The teasing apart which one is the --

14 Q I understand.

15 A -- cause is different.

16 Q But if -- let me just ask you this
17 hypothetically. If you have **held** the **opinion**
18 that the -- there was a relationship between the
19 accident and the depression, is it reasonable
20 then for Valium, Xanax and Klonopin to be
21 prescribed for depression?

22 MR. MEADOR: Objection. Again,
23 this doctor does not prescribe these
24 drugs.

25 MR. LANCIONE: I know. I'm going

1 to get into that in a minute too.

2 A Yeah. I'm going to echo that sentiment and
3 further add, and I hope I'm answering your
4 question here, Xanax, Valium and Klonopin are not
5 considered to be antidepressants. Far from it,
6 they're considered to be sedating drugs which,
7 again --

8 Q Aren't they -- I'm sorry.

9 A -- a physician will have to --

10 Q You would defer to a physician for the reason for
11 these prescriptions, right?

12 A Well, what I was going to say is that a physician
13 will have to confirm what I'm about to say, but
14 generally these drugs would aggravate depression.
15 They're -- one of their side effects in almost
16 every case is major symptoms of depression, so
17 it's quite confusing as to why she would be
18 taking depressing drugs for depression.

19 Q Do you know whether these drugs were prescribed
20 to help deal with some of the side effects of
21 Prozac?

22 MR. MEADOR: Objection.

23 A Number one, I've never heard of that, and, number
24 two, at the time of my exam she was not taking
25 Prozac, but she was taking Xanax and Klonopin.

1 Q Was she taking Effexor also; do you know?

2 A Yes.

3 Q That's an antidepressant?

4 A That may well be true.

5 Q Is one of the side effects convulsions and
6 tremors, Effexor and Prozac?

7 A While that may be true, while that may be listed,
8 it's quite unusual in my experience with my
9 depressed patients to have patients on a
10 tranquilizer, depressed patients.

11 Q You've never prescribed any of these medications,
12 Xanax, Valium or Klonopin?

13 A Correct.

14 Q You're not permitted to by law?

15 A Correct.

16 Q Your sole source of information on Valium, Xanax
17 and Klonopin as contained in this report is from
18 the PDR and other references --

19 A Right.

20 Q -- in your footnotes, correct?

21 A That's correct, and I might add my experience
22 with my patients and my training. While I'm not
23 competent to prescribe these drugs, I did get
24 some training in them.

25 Q You're not a medical doctor, as we've

1 established. You're not a pharmacologist.

2 A That's correct.

3 Q You're not a pharmacist, correct?

4 A (Indicated affirmatively.)

5 Q Note the witness is nodding his head
6 affirmatively.

7 A Yes, and also I said that's correct.

8 Q Okay. The next section is Physically Active.
9 What's the significance of this aspect of her?

10 A There are -- the major significance is that she
11 is telling us that she is basically over the
12 physical problems of the accident. The -- I
13 would argue that the medical records suggest that
14 she is over the physical impact of the accident.
15 This is further confirmation of that.

16 We've got somebody going to high impact
17 aerobics classes. I mean, I think this is quite
18 consistent. She is not maintaining that she
19 suffers from serious physical injuries that were
20 sustained by this accident, and she acts that
21 way.

22 Q Okay. Page 6, Odd Mental Symptoms After Her
23 Accident. Why do you describe it as odd? What's
24 odd about her depression?

25 A Well, if you just quickly go through, there are

1 lots of inconsistencies. Let me preface it by
2 saying I agree she's depressed at the time that I
3 saw her, so I don't want to make too big a thing
4 out of this.

5 But Sweeney diagnosed a temporary
6 depression, one which by definition lasts no more
7 than six months. Her physician suspected mania,
8 a very much different kind of mental disorder.

9 Later she was talking about not wanting to
10 go to therapy because it would bring back too
11 many memories of the accident. That is odd that
12 the accident, as described, an accident where she
13 did the things that she did, she would now be
14 phobic about remembering those things. I'm
15 trying to think back about what part of the
16 accident she would be afraid to remember. Would
17 it be the part where she's calling to cancel her
18 dinner or where she needs to get her restless
19 dogs home? I'm just trying to think where the
20 traumatic part would be.

21 Q What about the physical pain and what about the
22 anger? Those might be things she doesn't want to
23 remember.

24 A She had, as far as I could tell, no physical pain
25 during the first four hours after the accident.

1 Q So you're limiting this to the first four hours
2 of the accident, her not wanting to hear things
3 about the accident?

4 A Yeah, for fear it would bring back too many
5 memories of her accident.

6 Q So you don't consider any of the pain she
7 suffered something related to the accident?

8 A No. That's not what I'm saying.

9 Q All right. I know what you're saying.

10 A But she says she doesn't want to remember the
11 accident, I assume that she means the accident
12 and not the pain that occurred four hours
13 afterwards or four weeks afterwards.

14 Q Isn't that speculation on your part by limiting
15 that for this report?

16 A I consider it to be just a reading and
17 interpretation of the words. The word is
18 accident, not pain.

19 Moving along, she -- while working, she
20 endured symptoms of depersonalization. There is
21 no such symptom of depression. Depersonalization
22 is a symptom of anxiety but not depression.

23 And then finally there was that odd thing
24 the counselor wrote, Karen came to my home for
25 this session. Her trauma over memory based

1 anxiety makes it impossible for her to see me in
2 the office. I don't understand.

3 Q Okay.

4 A She needs to see her therapist at home because of
5 the accident. I just -- that's odd. And then
6 finally, the last odd thing is that I believe
7 that my fellow professionals were in the same
8 boat, they even started wondering, well, maybe
9 she's brain damaged. So they sent her off for an
10 evaluation of brain damage trying to nail down
11 why she's showing some of the symptoms she's
12 showing. That's why I called it odd.

13 Q All right. Now, you're saying that Counselor
14 Sweeney's diagnosis of adjustment disorder with
15 depressed mood, 309.00 from the **DSM-III-R** --

16 A Right.

17 Q -- is a temporary depression?

18 A There's no doubt about it.

19 Q All right. Can a temporary depression such as
20 adjustment disorder with depressed mood become a
21 dysthymia?

22 A Yes.

23 Q What's a dysthymia?

24 A A chronic depression that must last at least two
25 years, keeping in mind that Sweeney diagnosed

1 this adjustment disorder years after the
2 accident.

3 Q Well, why don't you turn to the first office note
4 of Lee Sweeney?

5 A The date of that is?

6 Q October 23rd, 1991, a month after the accident.

7 A October what again?

8 Q 23rd.

9 A 23rd.

10 Q Sweeney, not Walborn. Here.

11 A Right. Show me, okay. I got it somewhere else.

12 Q Here's Clinical Counseling Associates, Lee
13 Sweeney.

14 A Okay.

15 Q Background, then my hole is punched out, October
16 23rd, 1991.

17 A Okay.

18 Q History, I am diagnosing her as 309.00 **DSM-III-R**.

19 A Okay.

20 Q So she made a diagnosis within a month -- you
21 know what, that was November, November 23rd --
22 no, October 23rd, 1991.

23 A Okay.

24 Q so --

25 A All right. I did -- all I'm saying is that --

1 Q Do you agree that's an accurate diagnosis at that
2 time of her condition?

3 A That -- well --

4 Q 309?

5 A I'm not sure whether that was an accurate
6 diagnosis at the time. From the standpoint of
7 the time frame, it's perfectly legitimate. In
8 other words, adjustment disorders must occur
9 within three months of the trauma, whatever the
10 identified trauma is, then they can -- but my
11 point is they can only last six months. So this
12 diagnosis at least makes that time frame. The
13 question is whether or not Sweeney diagnosed that
14 again later outside the time frame.

15 Q Then you said, but her physician suspected a
16 longstanding genetically-based problem called
17 mania.

18 A Uh-huh.

19 Q And then let's -- and I think you got that from a
20 September 1st, 1992 note from Dr. Walborn.

21 A Yes.

22 Q I am concerned that there were some periods in
23 her life that could be interpreted as such
24 elevated moods that could be a manic phase.

25 A Yes.

1 Q So based on that statement, you say that Dr.
2 Walborn suspected a mania? That's your
3 interpretation of that?

4 A Yeah. The letter goes on to say, if so, we
5 should medicate her with a medication, as I
6 recall, specifically designed --

7 Q Lithium.

8 A -- to cure mania.

9 Q Was she ever prescribed lithium?

10 A I don't think so.

11 Q Was she ever diagnosed as having mania?

12 A No. I have, as stated, said that the physician
13 suspected. I think that's a fair interpretation
14 of what you just read.

15 Q So if there's never any diagnosis, why bring it
16 up in this report? What's -- was there any
17 evidence of a mania?

18 A You would have to ask the physician why the
19 physician speculated that there was a mania. I
20 would assume that the physician doesn't randomly
21 pick mental health labels and just throw them in,
22 that she suspected it because she suspected it.

23 Q And Observed Behavior on page 7, was her observed
24 behavior consistent with depression?

25 A Yes.

1 Q What's the significance of mentioning the little
2 quip that you guys had, I'll bet you want a copy
3 of this test and she smiled, laughed a little and
4 said, no, I don't think so?

5 A Well, it was meant to balance out my major
6 statement which is that she showed essentially
7 symptoms of depression, emotionally flat, apathy,
8 little sparkle, long latencies and so on, she was
9 capable of laughing a little.

10 Q Anything wrong with that, uncommon or unusual?

11 A No.

12 Q Okay. Normal Cognitive Tests, Martin's test
13 showed no brain damage, and you're referring to
14 his report?

15 A Yes.

16 Q Your tests showed no brain damage?

17 A Correct.

18 Q Okay. Your MMPI test showed depression?

19 A Yes.

20 Q Okay. And your Personality Assessment Inventory
21 showed depression?

22 A Yes.

23 Q Now, DSM-IV, I don't have that. What was your
24 DSM-IV diagnosis for her?

25 A It was that she suffered from some form of

1 depression, and I was not clear about the type.
2 The two major candidates are dysthymia and
3 sedative-induced mood disorder, so this amounts
4 to provisional diagnoses.

5 Q Is one more likely than the other of those
6 provisional diagnoses?

7 A No, I think they're about equally likely at this
8 point.

9 Q Okay. Now, on these axes, these axes used by the
10 DSM-IV, her personality disorder warrants no
11 diagnosis. Does that mean she doesn't have a
12 personality disorder?

13 A That's correct.

14 Q Okay. Her Clinical Disorder, on this dimension
15 Mrs. Collins' diagnosis is depression, okay, but
16 the type is unclear. She suffers from a
17 dysthymia. She may suffer from dysthymia and may
18 suffer from sedative-induced mood disorder?

19 A Right.

20 Q Her General Medical Condition, medical records
21 show that Ms. Collins has suffered years of
22 gynecological difficulties and these were
23 stressful enough to prompt surgery. Why did you
24 use the term stressful as opposed to painful?

25 A Well, pain and stress kind of go hand in hand,

1 and so --

2 Q Okay. The next axis is Psychosocial and
3 Environmental Problems.

4 A Yes.

5 Q In the past year Ms. Collins' stressors have
6 included marital problems and her lawsuit.

7 A Uh-huh.

8 Q Now, obviously the lawsuit was a result of the
9 accident, right?

10 A That's fair to say, yeah.

11 Q And her marital problems, do you know when her
12 marital problems arose?

13 A No, I really don't, although I do know that some
14 of them have occurred after the accident.

15 Q After the onset of depression?

16 A After the accident, yeah, and probably after the
17 onset of the depression.

18 Q And the Global Assessment of Functioning, that's
19 Axis V?

20 A Yes.

21 Q What did that show?

22 A A moderate level of psychological problems.

23 Q So her depression is moderate depression; is that
24 what that means?

25 A Yes.

1 Q Differential Diagnosis, she doesn't have --
2 doesn't fit the criteria for post-traumatic
3 stress?

4 A Right.

5 Q You say she doesn't suffer from an adjustment
6 disorder because of her temporary, but you do
7 agree an adjustment disorder can evolve into an
8 dysthymia?

9 A Yes.

10 Q What's secondary dysthymia?

11 A I don't think I've ever heard of that term,
12 secondary dysthymia.

13 Q Okay.

14 A It may be one that someone is using in some
15 sense.

16 Q Now the big issue, Causes of Ms. Collins' Mental
17 Problems. First sentence reads, it is clear that
18 the accident was not the sole cause of
19 Ms. Collins' depression and that many stressors
20 caused the depression. Now, by using that term
21 sole cause, I interpret that as saying, although
22 not the only cause, it was a cause among --
23 together with many other things.

24 A No. That is not what I intended.

25 Q That's not what you're trying to say?

1 A This being a complicated case, difficult one, I'm
2 trying to rule in and out as much as I possibly
3 can unambiguously. All I'm saying here, we can
4 all agree, I believe everybody will agree that
5 the accident was not the sole cause, but look at
6 the next sentence. The remaining question is
7 whether the accident was one of the stressors
8 that contributed to the depression.

9 Q Now, see, that also doesn't mean to me -- let me
10 just tell you my interpretation, why I asked the
11 question. On the second sentence, it says the
12 remaining question is whether the accident was
13 one of the stressors that continues to contribute
14 to her depression.

15 I'm talking about causation. I'm talking
16 about in September, on September 23rd, 1991, and
17 the onset of the depression within a month of
18 that accident as a cause, as a straw that broke
19 the camel's back, as an actuator or activator as
20 we've used the term earlier.

21 A Yes.

22 Q Do you have an opinion to a reasonable degree of
23 psychological certainty as to whether the
24 accident was a cause of the depression, an
25 activator or actuator of the depression?

1 A All right. Let me think about this.

2 Q Just because your second sentence talks about it
3 continuing.

4 A Right.

5 Q I'm not talking about continuing after October,
6 after its onset, but I'm talking about what
7 caused its onset.

8 A Right. My answer is no, I have no opinion within
9 a reasonable degree of psychological certainty
10 about whether or not the accident contributed.
11 It may have and it may not have.

12 To put it in its reverse form, I know this
13 is ambiguous, it is clear to me -- in other
14 words, I have an opinion that there were several
15 things that contributed to her depression listed
16 in the report. The accident is not sufficient to
17 explain the depression.

18 On the other hand, I don't know what's
19 causing it and that's my problem. That's the
20 weakness in my testimony is that I don't have,
21 with a reasonable degree of psychological
22 certainty, some alternative cause.

23 Q We talked about her being predisposed from
24 parental rejection and we talked about other
25 potential actuators or activators, activators is

1 what we used, activators of the depression, and
2 we talked about gynecological problems, painful
3 periods as a potential activator of the
4 depression, the hysterectomy four months before
5 it and job problems in the past.

6 But we know that the job -- well, your
7 testimony in that was already on the record, but
8 then we have her accident as another potential
9 activator, but you don't have an opinion as to
10 whether any of those activators we just talked
11 about was a cause of the accident -- or a cause
12 of the depression?

13 A I believe that in descending order that it's
14 clear that her parental rejection was a cause.
15 Whether it's the sole cause or not, I don't know.
16 I doubt it. But a cause with a reasonable degree
17 of psychological certainty, her childhood
18 experiences with her mother were a cause.

19 Q Predisposal?

20 A Or her parents, right, and therefore a cause.

21 Q Okay.

22 A Her gynecological problems, broadly speaking,
23 were more likely than not a contributor. Those,
24 by the way, included not only the difficulties
25 that she had before the accident but as I recall

1 afterwards she had some --

2 Q -- urinary tract infections, things like that?

3 A Right, and breast -- dense breast tissue.

4 Q Right. All after the accident though, right?

5 A I'm sorry?

6 Q The mammograms were after the accident?

7 A Right.

8 Q '93, '94?

9 A Right, and broadly conceived, those are part of
10 her gynecological problems. It is -- my sense is
11 that after her hysterectomy it becomes very
12 disappointing when you have yet more
13 gynecologically oriented problems like breast
14 masses. So that was clearly a contributor in my
15 opinion.

16 The -- it is also though clear to me that
17 the accident was of such a small magnitude in
18 terms of it being benign that its contribution to
19 her ongoing depression couldn't possibly be
20 significant.

21 Q Let me stop you there. She didn't have
22 depression at the time of the accident, did she?

23 A Correct.

24 Q Why do you say contributing to her ongoing
25 depression? It didn't happen until after the

1 accident, so it couldn't have been ongoing.

2 A I mean by that the notion of predisposition, that
3 she was already predisposed. She had something
4 that the average person does not have, and so
5 again, the problem with the accident is that its
6 effects seemed to clear up so quickly.

7 Q All right. Let me ask you this. Can you say to
8 a reasonable degree of psychological certainty
9 whether she ever would have become depressed had
10 she not been in this accident?

11 A I don't know. I cannot at this point say that.
12 I don't -- not with a reasonable degree of
13 psychological certainty.

14 Q Do you have an opinion as to whether the
15 childhood problems alone, nothing else, are
16 sufficient enough to cause her depression?

17 A Yes, and my opinion is that they are not
18 sufficient by themselves.

19 Q Same with the gynecological problems, those by
20 themselves are not sufficient to cause
21 depression?

22 A Let me make a fine hair-splitting distinction
23 here. The gynecological problems by themselves,
24 meaning if she had never had a bad childhood?

25 Q Right.

1 A If she simply had the gynecological problems, I
2 doubt that they would be sufficient to cause
3 depression by themselves.

4 Q Now, add the factor, the reality that she did
5 have parental rejection, were the gynecological
6 problems in this case alone enough to cause the
7 depression?

8 A They are enough in this case.

9 Q But you can't say one way or the other whether it
10 did in fact cause the depression?

11 A Right, but they are sufficient. Those two major
12 categories are sufficient to send somebody into
13 depression.

14 Q And the other stressor you noted, the job
15 problems, taking into consideration the childhood
16 problems and parental rejection, it too is
17 sufficient to cause the onset of depression?

18 A They are sufficient.

19 Q But you can't say one way or the other whether it
20 was in fact in this case the cause of the onset
21 of the depression?

22 A Correct.

23 Q Okay. Do you feel that -- do you have an opinion
24 to a reasonable degree of psychological certainty
25 that the medications she took contributed to the

1 duration of her depression?

2 A Yes. My opinion is that it contributed to the
3 duration of her depression, her medications did.

4 Q The fact being that they were not prescribed
5 until after a depression was diagnosed, the
6 medications did not cause her depression in
7 September and October of 19913

8 A That's right, yeah. Assuming that the drugs were
9 given after the depression started, and while
10 that appears to be the case -- I'm not sure about
11 that, but while that appears to be the case, yes,
12 then the drugs would be an aggravator, which is
13 basically what I said.

14 Q I thought I would get a refund today, Doctor, but
15 I guess I was wrong. Those are all the questions
16 I have.

18 REDIRECT EXAMINATION

19 BY MR. MEADOR:

20 Q I have a couple questions just to clarify,
21 Doctor. What you're saying is that you don't
22 know the cause of the depression; is that
23 correct?

24 A Yes.

25 Q And taking all of these different factors, the

1 job problems, the hysterectomy, the gynecological
2 problems and the accident, you can't say whether
3 any of those were the cause of this accident; is
4 that correct?

5 A The cause of the depression?

6 Q I'm sorry, cause of the depression?

7 A Yeah, that's right. And another thing I'm trying
8 to say, obviously, I'm telling you it's a
9 confusing and difficult case, but I'm saying that
10 the -- that I can rule out the accident as being
11 a major cause of the depression. The trouble is,
12 and this is my -- I understand that this is my
13 weakness in the case, I don't -- I'm unable to
14 propose the -- a combination of other causes to a
15 reasonable degree of psychological certainty, so
16 that's my problem.

17 Q So you can rule out the accident as a cause of
18 the depression, but you can't say definitely what
19 was the cause?

20 A Right. It makes no sense to me that an accident
21 of this magnitude could cause the kind of
22 depression that she's showing, years of
23 depression after an accident like this. It just
24 doesn't make sense to me.

25 Q With respect to the depression itself, apparently

1 you are conceding that it was not diagnosed until
2 October of '91, which would have been
3 approximately a month or so after the accident?

4 A Right. That sounds about right, uh-huh.

5 Q Do you know whether or not the depression existed
6 before the accident but went undiagnosed? Can
7 you say?

8 A There is no evidence for that, so by definition,
9 I'm left to sort of wonder and speculate, but
10 there is no evidence that I know of of a
11 depression before the accident or before the
12 hysterectomy.

13 Q Okay. You can't rule out that there was
14 depression that occurred after the hysterectomy
15 but before the accident, can you?

16 A I can't because -- I mean obviously I need to
17 operate on evidence. There is no evidence of a
18 preexisting depression. On the other hand, I
19 note a sort of dearth of records in that window,
20 that five-month window between the hysterectomy
21 and the accident. I have -- I am not acquainted
22 with lots of records during that period of time,
23 and I must say perhaps to both concerned that if
24 those records were to pop up, they would be quite
25 relevant to the discussion.

1 Q I take that the reason why you said that there
2 was some inconsistency in what Dr. Walborn said
3 is that when you read her note, it seemed as
4 though she attributed the depression somehow to
5 the hysterectomy, but then when she wrote her
6 letter, she discounted the hysterectomy and said
7 that the cause was the accident?

8 A Correct. That's one of the parts of what I call
9 odd, yeah.

10 Q All right. Thank you.

11 A You're welcome.

12 - - -

13 RECROSS-EXAMINATION

14 BY MR. LANCIONE:

15 Q The basis that you rule out the motor vehicle
16 accident as a cause of the depression is the lack
17 of severity it appeared to be to Ms. Collins?

18 A That's correct. Her behavior at the time of the
19 accident and physician's opinions about her --
20 the injuries she sustained from the accident,
21 both suggest a benign accident.

22 MR. LANCIONE: Okay. Great.

23 MR. MEADOR: Thank you.

24 MR. LANCIONE: Now, Doctor, I'm
25 going to have this typed up today and

1 probably well into tonight and have it
2 ready for testimony on Thursday. Do you
3 want to read this before your testimony?

4 THE WITNESS: Waive.

5 MR. LANCIONE: Waive, okay.

6 (Deposition concluded at 12:36 p.m.)

7 (Signature waived.)

C E R T I F I C A T E

STATE OF OHIO)
) SS:
COUNTY OF LUCAS)

I, Constance L. Boyden, Registered Professional Reporter and Notary Public in and for the State of Ohio, duly commissioned and qualified, do hereby certify that CHRISTOPHER C. LAYNE, Ph.D. was by me first duly sworn in the cause aforesaid; that the testimony then given was by me reduced to stenotypy in the presence of said witness, afterwards transcribed upon a computer; that the foregoing is a true and correct transcript of the testimony so given as aforesaid; that this deposition was taken at the time and place in the foregoing caption specified.

I do further certify that I am not a relative, employee or attorney of any of the parties or counsel employed by the parties hereto or financially interested in this action.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my notarial seal of office at Toledo, Ohio, this 6th day of December, 1994.

CONSTANCE L. BOYDEN, RPR
Notary Public in and for the
State of Ohio

My Commission expires April 14, 1999
