

IN THE COURT OF COMMON PLEAS

CUYAHOGA COUNTY, OHIO

CARL J. WILLIAMS, et al.,

Plaintiffs,

JUDGE B. CORRIGAN

-vs-

CASE NO. -253137

JONATHAN C. BOYD, M.D., et al.,

Defendants.

Doc. 285

- - - -

Telephone deposition of SHELDON L. MARGUILLES,  
M.D., taken as if upon cross-examination before  
Sandra L. Mazzola, a Registered Professional  
Reporter and Notary Public within and for the  
State of Ohio, at the offices of Jacobson,  
Maynard, Tuschman & Kalur, 1001 Lakeside Avenue,  
Suite 1600, Cleveland, Ohio, at 10:30 a.m. on  
Friday, March 9, 1996, pursuant to notice and/or  
stipulations of counsel, on behalf of the  
Defendant, Jonathan C. Boyd, M.D., in this cause!•

CLEVELAND, OHIO 44107  
(216) 221-1970  
FAX (216) 221-8667

**APPEARANCES:**

John A. Lancione, Esq.  
Becker & Mishkind  
660 Skylight Office Tower  
Cleveland, Ohio 44115  
(216) 241-2600,

On behalf of the Plaintiffs;

Anna Moore Carulas, Esq.  
Jacobson, Maynard, Tuschman & Kalur  
1001 Lakeside Avenue  
Suite 1600  
Cleveland, Ohio 44114  
(216) 736-8600,

On behalf of the Defendant  
Jonathan C. Boyd, M.D.;

James L. Malone, Esq.  
Reminger & Reminger  
113 St. Clair Building  
Seventh Floor  
Cleveland, Ohio 44114  
(216) 687-1311,

On behalf of the Defendant  
Meridia Hillcrest Hospital.

1                    SHELDON L. MARGUILIES, M.D., of lawful  
2 age, called by the Defendant, Jonathan C. Boyd,  
3 M.D., for the purpose of cross-examination, as  
4 provided by the Rules of Civil Procedure, being  
5 by me first duly sworn, as hereinafter certified,  
6 deposed and said as follows:

7                    CROSS-EXAMINATION OF SHELDON L. MARGUILIES, M.D.

8                    BY MS. CARULAS:

9                    Q. Would you please state your full name for the  
10 record?

11                   A. Sheldon Leslie Marguillies.

12                   Q. Dr. Marguillies, you've been through the  
13 deposition process before, correct?

14                   A. Yes.

15                   Q. So you understand the basic ground rules.  
16 Because we are doing this by phone, if you could  
17 please try to speak up, I'd appreciate it. And  
18 likewise, if you would attempt to wait until I  
19 finish all of my questions before you answer and  
20 I will try to do the same so we do not overlap  
21 over the phone. Okay?

22                   A. Fair enough.

23                   Q. And if you don't understand any of my questions,  
24 please tell me that and ask me to rephrase.  
25 Okay?

1 A. Okay .

2 Q. And if you answer something, I'm going to assume  
3 you understood it. Fair enough?

4 A. Fine.

5 Q. Could you describe your practice for me, please?

6 A. I have a private practice of general neurology at  
7 Sinai Hospital in the professional building.  
8 Sinai Hospital is one of the teaching hospitals  
9 for Johns Hopkins University in Baltimore,  
10 Maryland.

11 Q. You say your practice is general. Do you do both  
12 adult and adolescents?

13 A. Yes. Actually I will see a child at any age, but  
14 I generally don't see patients below the age of  
15 say about eight.

16 Q. And what is the percentage split between **adult**  
17 and children neurology?

18 A. Children is below the age of what?

19 Q. How do you define it? Eighteen and under?

20 A. Well, if you want to define it that way, I would  
21 say it's about 95 -- yes, about 95 percent of my  
22 patients are over the age of 18.

23 Q. Besides Sinai do you have privileges at any other  
24 hospitals?

25 A. Yes. I don't exercise them very much but I do

1 have admitting privileges at Northwest Hospital  
2 Center and at Mercy and I think also at the  
3 University Hospitals, At John Hopkins if one of  
4 my patients get admitted to that hospital, I can  
5 go see the patient, but I can't admit a patient  
6 to that hospital and be their primary doctor,

7 Q. So your primary practice is at Sinai?

8 A. Yes.

9 Q. Do you have teaching responsibilities?

10 A. Yes.

11 Q. What are those?

12 A. I teach the medical students and residents, or I  
13 participate in the teaching of them -- of course,  
14 I not only teach, but I participate in the  
15 teaching program for medical residents and  
16 medical students who rotate from the University  
17 of Maryland and Johns Hopkins over to Sinai  
18 Hospital.

19 Q. I see that you went to law school?

20 A. Yes, right,

21 Q. Do you practice law at all?

22 A. No.

23 Q. Have you ever practiced?

24 A. No.

25 Q. Your wife is also a lawyer?

1 A. Right.

2 Q. What is her specialty?

3 A. Bankruptcy.

4 Q. All right. Have you authored any literature on  
5 anything relevant to this case?

6 A. I don't think so. no.

7 Q. Are you involved in any administrative  
8 responsibilities?

9 A. No.

10 Q. Now, you have not had any surgical training, is  
11 that true? You rotated through neurosurgery  
12 during your residency?

13 A. Do you mean general surgery?

14 Q. Right.

15 A. No, not to speak of, no.

16 Q. And likewise, you've not had any urology  
17 training?

18 A. No, other than medical school, you know, when  
19 rotating on those specialties.

20 Q. Do you know how it is that Mr. Lucas contacted  
21 you or found you?

22 A. I think through Dale Zucker.

23 Q. All right. And had you worked with Mr. Zucker  
24 before?

25 A. Yes, I had done a case with him prior.

1 Q. What type of case was that?

2 A. I don't remember.

3 Q. Do you know how it was that Mr. Zucker initially  
4 found you?

5 A. No.

6 Q. Have you ever reviewed any cases for  
7 Mr. Lancione?

8 A. No.

9 Q. Do you belong to any expert witness services?

10 A. Yes, TASA.

11 Q. TASA?

12 A. Right.

13 Q. Any others?

14 A. Not that I know of.

15 Q. Do you know, did Mr. Zucker find you through  
16 TASA?

17 A. I don't know.

18 Q. How many cases would you say you review per year  
19 through TASA?

20 A. Probably about three.

21 Q. How many cases would you say you review, medical  
22 malpractice cases, I'm talking about, would you  
23 review per year?

24 A. Well, now TASA doesn't insure just medical  
25 malpractice. Sometimes it **would** be a personal

1 injury or sometimes maybe death penalty or  
2 competency hearing or -- anyway, I probably  
3 review a malpractice case a month.

4 Q. One per month?

5 A. On average,

6 Q. And for how many years have you been doing that3

7 A. Probably since '88.

8 Q. And other than malpractice cases, how many cases  
9 of any other type, general type of litigation do  
10 you review?

11 A. Probably about half that many. Or -- maybe  
12 half. Maybe it's equal. Personal injury or some  
13 type of injury to the nervous system.

14 Q. All right. So as a general rule you would review  
15 about two cases per month either being a  
16 malpractice or a general personal injury?

17 A. Right.

18 &- As far as the malpractice cases what is the split  
19 of cases you review between plaintiff and defense  
20 work?

21 A. Most of them, I'd probably say 75 to 80 percent,  
22 are plaintiffs. Then it flip-flops for personal  
23 injury. I do mostly defense work.

24 Q. Why is that, do you know?

A. No. Whoever calls me to ask me about my opinion

1 about a case.

2 Q. Do you conduct physical examinations of injured  
3 people, injured parties?

4 A. Yes.

5 Q. Is that something you do above and beyond these  
6 two cases per month that you review?

7 A. Well, I have just, for example, been involved in  
8 an automobile accident. They have an attorney  
9 but they come to see me as their treating doctor.

10 Q. Besides that, do you have an arrangement with any  
11 group that you will do physical examinations for  
12 litigation purposes?

13 R. No.

14 Q. Have you ever testified in court?

15 R. Yes.

16 Q. How many occasions?

17 A. Probably 12, 15 times.

18 Q. How many depositions would you say you've given  
19 over your career?

20 A. Probably about 50.

21 Q. What is your charge, sir?

22 A. \$350 an hour.

23 Q. That is for review and testimony?

24 A. Yes.

25 Q. Have you ever testified in a case similar to

1 this?

2 A. No .

3 Q. Do you have your file in front of you?

4 A. Yes.

5 Q. Would you please tell me what is contained in  
6 your file?

7 A. Let's see. There is a letter from Dale Zucker  
8 dated June 3, 1994.

9 a. All right. What else do you have?

10 A. Asking me to review the matter and a summary of  
11 the case, and then I have the medical records  
12 from Meridia Huron Hospital. Probably regarding  
13 the ileus.

14 Q. What dates, what hospitalization?

15 A. Specifically, I have Meridia Huron Hospital lab  
16 work of 10-3-91. Then I have the -- that  
17 hospital confinement of 12-19 to 12-21, an  
18 emergency room visit on 12-23, and a confinement  
19 of 12-23 to 1-24. And then I have a Meridia  
20 Huron Hospital lab work of 4-3-92, an x-ray of  
21 4-14-92, and an EKG of 4-22-92.

22 Q. Anything else?

23 A. No.

24 MS. CARULAS: As far as the letter,  
25 John, do you have a copy of that letter that

1           you could then just provide to me?

2 Q.       Great. Mr. Lancione just handed me a copy of  
3 the letter. If you would just give me a moment,  
4 I'll just look over it real quick.

5           Okay. It appears as if you also have a copy  
6 of the opinion letter of Dr. Sodemann?

7 A.       That's right. I do I see that. You are right,  
8 sure. Sorry.

9 Q.       You know what you need to do, doctor, if you can  
10 try to speak up a little bit. Our court reporter  
11 is having a difficult time.

12 A.       I did see -- there was a letter from a GI  
13 expert. I don't know what I did with it. 1  
14 don't know where it is. I don't know what 1 did  
15 with it, but anyway that was -- yes, that's also  
16 true, that's correct.

17 Q.       And you had all of this material before you  
18 authored your report?

19 A.       Right.

20 Q.       Did you review any literature at all?

21 A.       No.

22 Q.       What literature do you regularly refer to in your  
23 practice?

24 A.       Well, I have the entire Index Medicus. I  
25 generally don't use textbooks. I usually refer

1 to the literature.

2 Q. The journals?

3 A. The journals.

4 Q. What journals do you typically refer to?

5 A. Well, typically what happens is I have a problem,  
6 I search the Index Medicus and then whatever  
7 journal they tell me to go to, I go to. In the  
8 terms of regularly reviewing on my own, just  
9 journals that I look at, they would be Stroke,  
10 Neurology, Archives of Neurology, Annals of  
11 Neurology, Brain, Journal of Neurology,  
12 Neurosurgery and Psychiatry, Journal of  
13 Neurosurgery.

14 Q. But you did not do any type of literature review  
15 in this case?

16 A. Right.

17 Q. Now, doctor, your report is limited to the cause  
18 of Mr. Williams' stroke, correct?

19 A. Right.

20 Q. I take it that you will not be rendering any  
21 testimony whether or not Dr. Boyd or anyone in  
22 this case deviated from acceptable standards of  
23 care?

24 A. Well, I don't anticipate those questions,  
25 Obviously I don't control what's going to be

1 asked of me, but I don't anticipate those  
2 questions.

3 MS. CARULAS: We have an agreement  
4 at least, John, on the record that he will  
5 not be testifying as far as standard of  
6 care?

7 MR. LANCIONE: Right, correct.

8 Q. Mr. Lancione, did you hear, has represented that  
9 he will not question you about that so I will not  
10 get into that area with you.

11 What is your opinion as far as the cause of  
12 Mr. Williams' injuries?

13 A. You mean his stroke?

14 Q. Right.

15 A. My opinion is that the stroke was -- I have to  
16 look at my letter. My opinion is what I said in  
17 the letter, that Mr. Williams suffered a right  
18 hemispheric stroke as a result of medical  
19 complications resulting from a prolonged illness.

20 Q. And what is your basis for that?

21 A. Well, at the time he had his stroke he was a  
22 fairly sick individual. He had -- he was  
23 probably septic, febrile, had a very high white  
24 count, fluctuating blood pressure, probably  
25 dehydrated from the fever, had just had focal

1 seizures on the right hemisphere.

2 And he was a very sick individual, and that  
3 was certainly the cause of the stroke rather than  
4 to say that this was a coincidental stroke that  
5 he was going to have anyway. It's hard to argue  
6 that he was just going to have a right  
7 hemispheric stroke on this date absent the  
8 serious medical illness that he suffered.

9 Q. All right. Let me understand what you are saying  
10 specifically caused the stroke. Tell me what  
11 factors caused the stroke in your opinion.

12 A. He had an occluded artery in the right hemisphere  
13 or perhaps even the right neck. We don't have --  
14 I didn't see a workup for the etiology of the  
15 stroke, you know, pathologic physiology of the  
16 stroke. But I think it's safe to say that he had  
17 an occluded artery being supplied to the right  
18 hemisphere.

19 Q. Would you expect to see that on a CAT scan?

20 A. Well, you won't see the occluded artery. You may  
21 see the footprints of it. Depends on what artery  
22 and the quality of the CAT scan and, you know,  
23 whether the patient was cooperative, moving.

24 Q. But would you expect to see some evidence of, as  
25 you call it, a footprint on the CT scan?

1 A. Yes. I know that he did not have -- he had two  
2 normal CAT scans. But that happens from time to  
3 time. It doesn't mean he didn't have a stroke.

4 Q. All right. So you are saying he had an occluded  
5 artery somewhere, correct?

6 A. Right.

7 Q. What caused the occluded artery?

8 A. Well, I think the occluded artery occurred  
9 because -- or the artery occluded because of the  
10 medical complications, dehydration, fever,  
11 sepsis, elevated white count, probably acute  
12 phase approaching to the bloodstream, hastened  
13 coagulation, fluctuating blood pressure, He had  
14 -- I don't know if he had ongoing seizures, but  
15 he may have had ongoing subclinical seizures.

16 Q. All right.

17 A. But basically he was -- people when they get  
18 medically sick can suffer a stroke.

19 Q. What in your opinion caused the seizures?

20 A. I think he probably had an ischemic event,  
21 ischemic insult, to the right hemisphere.

22 Q. And how did that occur?

23 A. Well, he did have an episode of hypotension, but  
24 it could have been an embolus, it could have been  
25 a local drop in blood pressure. There was

1 disturbance of cerebral blood through to the  
2 right hemisphere because of his medical  
3 instability.

4 Q. All right. Fair to say that you are unable to  
5 state to a reasonable degree of medical  
6 probability that was the exact etiology of the  
7 seizure?

8 A. Within -- all I can do is give you a range of  
9 possibilities, all of which would be within  
10 reasonable medical certainty, but I can't say  
11 which ones would lead to the event.

12 &- So the possibilities you are saying are an  
13 embolus or a local drop in blood pressure?

14 A. Right, or some ischemic event in the right  
15 hemisphere I think is the generally category, It  
16 could have been sepsis, could have been some  
17 metabolic disturbance as a result of his medical  
18 complications.

19 Q. What evidence did you see that this patient was  
20 septic?

21 A. Well, the notes indicate that -- they talk about  
22 his being septic. I'll see if I can find them if  
23 you want me to find those, but they say that he  
24 was probably septic at the time. He had a very  
25 high fever and high white count and a drop in his

1 blood pressure and they thought that he was  
2 suffering septic shock at the time.

3 Q. Would you expect evidence of organisms in the  
4 blood or is that something that's outside of your  
5 specialty?

6 A. A little bit. It is, but I certainly would not  
7 doubt that somebody was septic just because you  
8 didn't have cultures out of the bloodstream. You  
9 couldn't say that. Certainly -- I'm sure there's  
10 many cases where people have bona fide sepsis  
11 where blood cultures are negative.

12 Q. But fair enough to say that's not your area of  
13 expertise?

14 A. It isn't. It's not my area of specialty, but  
15 certainly anybody with M.D. after their name  
16 knows that a negative blood culture does not rule  
17 out sepsis.

18 Q. Did you see any evidence of positive culture from  
19 anywhere?

20 A. I don't believe I did.

21 Q. So is it fair to say a source of the sepsis was  
22 never found?

23 A. I think that is true.

24 Q. But you base your opinion that this patient was  
25 septic on the fact that in your reading of the

1 records he had a high fever and high white blood  
2 cell count<sup>3</sup>

3 A. Well, he was diagnosed by the doctors taking care  
4 of him as being septic and he was treated as if  
5 he had sepsis with antibiotics.

6 Q. So those were your bases that they suspected  
7 sepsis, treated him and that in your opinion he  
8 had a high fever and high white blood count,  
9 correct?

10 A. Yes, and fluctuating blood pressures.

11 Q. All right. What was the cause of the sepsis?

12 A. I don't know.

13 Q. You say that the patient, the other reason you  
14 mentioned besides the seizures and the sepsis for  
15 causing the stroke were what?

16 A. Say that again.

17 Q. Earlier we were talking about what in your  
18 opinion combined could cause the stroke, correct?

19 A. Yes.

20 Q. And you had mentioned patient being septic and  
21 the seizures. Correct?

22 A. Right. And it's not clear whether or not the  
23 insult that caused the seizures also caused --  
24 ended up causing the stroke or whether the  
25 seizures may have had some role later on down the

1 road of causing the stroke. That's not clear,  
2 but I have to leave that question open.

3 Q. Okay. So just so I'm clear, you can not state to  
4 a reasonable medical probability that the seizure  
5 caused the stroke, is that fair?

6 A. Yes .

7 Q. Can you state to a reasonable medical probability  
8 whether or not the sepsis caused the stroke?

9 A. Well, I mean sepsis -- if you have -- if you want  
10 to include the fever, elevated white count, all  
11 of the things that accompanied the sepsis, He  
12 was hypoxic for a while there, the changes in his  
13 blood pressure. If you include that all under  
14 sepsis.

15 Q. So you believe there was a relationship between  
16 the sepsis and the stroke?

17 A. Right. Again, let me be sure you understand what  
18 we are calling sepsis. We are calling sepsis all  
19 of those medical complications, such as the  
20 fever, high white count, fluctuating blood  
21 pressure, changes in respiratory status, is  
22 things that the doctors called sepsis.

23 Q. All right. Anything else that you believe caused  
24 the stroke?

25 A. Well, you know, I'm not sure -- it's kind of

1 funny, English words. It all depends on what you  
2 mean by the word, cause. There's no -- I would  
3 be willing to say that Mr. Williams being a  
4 smoker had -- may have had ==-- I don't know if  
5 he did, but it's conceivable that he had vascular  
6 disease.

7 Q. All right.

8 A. So but that isn't -- I'm not sure what you mean  
9 by caused the stroke. I mean just because he had  
10 vascular disease doesn't mean he was going to  
11 have a stroke. The reason he had the stroke was  
12 because of the things that we have been talking  
13 about. He may have been set up maybe -- I don't  
14 know. He may have had -- he certainly had a risk  
15 factor for having the stroke, I suppose, but  
16 that's, you know, a far cry from saying he was  
17 going to have a stroke.

18 And so I wouldn't call that a cause of the  
19 stroke in the sense that we are talking about  
20 now, something you want to call a cause of  
21 stroke. I think it's a risk factor for having a  
22 stroke, but it's not real cause of a stroke.

23 If he hadn't been hospitalized he wouldn't  
24 have had the stroke in my opinion.

25 Q. Certainly people who smoke have a significant

1 risk of stroke?

2 MR. LANCIONE: Objection. Go ahead  
3 and answer.

4 A. I would agree with that.

5 Q. And in Mr. Williams' case you realize that he was  
6 a patient with COPD?

7 A. That's correct. I know he was a smoker, so I  
8 would say that he had some COPD.

9 Q. And obviously patients who are to the point of  
10 having such chronic lung disease are at risk of  
11 having a stroke?

12 A. If COPD is due to stroke.

13 Q. Right.

14 A. Yes, I would think that's true.

15 Q. And just because of the smoking itself, that can  
16 cause vascular disease elsewhere in the body,  
17 correct?

18 A. Yes.

19 Q. Which in turn makes one at high risk for a  
20 stroke?

21 A. I don't know what high is but --

22 MR. LANCIONE: Yes, let me object to  
23 the use the word, high, and in the previous  
24 question about smoking, the use of ~~the~~ term,  
25 significant. But go ahead and answer,

1 doctor.

2 A. I mean each person, you know, reacts  
3 differently. Some people -- you know, all these  
4 things, of course, are statistical. You know,  
5 you have a thousand of people. A thousand people  
6 smoking are clearly at risk for having a stroke.  
7 I don't know about Mr. Williams' case, whether or  
8 not if you did an arteriogram a year prior to his  
9 stroke, whether he would have whistle clean  
10 arteries or not, but as a statistical argument,  
11 smoking does raise of risk of having a stroke. I  
12 don't know -- I wouldn't use the word, high,  
13 because I don't know if it was high.

14 Q. Now, you mentioned that Mr. Williams had  
15 fluctuating blood pressure. What was the cause  
16 in your opinion of the fluctuating blood  
17 pressure?

18 A. I would have to agree with the doctors who  
19 thought it was sepsis.

20 Q. And what was the cause of his hypoxia?

21 A. Probably sepsis.

22 Q. Now, this patient had an ileus, correct?

23 A. Yes.

24 Q. Are you an expert at all in gastrointestinal  
25 issues?

1 A. Well, I'm the head of the public. I wouldn't put  
2 myself in gastroenterology --

3 Q. You say you're head of the public?

4 A. I'm head of public on this issue. I'm not sure  
5 what you mean by expert. I certainly know a fair  
6 amount about ileus. I do -- I am an internist.

7 Q. Okay. Have you ever seen a patient develop a  
8 stroke as a complication of a penile implant  
9 surgery?

10 MR. LANCIONE: Objection. Go ahead  
11 and answer.

12 A. No.

13 Q. And I take it since your practice is not in the  
14 area of GI, you have not seen a patient develop  
15 an ileus secondary to penile implant?

16 A. That's correct.

17 Q. Now, we know that Mr. Williams was discharged on  
18 December 21 and then readmitted on December 23?

19 A. Right.

20 Q. Am I safe to assume that you will not be  
21 testifying as to the issues of what difference  
22 treatment on the 21st versus the 23rd would have  
23 mattered for Mr. Williams?

24 A. Again, I don't know what questions are going to  
25 be asked of me. But I don't think I'm going to

1 answer that. I probably wouldn't be qualified to  
2 answer that.

3 Q. That's all I want to know, whether or not you  
4 feel you have the expertise to render an **opinion**  
5 as to how Mr. Williams' course would have been  
6 different --

7 A. Yes, I don't think I'm going to be able to answer  
8 that question.

9 Q. Fair enough. All right. So your testimony is  
10 strictly based upon the cause of the stroke?

11 A. Right.

12 Q. Do you believe the ileus had anything to do with  
13 the stroke?

14 A. Only indirectly if it somehow was the cause of  
15 the sepsis, somehow related to the sepsis, but by  
16 and of itself, the ileus didn't cause the stroke.

17 Q. And in your opinion -- or explain to me, do you  
18 have an opinion that the ileus caused the sepsis?

19 A. I don't know.

20 Q. So you are unable to state to a reasonable  
21 degree of medical probability that the ileus  
22 caused the sepsis?

23 A. Yes, that's a little out of my field.

24 Q. Do you have any knowledge or opinion as to  
25 Mr. Williams' present status?

1 A. My understanding is that he's still quite  
2 disabled on his left side. I don't have -- I  
3 haven't examined him and I don't plan to examine  
4 him unless the case goes to trial in which case I  
5 will arrive a day early and examine Mr. Williams  
6 before trial.

7 Q. Well, this is our one and only opportunity here  
8 to take your deposition as to this issue, and my  
9 question to you at this point is beyond what you  
10 have in the records, you do not have an opinion  
11 as to his present condition beyond what you **knew**  
12 at the time that he was discharged from the  
13 hospital, is that fair enough?

14 A. Well, I have knowledge that he is probably not  
15 making a significant recovery. I would think  
16 that he is probably still quite **paretic** on his  
17 left side.

18 Q. You mentioned that you saw a few records, the lab  
19 in April of '92 an x-ray from April 6, '92, and  
20 an EKG of April 22, 1992?

21 A. Yes. Let's see. Yes.

22 Q. Which would have been subsequent to his  
23 discharge. Were those documents of any  
24 significance to your opinions?

25 A. Let me find them because I don't recall what they

1 showed.

2 Q. Okay. I believe that's all I have. My request  
3 to you is that if you develop any additional  
4 opinions in this case, review anything  
5 additional, that you advise Mr. Lancione of that  
6 and so I will be apprised of it. Fair enough?

7 A. Okay. I just need to get your address.

8 Q. Certainly. Mr. Malone is on the line and he may  
9 have some questions for you.

10 A. Go ahead.

11 - - - -

12 CROSS-EXAMINATION OF SHELDON L. MARGUILIES, M.D.

13 BY MR. MALONE:

14 Q. Dr. Marguilies, my name is Jim Malone. I'm the  
15 hospital attorney. And I really only have one  
16 question for you but it might take me a couple of  
17 questions to get to it. All right?

18 A. Your choice.

19 Q. I suppose you could hang up if you want to.

20 A. No problem. Go ahead.

21 Q. In your opinion more probably than not this  
22 gentleman's stroke was an embolic event or an  
23 occlusive event versus a devascularization event  
24 of some other etiology?

25 A. I don't know whether or not this was an embolic

1 or in situ thrombosis. There weren't any  
2 vascular studies on the patient.

3 Q. I understand that. And that's why I'm asking  
4 that question.

5 A. I can't distinguish those.

6 Q. The end result of stroke is the loss of brain  
7 tissue, is it not, that is, the death of brain  
8 tissue on a localized basis?

9 A. Yes .

10 Q. And that result follows either a hemorrhagic  
11 event in the brain or a devascularizing event in  
12 the brain, is that generally true?

13 A, Yes .

14 Q. The CT scans here because they're negative would  
15 suggest the absent of a cranial hemorrhage, do  
16 they not?

17 A. Yes.

18 Q. You would certainly see evidence of a cranial  
19 hemorrhage on one of the two scans this gentleman  
20 had?

21 A. I would agree with that.

22 Q. And they were both negative, were they not?

23 A. Right.

24 MR. MALONE: That's all I have.

25 Thanks, doctor.

1 A. Okay.

2

- - - -

3

(Thereupon, a discussion was had off  
4 the record.)

5

6

MS. CARULAS: Doctor, what would you

7

like to do as far as waiver of signature?

8

A. I think I'll waive it. It was short. It was  
9 clear.

10

(Signature waived.)

C E R T I F I C A T E

The State of Ohio, ) SS:  
County of Cuyahoga.)

I, Sandra L. Mazzola, a Notary Public within and for the State of Ohio, authorized to administer oaths and to take and certify depositions, do hereby certify that the above-named SHELDON L. MARGUILIES, M.D. was by me, before the giving of his deposition, first duly sworn to testify the truth, the whole truth, and nothing but the truth; that the deposition as above-set forth was reduced to writing by me by means of stenotypy, and was later transcribed into typewriting under my direction; that this is a true record of the testimony given by the witness, and the reading and signing of the deposition was expressly waived by the witness and by stipulation of counsel; that said deposition was taken at the aforementioned time, date and place, pursuant to notice or stipulation of counsel; and that I am not a relative or employee or attorney of any of the parties, or a relative or employee of such attorney, or financially interested in this action.

IN WITNESS WHEREOF, I have hereunto set my hand and seal of office, at Cleveland, Ohio, this 23rd day of March 1991 A.D..

  
Sandra L. Mazzola, Notary Public, State of Ohio  
14237 Detroit Avenue, Cleveland, Ohio 44107  
My commission expires January 12, 1997
