BERNARD OWENS, M.D.

called by the plaintiff for examination under the Rules,
having been first duly sworn, as hereinafter certified,
was deposed and said as follows:

CROSS EXAMINATION

BY MR. NORTON:

Q. Tell me your full name, please?

A. Bernard J. Owens, 111.

Q. What is your occupation?

A. I am a surgeon.

Q. Where did you obtain your medical training?

A. I finished medical school in New York, in
Brooklyn, New York, at the State University of New York,
and did surgical training at University of North
Carolina, as well as at Charlotte Memorial Hospital, now
Carolinas Medical Center in Charlotte.

Q. What year did you graduate from medical school?

A. '72.

Q. And what year did you complete your last year of
residency?

A. My last year of training, I completed in 1980.

Q. And where was that?

A. That was at the Naval Regional Medical Center in
San Diego, California.

Q. And what professional affiliation did you have

1 after 1980, where did you go next, in other words?

2 A. I was chief of vascular surgery for the United

3 States Navy at Portsmouth Naval Hospital.

4 Q. For how long?

5 A. Three years.

6 Q. That is in 1983, right?

7 A. Yes, sir.

8 Q. Then where did you go after that?

9 A. I practiced for about ten years in Greensboro,

10 North Carolina, doing general and vascular surgery.

11 Q. To '93?

12 A. To '93, January -- December 31st. And then moved

13 to Michigan for two years.

14 Q. Where were you in Michigan?

15 A. St. Joseph, Michigan.

16 Q. That is a city, St. Joseph?

17 A. Yes.

18 Q. What hospital?

19 A. I am not sure I can remember. I think it was

20 Lakeland Regional. I am sorry, I don't recall.

21 Q. In what capacity were you associated with that

22 hospital?

23 A. I was a vascular surgeon, I did vascular surgery

24 for a group called Cedarwood Medical Center, they were my

25 employers.

1 Q. That would be to 1995?
2 A. Yes, sir.
3 Q. Where did you go after that?
4 A. I moved to New York for a short period of time, I
5 was with a group called Carmax, C-A-R-M-A-X.
6 Q. Is that in the City of New York?
7 A. No, sir, it is on Long Island, it is in a place
8 called Patchogue, East Patchogue.
9 Q. How do you spell that?
10 A. P-A-T-C-H-O-G-U-E. It is an Indian name. It is
11 on Long Island, on the South Shore.
12 Q. How long were you there?
13 A. I was only there a few months. After that I moved
14 to a place called Poplar Bluff, Missouri.
15 Q. And what hospital or group were you affiliated
16 with in Poplar Bluff?
17 A. I was back in solo private practice, I was
18 affiliated with a hospital called Lucy Lee Hospital.
19 Q. Spell that, please.
20 A. L-U-C-Y, first name, second is Lee, L-E-E. And
21 that is in Poplar Bluff.
22 Q. That would have been in 1995?
23 A. No, sir, 1996. From 1996 to 1998.
24 Q. And after 1988, where did you go?
25 A. 1998.

1 Q. 1998.

2 A. I moved to Cleveland and joined Kaiser.

3 Q. Was that your first relationship with Kaiser?

4 A. Yes, sir.

5 Q. What group did you join?

6 A. I joined OPMG, Ohio Permanente Medical Group.

7 Q. When in '98?

8 A. May the 14th.

9 Q. Is Ohio Permanente Medical Group a professional

10 corporation, do you know?

11 A. I am sorry, I don't know.

12 Q. You don't know.

13 Are you a member of it, or an employee?

14 A. Well, I function in both capacities. I am an

15 employee, I think that is my function.

16 Q. Okay.

17 You are not an officer or director?

18 A. No, sir.

19 Q. Do you know who the officers are?

20 A. The only officer I can think of is Ron Copeland,

21 he is our president.

22 Q. Is he a doctor?

23 A. Yes, sir.

24 Q. C-O-P-E-L-A-N-D?

25 A. C-O-P-E-L-A-N-D, yes.

1 Q. Where is he located?

2 A. North Point, somewhere around here.

3 Q. He is the president.

4 He is the only officer you are aware of?

5 A. I am not involved in that part of the corporation,

6 so I don't know. It is a very complicated situation,

7 which I don't exactly understand. We have a thing called

8 Health Plan, we have the OPMG. OPMG, the president is

9 Ron Copeland. He is the medical director. The president

10 or the chief executive officer of the Health Plan is

11 Chris DuLaney, and then there are a whole bunch of people

12 who kind of do the work, and I am sorry, I don't know any

13 of them.

14 Q. Are you compensated by OPMG?

15 A. Yes, sir.

16 Q. And how are you compensated, on a W-2 or W-9?

17 A. W-2, it is a salary.

18 Q. Salary.

19 Do you have an employment contract?

20 A. Yes, sir.

21 Q. And what are your duties?

22 A. Provide surgical services to members of OPMG --

23 patients who are members of Kaiser. They are not members

24 of OPMG, I believe.

25 Q. All right.

1 Do you directly bill the patients for your
2 services?

3 A. No, sir.

4 Q. Is your compensation as an employee of OPMG in any
5 way -- or directly related to the work that you do, in
6 other words, on a per patient or per case basis?

7 A. No, sir. No, sir. I am on a fixed salary.

8 Q. Per year?

9 A. Yes.

10 Q. So it doesn't make any difference how many
11 patients you see or treat, or how many patients other
12 members of the group would see or treat --

13 A. That is correct.

14 Q. -- your compensation remains the same?

15 A. That is correct.

16 Q. Do you maintain any record of the patients you see
17 or treat?

18 A. Other than --

19 Q. Other than the medical record, I am talking about.

20 A. No, sir.

21 Q. By the medical record, I mean the chart in the
22 hospital, or the office chart you might keep.

23 A. We have -- the record is fairly complex, even as
24 it is maintained. Of course anything we do in the
25 Cleveland Clinic is maintained by the Cleveland Clinic.

1 Anything we do in our office is kept both in a paper
2 trail where appropriate and where possible, and in a
3 computerized memory device. But I don't keep anything
4 other than that. I write my note, it is copied and put
5 in the Kaiser chart, the OPMG chart.

6 Q. So you are not creating the record designed to
7 show what services you perform for a given patient for
8 billing purposes?

9 A. Absolutely not. No, never.

10 Q. When you see patients in the office, though, you
11 say there is some record made that --

12 A. We have a chart.

13 Q. Just the normal doctors office chart --

14 A. Yes, sir.

15 Q. -- on the patient?

16 A. I believe so.

17 Q. Do you see any patients yourself privately, other
18 than Kaiser patients?

19 A. No.

20 Q. Where is your office located?

21 A. I work out of two places, I work at 10 Severance
22 Circle, and the Kaiser office on Snow Road, which is
23 12304 Snow Road in Parma.

24 Q. Now, the location in Severance Center --

25 A. Yes, sir.

1 Q. -- is that the location of the surgical group or
2 surgical department of Kaiser, if you will?

3 A. The surgery group, the group that I am most
4 closely affiliated with, we cover two -- or actually a
5 third place, we cover Willoughby. But we have three,
6 plus myself, at Parma, and Ron Copeland previously
7 mentioned does work out there, and then we have three,
8 plus myself, at Severance.

9 Q. Are there any other locations in the Cleveland
10 area where surgeons employed by Kaiser work out of?

11 A. Yes, sir. Larry Scott works out of the Willoughby
12 facility.

13 Q. Other than Willoughby, Snow Road and Severance,
14 are there any other locations?

15 A. No, sir, not that I am aware of.

16 Q. And where do you have hospital privileges?

17 A. At the Cleveland Clinic.

18 Q. Now, do your duties as an employee of OPMG
19 obligate you to consult with other OPMG physicians on the
20 care and treatment of patients?

21 A. I believe the answer is yes. I have an ethical
22 obligation to consult with other physicians whenever
23 medically indicated, and that is, I believe, what my
24 contract with Kaiser expects me to do. But I really
25 haven't read it in a long time, so I assume -- you know,

1 I pretty much have continued my practice according to the
2 ethical standards that I have always had, which would
3 ignore -- I mean, I do what I think is best for the
4 patient, always.

5 Q. Well, actually, what I am trying to learn, and
6 perhaps you can help me, is whether patient care, the
7 care of a patient who is a Kaiser member, and who is
8 being seen by doctors employed by the OPMG group, whether
9 that is sort of a collaborative effort, or is there
10 individual physician responsibility for a given patient?

11 A. There is always a sense of individual physician
12 responsibility, but I don't think that excludes
13 collaboration. We collaborate whenever we need to.

14 Q. Is there one doctor that would be following a
15 patient that would have the overall authority to make
16 decisions concerning that patient?

17 A. The patients make the decisions, sir.

18 Q. All right.

19 A. Twenty years ago, maybe we made the decisions, but
20 today, we --

21 Q. Let me rephrase it.

22 Is there any given doctor that has overall
23 responsibility, final authority to recommend what
24 treatment is given?

25 MR. HUPP: For just any patient in general,

1 you are saying?

2 Q. (Continuing) Well, I suppose what I am asking is,
3 does a Kaiser member have a personal physician?

4 A. I believe so, yes. I believe every Kaiser patient
5 has a personal physician.

6 Q. And is that the physician that has the overall
7 authority with reference to that patient among the
8 doctors in your group? Bearing in mind, of course, that
9 as you have told me, patients make the final decisions.

10 A. I guess -- can I answer with a metaphor?

11 MR. HUPP: Go ahead.

12 A. (Continuing) The only way I can answer that is,
13 everybody has got a personal physician, and it is
14 possible, for example, that your family practice person's
15 skill level might be exceeded. And so that patient may
16 be ending up in the hospital at the Cleveland Clinic on
17 an internist's service, and they may seek consultation
18 from a number of people.

19 So under those circumstances, they would never
20 discuss with the family practice person, although the
21 family is free to -- family or the patient would be free
22 to have that person come in and make a suggestion.

23 But it is not as if you have to have -- you are
24 associated with Dr. Healy, and you can't operate -- you
25 can't offer surgery until Dr. Healy approves, or you

1 can't offer a medical treatment until some physician
2 somewhere else approves. You are being cared for by the
3 physician, and that person is your main doctor for a
4 time.

5 Q. Okay. I understand what you are saying.

6 Let's take your example --

7 A. Yes, sir.

8 Q. -- where the patient's personal physician's skill
9 level has been exceeded, and the patient is admitted to a
10 hospital on the service of, as you say, an internist.

11 A. Yes.

12 Q. But that the patient's in-hospital care might
13 require the services of other specialists --

14 A. Sure.

15 Q. -- such as a surgeon.

16 A. Sure.

17 Q. Is the internist the physician who has the
18 ultimate authority to make decisions on behalf of the
19 patient?

20 A. I would say at that point, until such time as the
21 patient passes out of his care, yes.

22 Q. Okay.

23 A. He would be the captain of the ship, to bring back
24 an old, dead metaphor. I am sorry.

25 But he would direct, and assist, and say, sir, you

1 know, I would really like you to see this doctor, because
2 he might have more expertise.

3 MR. HUPP: Move to strike "captain of the
4 ship."

5 THE WITNESS: I am sorry.

6 MR. HUPP: You are not supposed to know the
7 law.

8 THE WITNESS: Excuse me.

9 BY MR. NORTON:

10 Q. So that within this collaborative endeavor in the
11 care and treatment of a Kaiser member by physicians
12 employed by OPMG, and within the scenario that we have
13 just been discussing, a hospitalized patient, might a
14 surgeon recommend a procedure to the internist on whose
15 service the patient was admitted, and the internist
16 decline?

17 A. Yes, sir.

18 Q. And the responsibility of the surgeon offering the
19 procedure ends at that point?

20 A. I think so, sir.

21 Q. The surgeon doesn't have any obligation to speak
22 directly with the patient?

23 A. I don't know. I would probably -- in my case, I
24 would probably look very carefully at that, depending on
25 the patient's ability to participate. I am not sure who

1 the decision-making person is. If appropriate, I might
2 recommend, but not usually.

3 Usually, there are good reasons for declining a
4 recommendation, and it would depend upon the strength of
5 my feeling in that regard. But I don't think there is
6 any rule about how that has to be.

7 Q. All right, I would like to talk for a few minutes
8 about Alice Tracek --

9 A. Yes.

10 Q. -- who was a Kaiser member.
11 Was she your patient?

12 A. Well, I was a consultant.

13 Q. She was not admitted to the Clinic on your
14 service, then?

15 A. I believe she was on the medical service, sir.

16 Q. You were involved in her care --

17 A. I was.

18 Q. -- in 1998?

19 A. Yes, sir.

20 Q. Where did you first see her?

21 A. As I recall, in bed at the Cleveland Clinic.

22 Q. Did you ever see her at Snow Road?

23 A. I believe I did. But I don't have that record
24 with me.

25 Q. What record would that be?

1 A. There was an outpatient record in which I may have
2 seen her.

3 Q. What record do you have with you?

4 A. I have the record from the Cleveland Clinic
5 admission that I participated in her care.

6 Q. Doctor, at Tab 5 in this binder, I have got what I
7 believe is the entire emergency room record of Alice
8 Tracek at the Snow Road facility at Kaiser --

9 A. Yes, sir.

10 Q. -- for -- I take that back. I think it is what
11 they call a CDU --

12 A. Yes, sir.

13 Q. -- admission, for July 27th. You can take a look
14 at it.

15 A. (Witness complies).

16 Q. Do you see any -- is that record at all familiar
17 to you?

18 A. I have read it.

19 Q. Before today?

20 A. Yes, sir.

21 Q. Did you make any notes in it, and having read it,
22 is your recollection refreshed to the point where you can
23 tell me whether or not you did see her in the Snow Road
24 facility in July of '98?

25 A. I can't answer that. Dr. Raykov says I saw the

1 patient. I don't remember seeing her. I was aware of
2 the patient. There is ample evidence that there was
3 telephone contact with me, and I don't have the pages
4 numbered, but at that time, there was a question of an
5 appendicalith or a fecalith, and Dr. Raykov and I agreed
6 that the safest thing for the patient would be to
7 transfer her to the Cleveland Clinic and continue the
8 treatment from there. But I do not remember seeing her.

9 Q. In looking over that section of the record, you
10 don't see any of your initials anyplace?

11 A. No, sir, I don't.

12 Q. Okay.

13 Now, I do have the emergency room record for July
14 26th, it is at Tab 4.

15 Did you ever see that record, July 26th, '98 at
16 Snow Road?

17 A. Yes, sir.

18 Q. Before today, I mean.

19 A. Yes, sir.

20 Q. Have you made any notes or initials on that
21 record?

22 A. No, sir.

23 Q. Were you present at the Snow Road facility on July
24 26th or July 27th of '98?

25 A. I doubt I would be able to answer that, but I will

1 try.

2 No, sir, I don't know.

3 If you could tell me what day that was, I might --
4 I just don't know.

5 Q. Do you work certain days of the week there?

6 A. I do. Currently, I am going out to Snow Road
7 Tuesdays and Wednesdays. But early on, as I recall, it
8 might have been just one of those days, but I don't
9 recall which.

10 Q. Okay.

11 In your consultation, you have indicated there was
12 some telephone contact at least between you and
13 Dr. Raykov, and perhaps others at the Snow Road facility?

14 A. Yes, sir.

15 Q. Did you have any information at that time as to
16 what her presenting complaint to the emergency room was?

17 A. Again -- may I?

18 MR. HUPP: Go ahead.

19 A. (Continuing) My recollection is mostly from the
20 notes that I was able to review in preparation for this.

21 The question of abdominal pain and appendicalith
22 was raised, and this would lead to a possible
23 appendicitis. And on that basis, I felt that it would be
24 best that we bring the patient over to the hospital.
25 There was also a -- beyond that, I don't recall.

1 Q Do u remember what history she gave, or did you
2 ever know what history she gave when she presented to the
3 emergency room on July 26th, '98?

4 A. Other than from the chart, no, sir.

5 Q And from the chart, what is your impression of the
6 history?

7 A. May I have yours, since you have got it out there?

8 (Thereupon, the document was handed to the
9 witness.)

10 A. (Continuing) It records complaints of abdominal
11 pain, weakness and loss of appetite for two weeks, no
12 history of fever, no extreme obesity. And they raised
13 the issue of spastic colon.

14 Q Were you aware that she had information someone in
15 the emergency room that she hadn't eaten solid food in 14
16 days prior to presenting at the emergency room?

17 A. At that time, I can't answer that I became aware
18 of that only after the patient was admitted to the
19 hospital.

20 Q. That is admitted to the Clinic?

21 A. To the Clinic, yes

22 Q Well, how soon after she was admitted to the
23 Clinic did you see her?

24 A. I saw her on the morning of the 27th.

25 Q Is it at when you learned for the first time that

1 she hadn't eaten solid food for 14 days?

2 A. I can't answer that. I don't know when I became
3 aware of it.

4 Q. At what point --

5 A. I don't know.

6 Q. -- during this admission?

7 A. I knew that she had not eaten for a long time, but
8 not until -- I can't tell you when I became aware of it.

9 Q. In connection with whatever care and treatment you
10 provided to her while she was hospitalized at the Clinic
11 in July of '98, did you ever learn of her past medical
12 history?

13 A. There was some data about the past medical
14 history. We knew that she had very, very restricted
15 activity. We were under the impression that she had used
16 laxatives. I think the remainder of the history was
17 developed during the hospitalization.

18 Q. Were you aware that she was seen in the emergency
19 room at Snow Road Kaiser facility in August of '97?

20 A. No, sir.

21 Q. Were you aware that she had a prior history of
22 diverticulosis?

23 A. Yes, sir.

24 Q. When did you become aware of that?

25 A. That was noted in the first day that we saw her.

1 Q. And were you aware that she had some prior
2 documented episodes of diverticulitis?
3 A. I would have to look at our note.
4 We recognized that she had diverticular disease,
5 yes. It is in our note of the 27th.
6 Q. Now, when you consulted with -- was it Dr. Raykov
7 at the CDU unit, in July of '97?
8 A. Yes, sir.
9 Q. Is he the one that asked you what care and
10 treatment we should provide to this woman? We,
11 meaning --
12 A. He asked my advice.
13 Q. Your advice.
14 What information do you remember he gave you?
15 A. I don't know, sir. I could only -- I would have
16 to go back to the notes that are written. I mean, I
17 don't remember, other than what is in the chart.
18 Q. But in any event, it was your recommendation that
19 she be transferred to Cleveland Clinic?
20 A. Yes, sir.
21 Q. For surgery?
22 A. No, sir.
23 Q. For surgical evaluation?
24 A. I felt it was safest for this patient to be
25 transferred to the Clinic so that we could evaluate her

1 and then offer her treatment, best possible treatment.

2 Q. And who was going to do the evaluation?

3 A. In this case, we moved her to the medical service,
4 because we felt that this was still a medical problem,
5 and that we would assist in it.

6 Q. So it was never your intention, initially, at
7 least, to have her evaluated surgically?

8 A. I didn't say that. I always seek what is best for
9 the patient. It seemed at that time that the patient
10 would be best treated by putting her on the medical
11 service and having us consult. Because based upon the
12 presentation by Dr. Raykov, we had no indications for
13 surgery at that time.

14 Q. And what was that presentation, Dr. Raykov's
15 presentation?

16 A. Well, he described a patient with some abdominal
17 pain that was relatively vague, that might have a colonic
18 pseudo-obstruction, and might have an appendicalith and
19 might not, and it was really incompletely evaluated. It
20 is very hard to make calls over the phone. And again, I
21 don't like to do that.

22 So my style is to see the patient rapidly, rather
23 than wait for -- rather than try to make a resolution
24 over the phone. And therefore I would always say, send
25 the patient in, and let's sort this out.

1 Q. Send the patient in to CCF?

2 A. Yes, sir.

3 Q. So she was admitted, then, initially to Cleveland
4 Clinic on the medical service?

5 A. Yes, sir.

6 Q. Then who would have been the responsible doctor?

7 A. The medical doctors.

8 Q. And what doctor would that be?

9 A. I don't know.

10 The note says, admit to medicine. Okay, the
11 patient was admitted to the blue team.

12 Q. What is that?

13 A. It is one of the ways they divide folks, into blue
14 versus red teams. I don't remember the -- blue, yellow.

15 MR. HUPP: He is going to ask what
16 specialty you are talking about.

17 Q. Do these teams describe teams of OPMG doctors, or
18 teams of Clinic doctors, or a combination?

19 A. I believe they are residents that are supervised
20 by OPMG doctors.

21 Q. So Cleveland Clinic residents under the
22 supervision of OPMG doctors?

23 A. Yes, sir.

24 Q. All right.

25 So from the record, you can't tell who her

1 personal physician was while she was admitted to the
2 Clinic on the medical service?

3 A. I really can't. The senior medical resident admit
4 note, Blue B, is not -- I don't have the signature for.

5 Q. Senior medical resident, that would be a Cleveland
6 Clinic person, correct?

7 A. Yes, sir.

8 Q. Wouldn't she have to be admitted on the service of
9 a Kaiser doctor?

10 A. This is a Kaiser service, I believe, the Blue B is
11 a Kaiser medical service.

12 Dr. Wong, excuse me, Dr. Wong is, I believe, the
13 medical attending.

14 Q. Now, after she was admitted to the Clinic on the
15 medical service, it was your plan to consult with those
16 doctors concerning her?

17 A. That is correct.

18 Q. And what kind of consultation were you
19 anticipating, what did you intend to explore or examine,
20 Doctor?

21 A. The first thing we did was our resident, Dr. Emad
22 Zakhary, went and saw the patient --

23 Q. Who is that?

24 A. Emad, E-M-A-D, Zakhary, Z-A-K-H-A-R-Y, went and
25 saw the patient and evaluated her, and at that time, he

1 identified a number of problems. That was the first time
2 he saw her.

3 It says, GI for EGD --

4 Q. Excuse me, what are you reading from, Doctor?

5 A. Well, it is a note from 7-28-98.

6 MR. HUPP: Progress note.

7 A. (Continuing) It is a progress note.

8 Q. At the Cleveland Clinic?

9 A. Yes, sir.

10 Q. Okay, go ahead.

11 A. And he has written down his assessment, colonic
12 pseudo-obstruction and upper GI bleeding, and at that
13 time he recommended a GI consultation, that is
14 gastroenterology, for EGD, esophagogastroduodenoscopy and
15 colonoscopy and possible decompression, and he actually
16 saw her before she was admitted and that she would be
17 admitted to Kaiser medicine. So we would follow her
18 along. And it was our belief at that time that her major
19 issues were medical and not surgical.

20 She was also seen on 7-27 --

21 Q. I am trying to find that note. What is the date
22 of it? The date you were reading.

23 A. 7-28 and 7-27.

24 Actually, I stand -- the first note is 7-27,
25 again, Dr. Zakhary. I think that is 1330.

1 Q. I see, okay. Let me stop you right there and ask
2 you some questions about that.

3 A. Okey-dokey.

4 Q. This Dr. Zakhary --

5 A. Zakhary, I think, we call him Zakhary.

6 Q. He is a resident?

7 A. Yes, sir.

8 Q. And in what service was he a resident?

9 A. He was on the Kaiser service.

10 Q. Medical?

11 A. General surgery.

12 Q. General surgery?

13 A. Yes, sir.

14 Q. All right.

15 So as a Cleveland Clinic resident on the Kaiser
16 general surgery service, would you have been an OPMG
17 doctor who would supervise him?

18 A. Yes, sir.

19 Q. So Dr. Zakhary examined her and made an assessment
20 and a plan concerning her, as I understand it from the
21 note on July 27th?

22 A. That is correct.

23 Q. And his assessment was that she had a colonic
24 pseudo-obstruction?

25 A. That is correct.

1 Q. Earlier you talked about a fecalith. Are we
2 talking about the same thing?

3 A. No, sir.

4 Q. What is a colonic pseudo-obstruction?

5 A. In colonic pseudo-obstruction, there is a failure
6 of transit through the colon, usually because of dystonia
7 or failure of the muscular propulsive mechanisms of the
8 colon.

9 Q. That would not be a mechanical obstruction, then?

10 A. No, sir.

11 Q. More aptly described as a functional obstruction?

12 A. Very well done, yes. That would be good.

13 Q. What is the proper treatment for a colonic
14 pseudo-obstruction?

15 MR. HUPP: Objection.

16 Go ahead.

17 A. I would say there is no proper treatment. You
18 have a couple of choices. There are surgical choices.
19 We would like to avoid them. There are medical choices.
20 Those are probably better.

21 It would depend on the patient's needs and wants,
22 and whether it could be controlled and also depend on the
23 history and how it had been acquired.

24 Q. Now, in connection with his plan and assessment,
25 Dr. Zakhary reports that radiology cannot -- what is

1 that, rule out cecal volvulus?

2 A. I believe so, yes.

3 MR. HUPP: Excuse me one second.

4 (Short recess had.)

5 BY MR. NORTON:

6 Q. Doctor, we have been talking about a note that
7 Dr. Zakhary made on a clinical sheet, I think it is --

8 A. Yes, sir.

9 Q. -- for the date of July 27th --

10 A. Yes, sir.

11 Q. -- '98. What was the time of that note?

12 A. I am going to say 1330.

13 Q. Now, with reference to the radiology comment, to
14 wit, radiology cannot rule out cecal volvulus, what is
15 the relationship of that comment to the colonic
16 pseudo-obstruction that appears immediately above it?

17 A. I don't know how to answer that, sir. I don't
18 know that I can answer it.

19 Q. Would that suggest maybe he was considering it was
20 the volvulus that was causing the colonic problem?

21 A. I don't know what Doctor -- there are a couple
22 of -- there are a couple of questions I can never answer
23 for anybody. And when you ask me, what did Doctor X mean
24 when he said or wrote that --

25 Q. Okay.

1 A. -- I can't touch that.

2 Q. I understand.

3 A. I don't know.

4 Q. The only reason I am asking the question is
5 because he says he discussed the issue with you.

6 A. Right.

7 Q. And within the context of that discussion --

8 A. I can go --

9 MR. HUPP: Just let him finish the
10 question.

11 THE WITNESS: Excuse me.

12 Q. -- did you gain any understanding of what he
13 possibly meant?

14 A. We were concerned. Our list of concerns would
15 include pseudo-obstruction and volvulus.

16 Q. What is volvulus?

17 A. In volvulus, a section of the bowel torses, turns,
18 twists on its blood supply, its mesentery, and that could
19 endanger the bowel.

20 Q. So when he refers to radiology, did you actually
21 have the films or just looked at radiology reports?

22 A. No, we had the films.

23 I believe what he is referring to is the
24 radiologists felt that they could not, with safety,
25 inject dye and eliminate that as a possibility.

1 Q. Okay.

2 A. That is the fact. I am not sure exactly what he

3 meant by this (indicating). But these were our concerns.

4 We had Ms. Tracek, and we were trying to find out what

5 was wrong with her, and we were trying to review the

6 lists of possible threatening diagnoses, and isolate

7 them, and pick out the best course for her.

8 Q. So following that discussion between yourself and

9 Dr. Zakhary, the recommendation was a GI evaluation, a

10 possible colonoscopy?

11 A. Yes, sir.

12 Q. And a CT to rule out free air?

13 A. Yes, sir.

14 Q. Now, CT was done, as I understand it?

15 A. I believe so.

16 Q. What was the result, no free air?

17 A. Our note says that she had no free air. The

18 abdomen, again, on the 27th, when I saw her -- I had

19 signed his note, and I also added to it -- the abdomen at

20 that time was soft --

21 Q. You signed something?

22 A. Yes, sir.

23 MR. HUPP: The question was, what did the

24 CT scan find. Just listen to the question and

25 answer it.

1 A. (Continuing) No free air, yes.

2 Q. What note are you reading from?

3 A. A note on the 27th, which in my copy is in front
4 of --

5 MR. HUPP: Well, that is just misfiled.

6 Q. Does it have a time?

7 A. No, sir.

8 Q. It is in front of what?

9 MR. HUPP: The pages are out of order in
10 our bound copy. It has an AHODH at the top.

11 MR. NORTON: Let me see what you are
12 looking at.

13 (Thereupon, the document was handed to
14 Mr. Norton.)

15 MR. HUPP: There it is (indicating).

16 Q. (Continuing) I see it.

17 Okay, so this note, at the very top, that is your
18 signature, your initials, then?

19 A. Yes, sir.

20 Q. On the date of -- well, the date is the 27th of
21 July, it is before 11:00 o'clock, but we don't know
22 when?

23 A. Yes, sir.

24 Q. All right.

25 Immediately following your note, there is a note

1 by general surgery, correct?

2 A. Yes, sir.

3 Q. 11:00 o'clock?

4 A. Uh-huh.

5 Q. What is that character after the words, general

6 surgery? Is that a 7?

7 A. I believe so.

8 Q. What does it mean?

9 A. It refers to the Kaiser unit, which is sometimes

10 called General Surgery 7.

11 Q. It is signed by a Joe Scharf?

12 A. Yes, sir.

13 Q. Is he an OPMG doctor?

14 A. No.

15 Q. Who is he?

16 A. He, at that time, was a resident with the

17 Cleveland Clinic. He still is, in a different function.

18 Q. So again, this Dr. Scharf would have been under

19 your supervision?

20 A. Yes.

21 Q. So his note reports that there was a CT without

22 contrast?

23 A. Correct.

24 Q. And then what were the findings that he is

25 reporting there, minus Z, it looks like, or is that a

1 negative?

2 A. I think that is a C with a slash over it, but I
3 can't be sure.

4 Q. Okay.

5 A. He describes -- it could be an S.

6 Spleen, left and right kidney are normal, there is
7 an adrenal nodule. There is marked dilatation of the
8 transverse colon.

9 Q. These were his comments from the CT scan?

10 A. Yes.

11 Q. Now, did you see the CT scan yourself?

12 A. I don't recall. I believe I did, but I don't
13 recall. I may have talked to -- the radiologist may have
14 called me, but I don't really recall.

15 Q. Were you aware that this CT showed this marked
16 dilatation of the transverse colon?

17 A. Yes, sir.

18 Q. What did you conclude was the cause of that?

19 A. At that time my leading diagnosis was that she had
20 a colonic pseudo-obstruction.

21 Q. And the fact that the CT showed this marked
22 dilatation didn't change that diagnosis?

23 A. No.

24 Q. Apparently there was another CT done at 11:25?

25 A. At that time, Dr. Scharf reports that there was a

1 CT with oral contrast, and again, no change, they found
2 no additional findings.

3 Q. So having performed these tests, then, Dr. Zakhary
4 makes another note, I guess, on July 28th at 8:20?

5 A. Uh-huh.

6 Q. Is that the morning or afternoon -- morning or
7 evening?

8 A. It could be morning. I would go for morning.

9 Q. And again, he reports that the patient was seen
10 and discussed with you?

11 A. Uh-huh.

12 MR. HUPP: You have to answer out loud.

13 A. (Continuing) Excuse me. Yes.

14 Q. Now, he reports that the KUB -- that is a film,
15 right?

16 A. Yes, sir.

17 Q. -- of the cecum shows a 15 -- is that right, 15
18 centimeter?

19 A. Yes, sir.

20 Q. Is that larger than normal?

21 A. Very large.

22 Q. That is not the transverse colon we are talking
23 about?

24 A. No. They felt, looking at the -- at that time,
25 they felt that looking at the KUB, the cecum was

1 enlarged.

2 Q. Is that talking about diameter, 15 centimeters?

3 A. I believe so.

4 Q. Is that almost three times the normal diameter of
5 the cecum?

6 A. The cecum can be small. It is usually bigger than
7 five centimeters. I think three times is an exaggeration.

8 But the cecum is large, floppy, relatively. I
9 have got -- certainly I have seen plenty of cecums in
10 young people, up to 90 millimeters, or nine centimeters.
11 And I would not say it is limited -- this is definitely
12 enlarged.

13 Q. What would cause it to be enlarged?

14 A. Colonic pseudo-obstruction.

15 Q. At what level of the bowel?

16 A. Oh, I think the colonic pseudo-obstruction occurs
17 throug out the bowel. There are other causes, but the
18 most likely cause in a person of this age and habitus is
19 going to be clonic pseudo-obstruction.

20 Q. So Dr. Zakhary is reporting that the KUB shows
21 this enlarged cecum --

22 A. Uh-huh.

23 Q. -- fifteen centimeters?

24 MR. HUPP: You have to say yes or no.

25 A. Yes, sir. Excuse me.

1 Q. He reports the abdomen, CT of the abdomen, shows
2 no colonic obstruction.

3 A. Correct.

4 Q. Now, again, he discussed this information with
5 you. Can we read that to mean, no mechanical obstruction,
6 or no functional obstruction, or no pseudo-obstruction?
7 What kind of colonic obstruction did the CT fail to show?

8 A. I believe he was referring to the absence of
9 mechanical obstruction, because that is our major concern
10 as surgeons, to prove that there is no mechanical
11 obstruction.

12 Q. Okay.

13 A. That would change the needs of the patient, and
14 therefore our recommended treatment.

15 Q. Is there any way to test for the presence of a
16 pseudo-obstruction medically, apart from a colonoscopy or
17 radiology?

18 A. Colonic pseudo-obstruction is a diagnosis of
19 exclusion, that is, you prove that there is not a
20 mechanical obstruction, and you go from there, and in the
21 appropriate patient with the appropriate history and
22 physical, it is a pseudo-obstruction.

23 Q. So when you talk about diagnosis of exclusion, you
24 have to check out all the other possibilities first?

25 A. Yes, sir.

1 Could I -- you should.

2 Q. You should.

3 A. I am not sure you have to.

4 Q. It would be appropriate to?

5 A. In this particular case, time, after a
6 while, begins to show you that it is a pseudo-obstruction,
7 and it is supportive. But we did make recommendations to
8 pursue this.

9 Q. Well, the plan was to further pursue the
10 possibility of a colonic pseudo-obstruction, correct?

11 A. Correct.

12 Q. Possibility of upper GI bleeding?

13 A. Yes, sir.

14 The patient was anemic, and as I recall, they did
15 find a source of bleeding, and she did require
16 transfusion. So I think those were two issues that
17 needed to be pursued, and that issue was pursued.

18 Q. And the recommendation was then to refer her to GI
19 for EGD, that would be --

20 A. Esophagogastroduodenoscopy.

21 Q. And there is something that is cut off. That was
22 1. What was 2?

23 A. My copy suggests, Kaiser medicine evaluation for
24 admission. So this evaluation may have been done in what
25 is called the clinical decision unit. At that point --

1 Q. Well, this note --

2 A. Are we looking at the same note, 7-28?

3 Q. Yes, July 28th, 8:20.

4 A. Yes.

5 Q. This is when you and Dr. Zakhary are discussing

6 this patient?

7 A. Yes, sir.

8 Q. And he is making his recommendations in

9 consultation with you and under your supervision?

10 A. Correct.

11 Q. And his recommendation was GI for EGD and

12 colonoscopy, and the second one was what?

13 A. Colonoscopy, and admission to Kaiser, to medicine.

14 We are saying, this is a medical problem.

15 Q. Can I see the note?

16 A. Yes.

17 Q. Okay, so you want to have a GI done, and then

18 admit to Kaiser medicine for further evaluation?

19 A. Yes, sir.

20 Q. What did you anticipate that Kaiser medicine would

21 do to further evaluate colonic pseudo-obstruction?

22 A. The next step, we felt, was possible colonoscopy

23 and input from our colleagues in gastroenterology.

24 Q. so --

25 A. May I --

1 MR. HUPP: Just answer the question,
2 Doctor.

3 A. (Continuing) Excuse me. Go ahead.

4 Q. Well, I read the note as two recommendations, one,
5 GI colonoscopy?

6 A. Uh-huh.

7 Q. Two, admit to Kaiser medicine for possible
8 admission.

9 A. Uh-huh.

10 Q. Coming back to my question, what did you
11 anticipate Kaiser medicine would do to either rule out or
12 rule in colonic pseudo-obstruction?

13 A. I think at that point it was in the hands of the
14 GI people.

15 Q. Okay.

16 So GI would be encompassed within the general
17 description of Kaiser medicine?

18 A. We said specifically, GI consult. So the
19 mechanics are that if it is a GI problem and nonsurgical,
20 then in-hospital care is supported by the medical
21 service.

22 Q. How does an upper GI operate to either rule in or
23 rule out colonic pseudo-obstruction?

24 A. Oh, it has no function in that. The issue of her
25 anemia also needed to be pursued. She had a number of

1 problems, other than this, including dehydration,
2 generalized weakness. Our function at the first visit
3 was to say, okay, does this patient have a surgical
4 problem, does she need immediate attention in that
5 regard.

6 Q. I just want -- the question was, the upper GI,
7 then, is for the bleeding?

8 A. Yes, sir.

9 Q. Did you anticipate that there would be a
10 colonoscopy, as well?

11 MR. HUPP: Objection.

12 Go ahead, the best you can answer.

13 A. Yes, sir.

14 Q. And can you tell me how a colonoscopy would
15 operate to either rule in or rule out colonic
16 pseudo-obstruction?

17 A. We had a CT that showed a patent colon. We would
18 like to have supported this, to make sure that there is
19 nothing missed on the CT.

20 CT is a wonderful device, and in 1998, was better
21 than it was in 1980. But we would certainly like to see
22 that indeed there was no obstruction.

23 Secondly, we would like to look for intrinsic
24 lesions, is there anything else that could be causing
25 this.

1 And thirdly, we already talked about this being a
2 diagnosis of exclusion, but viewing the mucosa of the
3 colon, you could see -- you can note the absence of
4 appropriate movements, you could look at the vascular
5 integrity of the colon, and so you would support that
6 diagnosis with colonoscopy.

7 Q. So if I understand your answer, the function of
8 the colonoscopy would be to support your earlier belief
9 that there was no mechanical obstruction?

10 A. Correct.

11 Q. So as of the time that you anticipated that a
12 colonoscopy would be performed, you had not definitively --
13 definitely, rather, ruled out the possibility of a
14 mechanical obstruction?

15 A. To the best of our ability at the time, we had
16 eliminated that, to the point where we felt that offering
17 surgery was inappropriate, and we -- you always would
18 like a little bit of support, but we were pretty
19 comfortable with our diagnosis at that time.

20 However, we never turn anybody loose. We keep an
21 eye on them throughout, because information may change,
22 or the situation may change. And so we would like to
23 be -- you can never get too much security, I guess is one
24 way to put it.

25 Q. I understand that.

1 But as of the time that Dr. Zakhary wrote this
2 note on the 28th at 8:20 after consultation with you, and
3 suggested the admission to Kaiser medicine to rule out
4 the colonoscopy, at that time --

5 A. Yes, sir.

6 Q. -- I mean, rule out the colonic pseudo-obstruction,
7 at that time, did you believe that she had no mechanical
8 obstruction?

9 A. I did.

10 Q. And the purpose of the colonoscopy that you
11 anticipated, then, was just to further confirm that?

12 A. Yes, sir.

13 Q. Now, I think we have established that the
14 colonoscopy itself was for the purpose of excluding
15 mechanical obstruction, not for the purpose of proving or
16 disproving pseudo-obstruction?

17 A. I don't think you can separate the two, sir. I
18 think that --

19 Q. All right, let me ask it a different way.

20 MR. HUPP: Well, did you finish your
21 answer?

22 THE WITNESS: Yes.

23 MR. HUPP: Okay.

24 Q. (Continuing) A colonoscopy will operate to find a
25 mechanical lesion if one is present?

1 A. May, yes.

2 Q. May.

3 And that is why you thought it appropriate that
4 she have one?

5 A. Yes, sir.

6 Q. But if in fact there is no mechanical obstruction
7 found on colonoscopy, what information, if any, will a
8 colonoscopy provide as to either the presence or absence
9 of pseudo-obstruction?

10 A. Again, you will see enlargement, which we
11 expected, and you will see dystony, that is no movement
12 in the colon, and it would be very flaccid, very
13 enlarged, and then you will not see anything else causing
14 a problem, such as a luminal lesion or mucosal lesion.

15 Q. Beyond the colonoscopy, what additional procedures
16 or treatments, if any, did you anticipate that the
17 medical service would provide on the issue of pseudo --
18 colonic pseudo-obstruction?

19 A. At that time, I thought no other was necessary.

20 Q. Now, was it your plan to continue to follow this
21 patient after Kaiser made the decision -- Kaiser medicine
22 made the decision to admit her, or whatever?

23 A. We would stand by, we would always be ready for
24 any change, and she would stay -- I would be the
25 attending that they would call. But there was very

1 little role for us at that time. We had very little to
2 offer her.

3 We did see her again on the 29th, and I visited
4 her on the 29th, as well.

5 Q. The 29th, that was after, then, Dr. Vogten -- I
6 think it was Dr. Vogten -- did the upper GI?

7 A. Yes, sir.

8 Q. At that time, had he done the colonoscopy?

9 A. To my knowledge, no colonoscopy was done during
10 this admission.

11 Q. On the 29th note, it has the word, Versed?

12 A. Visit.

13 Okay, visit.

14

15

16

17

18

19

20

21

22

23

24 private practice, for example, there are many people that
25 I would continue to visit. Under those circumstances, I

1 would charge a fee. I would just say, Dr. Mrs Jones,
2 having done, the medical guy is doing okay I have
3 no role in her care at that time, until such time as we
4 have a change in diagnosis

5 Q Did you ever see Dr. then, after the 29th?

6 A. I do not recall seeing her after the 29th

7 Q Is there any note in the chart of yours after the
8 29th?

9 A. May I look?

10 Q. Sure.

11 A. No, sir.

12 Q A. once Dr admitted, you did learn that she
13 hadn't eaten solid food for 14 days prior to her
14 representation to the emergency room?

15 A. Yes, sir.

16 Q. You were aware of the fact that Dr had a dominant
17 complaints?

18 A. Yes, sir.

19 Q. You were aware of the films, the CT that showed
20 dilated transverse colon?

21 A. Yes, sir.

22 Q. The flat films that showed the possibility of
23 cecal volvulus?

24 A. That was excluded by the CT, yes

25 Q But a sacum of 15 centimeters in size?

1 A. Is large, yes.

2 Q. Were you also aware of her nutritional state?

3 A. That was in the hands of the medical people.

4 Q. As a surgeon, isn't it something you would want to
5 know, what her nutritional state was?

6 A. If I was considering surgery, it would be very
7 important. But from the first or second day forward, we
8 had no indication to consider surgery.

9 Q. Did you ever look at her labs?

10 A. I did.

11 Q. When?

12 A. Probably when I first saw her.

13 Q. So that - yes, there were laboratory tests taken
14 on the day of admission. So you would have been aware of
15 those labs?

16 A. Yes, sir.

17 Q. Those labs show an albumin of 2.0?

18 A. Yes, sir.

19 Q. What is the significance of that to you?

20 MR. HUPP: Objection.

21 Go ahead.

22 A. Number one, it is abnormal; number two, it is low --

23 Q. It is near starvation, isn't it?

24 MR. HUPP: Well, wait a minute, let him
25 answer your question, please.

1 MR. NORTON: Okay.

2 A. Number three, it provides her a higher risk for

3 surgery, if it is contemplated, and certainly supports

4 our decision to avoid surgery if at all possible.

5 Q. It is near starvation?

6 A. I don't know that I can answer that.

7 Q. When it is supported by the calcium level of 7.2,

8 it suggests a --

9 A. She is malnourished.

10 Q. A severe state of malnourishment?

11 A. Yes, sir, she is malnourished.

12 Q. Okay.

13 So this woman is transferred to the Clinic on your

14 recommendation --

15 A. Yes, sir.

16 Q. -- and you are a surgeon, for evaluation of

17 abdominal complaints?

18 A. Yes, sir.

19 Q. You consider the possibility of pseudo-obstruction,

20 you are aware that she hadn't eaten for 14 days, you are

21 aware of a prior history of diverticulosis and

22 diverticulitis, correct?

23 A. Yes, sir.

24 Q. Did you make any recommendation to anyone about

25 improving her nutritional status?

1 A. I don't recall.

2 Q. Do you believe that it was important, given this
3 history and these findings that we have just discussed,
4 to find out why this woman couldn't eat solid food for 14
5 days?

6 MR. HUPP: Objection.

7 A. On a theoretical basis, it is certainly
8 reasonable. It is also something that we expected the
9 medical folks to do.

10 Q. How would they do that?

11 A. History and physical. I think the patient, as I
12 recall, had a history of cessation of oral intake.
13 Perhaps they could have started her on some -- had a
14 dietician look at her and start her on some intake.

15 But may I --

16 MR. HUPP: Go ahead, if you are not
17 finished.

18 Q. Go ahead.

19 A. Our issue was to establish the need for surgical
20 intervention, and once we considered that that was not
21 appropriate, then we asked the medical people to take
22 over her care.

23 Q. Okay.

24 A. We had no place in that.

25 Q. But when you first saw her, you knew that she had

1 a history of no solid food for 14 days prior to her
2 presentation to the emergency room, you have told me
3 that.

4 A. Yes, sir.

5 Q. Well, did you ask her why she didn't eat solid
6 food?

7 A. We were in the process of working up her
8 theoretical appendicitis, which we excluded. We looked
9 at her colon problems, which we excluded as surgical
10 events, and once again, we turned her over to the medical
11 folks for care.

12 Q. My question was, did you ask her why she wasn't
13 eating for 14 days?

14 A. I don't recall.

15 Q. Did you ever look at the emergency room record and
16 find that the reason she gave on presentation was that
17 she wouldn't eat because it gave her stomach pains,
18 cramping?

19 A. I recall she had pain when she ate, but also there
20 was some question about whether she was avoiding food to
21 lose weight, that was also mentioned. But that still
22 doesn't make it a surgical issue.

23 Q. Well, if in fact Mrs. Tracek did have a mechanical
24 obstruction, then that would impair her ability to eat,
25 correct?

1 MR. HUPP: Objection, hypothetical.

2 Go ahead, you can answer.

3 A. Yes, sir.

4 Q. And even if you fed her intravenously, the
5 mechanical obstruction would impair her ability, correct,
6 to achieve a better nutritional state?

7 MR. HUPP: Objection.

8 A. I don't know. I think you can now -- at least
9 theoretically you can feed people completely by TPN. It
10 has got risks. I wouldn't want to do it unless the
11 patient needed it and there was a clear indication.

12 Q. Apart from that, if the dietician were to have
13 ordered some very nutritional regimen of food that she
14 would have to take orally and she had a mechanical
15 obstruction, it wouldn't work if she couldn't swallow the
16 food -- or couldn't digest the food?

17 MR. HUPP: Objection, hypothetical.

18 A. I guess that is true.

19 Q. Were you aware of what the cause of death was in
20 this case?

21 A. I became aware when I read the chart, which was
22 urosepsis.

23 Q. And what was the urosepsis due to?

24 A. An infection of the urinary tract infection -- or
25 an infection of the urinary tract.

1 Q. And why was she unable to deal with that
2 infection?
3 A. I don't know.
4 Q. Did her state of malnutrition have anything to do
5 with it?
6 A. It may have been part of the problem, but I don't
7 know that.
8 Q. Were you consulted by medicine as to whether or
9 not Alice Tracek should be discharged before her
10 condition had been diagnosed?
11 A. I don't recall.
12 Q. Are you aware that she was discharged without --
13 A. Yes, sir.
14 Q. -- a diagnosis ever having been made?
15 MR. HUPP: Objection.
16 A. No, sir. She had a diagnosis. She did not have a
17 colonoscopy.
18 Q. What was the diagnosis?
19 A. Well, mine was pseudo-obstruction.
20 Q. Okay.
21 A. And I don't recall what they -- I would have to
22 take a look at the discharge summary.
23 I don't have a discharge -- I don't believe I have
24 the discharge summary in this. May I look at yours?
25 Q. You are talking about a typewritten discharge

1 summary?

2 A. Yes, sir.

3 MR. HUPP: You mean for this admission?

4 MR. NORTON: Right.

5 MR. HUPP: I don't know if there is one.

6 MR. NORTON: What?

7 MR. HUPP: I don't know if there is one.

8 MR. KWARCANY: I have got it.

9 MR. NORTON: How about this?

10 (Thereupon, the document was handed to the
11 witness.)

12 A. (Continuing) They called it irritable bowel
13 synarome, Dr. Wong was the attending. They also
14 identified hiatal hernia, malnutrition, morbid obesity,
15 immobility and diverticulosis.

16 Q. Did that discharge diagnosis include any reason
17 for her malnourished state?

18 A. It indicates that the issues are not closed and
19 that further evaluation will be completed both by her
20 primary care and by the gastroenterologist, and there is
21 a description of an intention to obtain colonoscopy as an
22 outpatient.

23 Q. And you are aware that the colonoscopy hadn't been
24 performed during the July admission to the Clinic?

25 A. I am.

1 Q. Did you have any discussion with Dr. Vogten about
2 that procedure?

3 A. No, sir.

4 Q. Do you know who he is?

5 A. Yes, sir.

6 Q. Have you ever discussed this case with him?

7 A. No, sir.

8 Q. Do you know why he didn't do the colonoscopy while
9 she was hospitalized?

10 A. No, I don't.

11 Q. Do you believe that it should have been done?

12 MR. HUPP: Objection.

13 A. I requested, I suggested, I indicated, we thought
14 it was part of the evaluation.

15 MR. NORTON: Okay, thanks a lot, Doctor. I
16 am done.

17 MR. HUPP: Questions, gentlemen?

18 MR. SCOTT: I don't have any.

19 MR. KWARCANY: No questions.

20 MR. HUPP: We are going to order a copy so
21 the doctor can read it.

CERTIFICATE

State of Ohio,)
) *ss:*
County of Cuyahoga.)

I, Ivy J. Gantverg, Registered Professional Reporter and Notary Public in and for the State of Ohio, duly commissioned and qualified, do hereby certify that the above-named BERNARD OWENS, III, M.D., was by me first duly sworn to testify to the truth, the whole truth, and nothing but the truth in the cause aforesaid; that the deposition as above set forth was reduced to writing by me, by means of stenotype, and was later transcribed into typewriting under my direction by computer-aided transcription; that I am not a relative or attorney of either party or otherwise interested in the event of this action.

IN WITNESS WHEREOF, I have hereunto set my hand and seal of office at Cleveland, Ohio, this 17th day of November, 2000.

Ivy J. Gantverg, Notary Public
in and for the State of Ohio.
Registered Professional Reporter.
My commission expires November 5, 2003.

Re: William C. Tracek, Admr.
vs.
Kaiser Permanente, et al.
Case No. 400269

Dear Mr. Hupp:

Enclosed please find the transcript of the deposition of Bernard Owens, III, M.D. which you have ordered.

Please have the witness read the deposition, make any corrections using the blue "Lawyer's Notes" sheet, and sign on page 53 of the transcript. When this has been accomplished, please return copies of said pages to me.

Please advise the witness that pursuant to the Ohio Rules of Civil Procedure, if the transcript is not signed within seven (7) days of receipt of this letter, unless otherwise stipulated by counsel, it may be filed without signature.

Very truly yours,

Ivy J. Gantverg,
Registered Professional Reporter
