THE DEPOSITION OF SHOBHA R. TAMASKER, M.D.  
TUESDAY, APRIL 27, 1999  
- - - - -

The deposition of Shobha R. Tamasker, M.D., a  
Witness herein, called by the Plaintiffs for  
examination pursuant to the Ohio Rules of Civil  
Procedure, taken before me, the undersigned, Tracy L.  
Barker, a Registered Professional Reporter and Notary  
Public within and for the State of Ohio, taken at the  
offices of Gallagher, Sharp, Fulton & Norman, Seventh  
Floor Bulkley Building, Cleveland, Ohio, commencing at  
2:15 p.m., the day and date above set forth.

**CADY & WANOUS REPORTING SERVICES, INC.**

SHOBHA R. TAMASKER, M.D.

of lawful age, called by the Plaintiffs for examination pursuant to the Ohio Rules of Civil Procedure, having been first duly sworn, as hereinafter certified, **was** examined and testified **as follows:**

EXAMINATION OF SHOBHA R. TAMASKER, M.D.

BY MR. LANSLOWNE:

Q Doctor, would you state your full name for the record, please.

A My name is Shobha, S-H-O-B-H-A, that's first name, R. Tamasker, T-A-M-A-S-K-E-R.

Q Thank you very much. Doctor, I'm going to be asking you some questions today relating to care and treatment of Patricia Tippie, a former patient of yours, and issues relating to the lawsuit that is currently pending in the Common Pleas Court of Cuyahoga County. You understand that that's our purpose for being here?

A Yes.

Q If at any time you don't understand my question, if I use a medical term incorrectly, please tell me that and we'll try and get the question to match up with the answer. Okay?

A Okay.

1 Q If at any time you don't hear my question, the  
2 whole question, every word in it, please tell me  
3 that, and we'll restate it so that you do hear  
4 it. All right?

5 A Okay.

6 Q **If** at any time you need to take a break **for** any  
7 reason, please feel free to do **so**. All right?

8 A Sure.

9 Q Have you given depositions before?

10 A Yes.

11 Q On how many occasions?

12 A I think once.

13 Q Once before? When was that?

14 A This was, I think, '95, something like that.

15 Q And what was that in connection with?

16 A This was another case of a malpractice suit.

17 Q And did that case go to trial?

18 A One day.

19 Q It went to trial for one day?

20 A Yes.

21 Q What happened?

22 A Then it **was** just settled out of court.

23 Q It settled?

24 A Yes.

25 Q Was that here in Cuyahoga County?

1 A Yes.

2 Q Have you been involved in any other medical  
3 negligence cases as a defendant?

4 A Yes.

5 Q How many?

6 A I don't know.

7 Q But you only gave a deposition in one case?

8 A Right.

9 Q What happened to the other cases?

10 A Many of them, they never followed anywhere.  
11 Sometimes it was -- this was a long time ago,  
12 and they just settled for medical bills or  
13 something like that.

14 Q Have you ever testified in a court?

15 A Yes.

16 Q Was that in that one case that you talked about,  
17 or a different one?

18 A No, that was as a witness.

19 Q As a witness in a medical case?

20 A Yes.

21 Q And how was it you came to become a witness in  
22 that case?

23 A I took care of this woman who I got from the  
24 emergency room.

25 Q Any other court testimony?

1 A No.

2 Q What have you reviewed in preparation for your  
3 testimony today?

4 A Just my original chart of Mrs. Tippie.

5 Q Your office chart?

6 A **Yes.**

7 Q Did you review the hospital chart?

8 A No, not recently.

9 MR. AUCIELLO: There are parts  
10 of the hospital chart in her record.

11 Q Did you review any medical literature?

12 A No.

13 Q Did you do any kind of a search on the Internet  
14 for literature relating to this matter?

15 A No.

16 Q Have you ever, since the time of the filing of  
17 this lawsuit, which is now several years ago,  
18 done any kind of review or research into the  
19 literature relating to episiotomies and repairs?

20 A I did not do any kind of research, no.

21 Q Well, have you looked at any material relating  
22 to those subjects since the filing of this  
23 lawsuit?

24 A Not particularly this patient, but, yes, I read  
25 books, but I don't -- this is '94 you're talking

1 about.

2 Q Right. Are you saying that you saw literature  
3 that related to episiotomies and lacerations and  
4 repairs, but it was just as a matter of course  
5 in your practice?

6 A Right.

7 Q You've never done any specific looking at  
8 literature for purposes of this lawsuit,  
9 correct?

10 A No. Correct.

11 Q All right. Do you know a Dr. Maddoff?

12 A No.

13 Q How about a Dr. Sogor?

14 A Dr. Sogor I have come across.

15 Q And how is it that you know him?

16 A I used to work for Planned Parenthood and I knew  
17 him from there, and I met him different places.

18 Q Have you discussed this case with Dr. Sogor?

19 A No.

20 Q Have you discussed this case with Dr. Maddoff?

21 A No.

22 Q Other than your counsel, who have you discussed  
23 this case with?

24 A My counsel, before Mr. Auciello there was Susan  
25 Sanker who used to be my counsel.

1 Q Right.

2 MR. AUCIELLO: Anybody who  
3 wasn't your attorney that you talked with.

4 A This was many times we're talking with people,  
5 but nothing specifically about the case.

6 Q Other than what you brought with **you** today -- or  
7 let me repeat that.

8 You brought your office chart with you  
9 today?

10 A The entire chart, yes.

11 Q Do you have any other records besides the office  
12 chart that relate to Patty Tippie?

13 A No.

14 Q Any notes or diaries or anything like that?

15 A No.

16 Q Your counsel was kind enough to provide me with  
17 a copy of your curriculum vitae. Is this a  
18 current vitae here?

19 A Quite current.

20 MR. LANSDOWNE: Let's mark this.

21 - - - - -

22 (Plaintiffs' Exhibit No. I was marked.)

23 - - - - -

24 Q Just so we can identify this for the record.

25 Dr. Tamasker, Plaintiffs' Exhibit 1, would you

1 tell us what that is?

2 A That's my curriculum vitae.

3 Q Okay. What year did you come to the United  
4 States?

5 A 1969.

6 Q And what did you do when you got here? Where  
7 did you work?

8 A I worked as a resident in St. Joseph's Hospital  
9 in Syracuse.

10 Q Was that a residency in obstetrics and  
11 gynecology?

12 A No, residency in anesthesia.

13 Q What happened with respect to that residency?

14 A Oh, this time my husband and I both were there  
15 and my husband got a residency in anesthesia in  
16 Cleveland, and I wanted to do obstetrics and  
17 gynecology anyway. Then I had a residency in  
18 OB/GYN in Huron Hospital, which used to be  
19 called Huron Road Hospital.

20 Q Did you ever complete your anesthesia residency?

21 A No.

22 Q You just left --

23 A No. I had never intended to complete  
24 anesthesia.

25 Q So then you obtained a residency at Huron Road?

1 A Yes.

2 Q That was a three-year residency?

3 A Right.

4 Q Who was the director *of* that program?

5 A Who is or --

6 Q Who was?

7 A It used to be Dr. Burkhart. He was gone a long  
8 time.

9 Q Burkhart or --

10 A H-A-R-T, Samuel Burkhart.

11 Q Did you complete your residency in OB/GYN at  
12 Huron Road Hospital?

13 A Yes.

14 Q Then what did you do?

15 A Then I did one year house officer at Huron  
16 Hospital. In the meantime, I was working in  
17 free clinic and Planned Parenthood and looking  
18 to start my practice.

19 Q Where were you house officer?

20 A Huron.

21 Q Okay. And you maintained your hospital  
22 privileges at Huron Road since 1974, correct?

23 A Right.

24 Q Any other hospitals that you've had privileges  
25 at other than Meridia Euclid Hospital and

1 Meridia Huron Hospital?

2 A Now I have privileges just at Meridia Hillcrest,  
3 I used to be on staff at Booth Memorial  
4 Hospital, which closed.

5 Q You got a license in Pennsylvania --

6 A Yes.

7 Q -- in 1973. Why did you get a license in  
8 Pennsylvania?

9 A Those days you could take the license in  
10 Pennsylvania after two years of residency, while  
11 Ohio needed three years.

12 Q Okay. Has your license or any medical license  
13 ever been suspended for any reason?

14 A No.

15 Q Any license ever terminated?

16 A No.

17 Q How about any of your hospital privileges?

18 A No.

19 Q You were certified in 1987?

20 A Right.

21 Q Why did it take you from '74 to '87 to get  
22 certified?

23 A It was just no particular reason.

24 Q Did you take the exam --

25 A Yes.

1 Q How many times?

2 A I took the written only once.

3 Q Pardon me?

4 A There are two parts of the examination. The  
5 written examination I took once and the oral I  
6 passed the third attempt.

7 Q The first written you did pass?

8 A Yes.

9 Q Then you were recertified in '98?

10 A Right.

11 Q What do you have to do to recertify?

12 A You take the written test.

13 Q You're a fellow of ACOG?

14 A Yes.

15 Q Do you have any office, positions in that  
16 organization?

17 A No.

18 Q How about the Cleveland OB/GYN Society, do you  
19 have any offices?

20 A No.

21 Q Have you published any literature in the area of  
22 obstetrics and gynecology?

23 A No.

24 Q Done any research in that area?

25 A No.

1 Q What is your practice? Can you describe your  
2 practice?

3 A My practice is, again, obstetrics/gynecology.

4 Q And has it been that, again, practice since  
5 19-74?

6 A Yes, always.

7 Q Is there a breakdown between obstetrics and  
8 gynecology percentage wise?

9 A 50/50. Half and half.

10 Q With respect to obstetrics, back in 19 -- well,  
11 let me back up a little bit. Do you keep any  
12 type of statistics relating to your own practice  
13 and complication rates and things like that in  
14 your practice?

15 A No.

16 Q Does the hospital for you?

17 A No. They only keep the C-section rates, the  
18 Caesarean section rates.

19 Q What about episiotomy rates, does anybody keep  
20 that kind of information as far as your  
21 patients?

22 A No.

23 Q Do you have any idea what percentage of your  
24 patients who have vaginal deliveries also have  
25 episiotomies?

- 1 A 50 percent.
- 2 Q 50 percent?
- 3 A (Witness nods head.)
- 4 Q Has it remained 50 percent throughout the
- 5 practice, or has it gone up or down?
- 6 A About the same.
- 7 Q When you say 50 percent, is that something that
- 8 you just kind of carry around in your head?
- 9 It's an estimate, or is that something that we
- 10 could go find some figures for?
- 11 A There won't be any way for you to tell that, and
- 12 this is just something I think that's what
- 13 happens, I do as little as possible.
- 14 Q I'm sorry?
- 15 A I do as little episiotomies as possible. I
- 16 mean, number wise.
- 17 Q Okay. Why is that?
- 18 A Why do anything if you don't need to?
- 19 Q Okay. With respect to the method of episiotomy
- 20 on the 50 percent of vaginal births where an
- 21 episiotomy's used, can you tell me the
- 22 percentage that are midline versus those that
- 23 are mediolateral?
- 24 A 100 percent midline.
- 25 Q You always do midline?

1 A Always.

2 Q Why is that?

3 A Because it's more anatomical.

4 Q More anatomical?

5 A Right.

6 Q What do you mean **by** that?

7 A Because that area is already thinned out when  
8 patient is pushing, and healing is much better  
9 when you do a midline episiotomy.

10 Q Now, let's talk about perineal lacerations for a  
11 minute, okay?

12 A Okay.

13 Q Do you have any numbers as far as how many of  
14 your vaginal delivery patients experience third-  
15 or fourth-degree lacerations?

16 A **No.**

17 Q Is there anywhere we could find that  
18 information?

19 A I don't think so.

20 Q Do you have an estimate, a best estimate, as far  
21 as that's concerned?

22 A I can't even think, or give an estimate.

23 Q I mean, I assume that first-degree tears would  
24 be more common than second-degree tears and  
25 second more common than third and so forth?

1 A Say it again.

2 Q Are first-degree tears or lacerations more  
3 common than second-degree lacerations?

4 A Okay. Episiotomy's pretty much secondary  
5 laceration.

6 Q Just doing an episiotomy itself?

7 A That's the second-degree laceration because  
8 you've got exactly the same if she tears on her  
9 own. But if the first-degree laceration will be  
10 only just the skin, and I would imagine it will  
11 be more common than going to second degree.

12 Q So first degree would only be in patients that  
13 you don't have an episiotomy?

14 A Yeah. Laceration will be mostly --

15 Q And all the patients that you do episiotomy have  
16 at least a second degree, correct?

17 A That's the anatomical. Exactly, that's the area  
18 you cut.

19 Q And the third-degree lacerations are either from  
20 the episiotomy or from the birth trauma?

21 A Yes. When the episiotomy extends in the lower  
22 part, then that's the third degree.

23 Q Extends by virtue of the birth or extends  
24 because of where the doctor's scalpel ends?

25 A Oh, no. That won't happen. I don't know, I

1 have never saw anybody have that.

2 MR. AUCIELLO: The question  
3 was, was it one or the other, and you said no.

4 THE WITNESS: No, but he  
5 said --

6 MR. AUCIELLO: I know what you  
7 meant.

8 Q You're right. We'll clear that up.

9 A Right.

10 Q The third-degree tear would be one in which the  
11 episiotomy extends because of the birth process,  
12 correct?

13 A I would say yes to that, yeah.

14 Q And you, I think, were trying to tell me before,  
15 that third-degree tear is not because the  
16 surgeon's scalpel goes that deeply, correct, or  
17 that far, correct?

18 A I don't want to correct you, but we don't use  
19 scalpel to do an episiotomy.

20 Q Okay.

21 A Usually just the bandage scissors and it has a  
22 blunt end on one side.

23 Q Well, I appreciate that.

24 A So it cuts where you cut.

25 Q I appreciate that. All right. If there is a

1           third- or fourth-degree laceration following a  
2           vaginal birth, the obstetrician and gynecologist  
3           has, I guess, some options as to how to repair  
4           that; is that correct?

5       A       Yes, pretty common way to do it.

6       Q       Do you have a preferred method for your repairs?

7       A       Yes.

8       Q       And what is that method?

9       A       Now, you're talking about third degree first,  
10           right?

11      Q       Right.

12      A       In third-degree laceration only the anal  
13           sphincter is lacerated, and as soon as that  
14           happens, just by the nature's way, the levator  
15           ani muscles that form the sphincter, they  
16           retract. **So** first thing you do, we have a clamp  
17           called Allister's clamp, get both ends of the  
18           muscle together. You have to -- sometimes you  
19           have **to** search for it. And then you --

20      Q       Up in the buttocks area?

21      A       Not that far. If the anus is this, this is, it  
22           will go a little bit lateral. And you hold that  
23           and then you -- I put two, it's called figure **of**  
24           eight stitches.

25      Q       Figure of eight stitches?

1 A Right. And it depends how many it needs.  
2 Sometimes just one is enough. Sometimes you  
3 need three.

4 Q What kind of sutures are **you** using?

5 A I use 00 -- it is called 0020 chromic catgut.

6 Q Catgut?

7 A Yes.

8 Q Has your procedure, as far as repair of  
9 third-degree lacerations, changed at all since  
10 1994?

11 A No, not really.

12 Q You use the same procedure?

13 A Same procedure, same suture.

14 Q Same sutures?

15 A Yes.

16 Q Now, sometimes I'm told these repairs fail; **is**  
17 that right?

18 A Sometimes they fail, yes.

19 Q Do **you** know in what percentage of the cases in  
20 which you've done a repair of a third-degree  
21 laceration that repair has failed?

22 A I can't give you percentages on it. Since 1974  
23 I had about maybe two or three people who had  
24 any problems where they had to need another  
25 surgery, so whatever that percentage is.

1 Q Two or three since 1974?

2 A Right.

3 Q I assume -- well, I shouldn't assume anything,  
4 should I? You have, I don't know, how many  
5 third-degree tears a year?

6 A I can't tell you that.

7 Q Like ten or five or twenty or --

8 A I don't know. It's pretty common.

9 Q Third-degree tears are pretty common?

10 A Pretty common.

11 Q I mean, you must deliver how many babies a year?

12 A I deliver between 90 to 100 a year.

13 Q And 50 percent **of** those are episiotomies, right?

14 A Right.

15 Q With respect to those two or three -- I'm  
16 assuming you're excluding Patty Tippie from  
17 that?

18 A No, including.

19 Q **So** the two or three includes her?

20 A Yeah, definitely.

21 Q Now, in the others that were not Patty Tippie,  
22 the one or two that needed a further surgery,  
23 did you perform the surgery or did somebody  
24 else?

25 A **No**, I performed surgery, at a later date.

1 Q Was that repair successful?

2 A Yes.

3 Q In terms of a woman who has a third-degree  
4 laceration and a repair at the time of delivery  
5 or shortly after delivery, does the fact that  
6 she's had that third-degree laceration and  
7 repair change anything with respect to how that  
8 woman is treated post delivery?

9 A Not usually for third degree, but we make sure  
10 that the patient does not get constipated, **so**  
11 she's given stool softeners. And we advise her  
12 to drink lots of water; same reason, not to get  
13 constipated or hard stool.

14 Q Anything else?

15 A She is advised to drink a lot of juices, water.  
16 The reason is the same, so that she does not get  
17 hard stools.

18 Q What about with respect to enemas?

19 A Enemas, they -- I don't know how many years now  
20 we're not giving enemas, very rarely. But if  
21 there is a third-degree tear, it was definitely  
22 avoided giving her an enema or a suppository.

23 Q Why is that?

24 A Just not to cause any trauma.

25 Q Anything else that would be different in the

1 postpartum care of the woman who has a  
2 third-degree laceration and repair, as opposed  
3 to one who has either no tear or first- or  
4 second-degree?

5 A That's probably just try to make her **so** she does  
6 not get constipated.

7 Q What about if it's a fourth-degree tear?

8 A Fourth-degree tear also is the same thing, but  
9 then here you're actually in the rectum area,  
10 and so nothing per rectum, and drink as much  
11 fluids so -- just avoid constipation. That's  
12 the main thing with this.

13 Q Okay. Are there any articles or texts  
14 discussing these lacerations and repairs that  
15 you're familiar with?

16 A No.

17 Q I mean, you've seen some articles, I assume?

18 A Right.

19 Q But you can't think of any off the top of your  
20 head?

21 A I can't think of any, no.

22 Q How about any textbooks?

23 A **All** the textbooks would explain about the  
24 lacerations.

25 Q What OB/GYN text **do** you refer to?

1 A References depends on what are you going to look  
2 for. Mostly Williams text is a pretty common  
3 book.

4 Q If you were going to refer to a textbook about  
5 third-degree lacerations and repairs, what would  
6 you refer to?

7 A Any OB/GYN textbook, because this is such a  
8 common thing they'll explain, one, two, three,  
9 four laceration.

10 Q And what journals do you receive relating to  
11 OB/GYN?

12 A I am a member of ACOG, so I receive their  
13 journal. Then also Contemporary OB/GYN, Female  
14 Patient.

15 Q What would be the indications that a repair of a  
16 third-degree laceration is failing?

17 A What will be the indication in general? Many  
18 times people who have a -- they can hold this  
19 hard stool, but if they start diarrhea or  
20 something, then they cannot control it.

21 Q **So** some incontinence?

22 A For liquid stool.

23 Q And gas, I assume?

24 A There's no reason for gas to --

25 Q Any other indications?

1 A But this wouldn't be an indication just because  
2 of the sphincter, because most often when the  
3 sphincter does not heal, the muscle, levator ani  
4 muscles --

5 Q The what muscle?

6 A Levator ani muscles which close, they take the  
7 function, and women pretty much can control  
8 their stools. But if there's a rectal tear or  
9 there's a fistula, that's a totally different  
10 condition, where the vagina will join the  
11 rectum.

12 Q With respect to follow-up on somebody with a  
13 third-degree tear, what is the -- strike that.

14 Let me ask this: If a repair of a  
15 third-degree laceration does begin to fail,  
16 there are indications of that, what does the  
17 standard of care require as far as anything, any  
18 involvement with that patient?

19 A When these people go home, not only with the  
20 rectal tear, or sphincter tear, anybody, when  
21 they go home postpartum, we gave them exercises  
22 which are called Kegel's exercises.

23 Q Can you spell that?

24 A K-E-G-E-L, and that is apostrophe S. They're  
25 the tightening of the muscles of the vaginal

1 area, perineal area, and that's automatic. And  
2 many times that does the trick and they don't  
3 need anything.

4 Q Okay. If there are indications that the repair'  
5 is failing, there's incontinence or whatever,  
6 what does the OB/GYN have **to** do?

7 A Now, it depends on what stage. Is that when the  
8 patient has not gone home?

9 Q Why does it depend? What depends?

10 A Because any time we repair this tissue which is  
11 traumatized and which **is** not healthy at that  
12 particular time, we just have to tell the  
13 patient that it will take time and use the  
14 Kegel's exercises, and we teach them how to do  
15 those. If she comes at postpartum -- you're  
16 asking me when, what time?

17 Q I'm saying when does it make a difference? You  
18 said it depends, and I was asking, what is the  
19 difference?

20 A Difference, again, if the patient comes for  
21 postpartum checkup, what are her symptoms? And  
22 even at six weeks, no surgery is recommended or  
23 indicated. You --

24 Q If -- I'm sorry. **Go** ahead.

25 A Even if there is incontinence.

1 Q No surgery would be recommended at that time?

2 A At six weeks post-op checkup. We usually give  
3 them about four to six months for the tissue to  
4 heal.

5 Q So the earliest you would do any kind of a, I  
6 guess re-repair on this type of third-degree  
7 laceration, would be how many months out?

8 A About four to six months after delivery.

9 Q And until that time, you would be telling the  
10 patient, continue with your Kegel's exercises?

11 A Yes.

12 Q Why do you wait those four to six months?

13 A As I told you in the beginning, many times the  
14 levator ani takes over the function and the  
15 patient does not need a repair. Second thing  
16 is, tissue is traumatized and it takes that long  
17 for it to, even for the repaired tissue to hold.

18 Q So, basically, you'd be hoping that the  
19 exercises would resolve this problem by  
20 themselves during that four to six months?

21 A Depends also what actually you see and the  
22 examination time. If it's just the sphincter,  
23 yes, it will heal.

24 Q Okay. Now, and please feel free to refer to  
25 your notes, when did you first have any

1 involvement with Patty Tippie?

2 A First time when I saw her?

3 Q Yes.

4 A 1989, April 10, 1989.

5 Q And how did she come to be your patient?

6 A She was referred to me by her sisters.

7 Q Where did she see you at, what office?

8 A I have only one office, on Euclid. That's where  
9 I saw her. Same address.

10 Q What was the purpose of her, of that initial  
11 visit?

12 A Annual checkup, and wanted to go on  
13 birth-control pills.

14 Q I'm trying to match up my notes to yours.

15 Patty saw you after that initial visit,  
16 what would you say, on a regular basis up  
17 through '93 or what?

18 A Yes, up until, the last was July '94.

19 Q Okay. And she became pregnant sometime in '93;  
20 is that right?

21 A Her first pregnancy was October 6, '93.

22 Q And she followed with you for her pregnancy  
23 visits, correct?

24 A Yes.

25 Q How did the pregnancy progress?

1       A       According to these notes, pretty normal, except  
2               once she fell down on ice and had some pain, but  
3               nothing else.

4       Q       Did that fall on ice prove to be anything **of** any  
5               significance?

6       A       No, nothing.

7       Q       Was she compliant with your program for her as  
8               far as her pregnancy?

9       A       Yes.

10      Q       She followed your directions and advice and so  
11              forth?

12      A       Yes.

13      Q       She made her appointments?

14      A       Yes.

15                               - - - - -

16                   (Plaintiffs' Exhibit No. 2 was marked.)

17                               - - - - -

18      Q       Doctor, would you take a look at Exhibit 2,  
19              please. I think it is the obstetric admitting  
20              record.

21      A       I don't know that I have it. That's the  
22              hospital -- can I just take a look at yours?

23      Q       Yes. That's what I'd like you to do.

24      A       Oh, okay. Sure.

25      Q       Does that appear to you to be a copy of the

1 obstetric admitting record?

2 A It seems to be, yes.

3 Q For Ms. Tippie?

4 A Yes.

5 Q Is that Exhibit 2 signed by you?

6 A Yes.

7 Q Down as the attending physician?

8 A Right.

9 Q Are you able to read what is in the admission  
10 physical examination?

11 A Okay. Complains of SROM -- that will be  
12 spontaneous rupture of membranes -- at 1530,  
13 clear bloody show. I don't know what that is.  
14 Maybe no contractions. I can't read that.

15 Past histories, past medical history, past  
16 surgical history, negative, negative. This is  
17 two, that will be dilated two, baby at minus two  
18 station, 70 percent effaced, per RN. That's,  
19 diagnosis is spontaneous rupture of membranes,  
20 but this other thing I cannot read.

21 Q Whose handwriting is that?

22 A It's probably the house officer.

23 Q We're looking at the box that's marked,  
24 "Admission Physical Examination"?

25 A Right. The house officer who was on. I don't

1 know who he was.

2 - - - - -

3 (Plaintiffs' Exhibit No. 3 was marked.)

4 - - - - -

5 Q Take a **look** at Exhibit 3. Does that look like  
6 the labor and delivery summary for Ms. Tippie?

7 A Yes.

8 Q Is any **of** this your handwriting on this Exhibit  
9 3?

10 A Just the last, remarks, and if the nurses did  
11 not fill the crosses, then I might have done it.

12 Q The remarks are what? Can you read those?

13 A Under epidural anesthesia, term female delivered  
14 vertex by Mity vacuum.

15 Q And that's your signature?

16 A That's my signature.

17 Q There's timing listed in the chronology box  
18 there for onset of labor, complete cervical  
19 dilation, delivery of infant, etc. Delivery of  
20 placenta. When did you perform the episiotomy?

21 A The baby was born, delivery of infant is 12:23.  
22 So somewhere around five, ten minutes before  
23 that, five minutes. I can't recall.

24 Q Do **you** have any specific recollection of Patty  
25 Tippie at all?

1 A Yes. I remember Patty Tippie somewhat, yeah.  
2 But if you asked me, of this particular  
3 incident, no, I can't remember that.

4 Q And consistent with your practice, it would have  
5 been a median episiotomy, right?

6 A It would say here, yes. Median episiotomy.

7 Q Right. And then you have indicated third-degree  
8 laceration?

9 A Yes.

10 Q And that degree of laceration is based upon your  
11 observation?

12 A Yes.

13 Q Why was the episiotomy performed?

14 A First thing was, by looking at the chart, if the  
15 patient needed Mity vacuum or vacuum delivery  
16 for the head, that itself means two things,  
17 either she was too exhausted to push, or the  
18 second thing would mean if there was baby's  
19 heartbeat was dropping, which is not shown  
20 anywhere.

21 And then the third thing would be that  
22 she's already tearing in that area, so instead  
23 of having an irregular tear, you will-cut a  
24 straight episiotomy, clean cut.

25 Q Do you know what the sequence was as far as Mrs.

1 Mippie?

2 A No. I wouldn't remember.

3 Q What about the repair you performed, when did  
4 that take place?

5 A Right after the delivery

6 Q After the delivery of the infant?

7 A Depends how fast the placenta is coming.

8 Sometimes I start the repair before <sup>or</sup> even the  
9 placenta is delivered, because if it's not  
10 ready, sometimes I wait until the placenta  
11 delivers and then --

12 Q Do you know in this case whether you repaired  
13 before the placenta or after?

14 A No.

15 Q When did you know that Patty had a third-degree  
16 tear?

17 A Oh, that I would know right away, at the time of  
18 delivery.

19 Q You can see that?

20 A Yes

21 Q And this third-degree tear would have been an  
22 extension of your midline episiotomy?

23 A Most often that happens.

24 Q What else could it be?

25 A If there is any tear anywhere else, but most

1 common was third degree was for the episiotomy  
2 to extend.

3 Q And that's what you believe happened in her  
4 case?

5 A Probably.

6 Q And you were describing, for the episiotomy you  
7 used scissors?

8 A Yes.

9 Q And you did the same repair that you described  
10 earlier on Patty Tippie?

11 A That's the way I do it, so most probably I did  
12 it this way.

13 Q You don't have any specific recollection,  
14 correct?

15 A No.

16 Q Is that correct? You just don't remember?

17 A I don't remember exactly what I did, but that's  
18 the way I repair.

19 Q Do you have protocols at the hospital, at  
20 Meridia Euclid, that you use for your  
21 deliveries, you know, sets of orders that you  
22 use for deliveries?

23 A Now we have order sheets, but I don't remember  
24 whether we had, or we had to write it.

25 MR. LANSLOWNE: Mark that.

- - - - -

(Plaintiffs' Exhibit No. 4 was marked.)

- - - - -

Q Take a look at Exhibit 4.

A (Witness complies.)

Q Could you identify that, please?

A That's a standing doctor's orders.

Q And this would have been for --

A Patricia Tippie, yes.

Q Is this the protocol we were referring to?

A Yes.

Q So it was in effect back at this time then,  
correct?

A Must be. I can't remember.

Q And, again, this is your signature on there?

A Yes.

Q Any other of your handwriting on there?

A The last one where it says, "For discharge  
today, p.m."

Q All right. What about the check marks and that  
kind of thing?

A That will be either I did it or one of the  
nurses did it. I don't know.

Q **Now**, what do the check marks mean?

A It means that's the -- those are the standing

1 orders.

2 Q For what the patient **is** to receive?

3 A Right.

4 Q **Is** there a different protocol of standing orders  
5 for a patient who has had a episiotomy?

6 A **No.**

7 Q Is there a different set of standing orders for  
8 a patient who's had a third-degree or  
9 fourth-degree laceration?

10 A No.

11 Q When would you have signed these orders, right  
12 after delivery?

13 A I don't have the time when I signed, but  
14 probably it will be after delivery sometime.

15 Q Let's go through these. The first order is  
16 what?

17 A "Up ad lib," she can move whenever she wants to.

18 Q And that's checked?

19 A Uh-huh.

20 Q Meaning that that's what you ordered?

21 A Uh-huh.

22 Q You have to say yes or no, Doctor.

23 A Yes.

24 Q And then she may shower?

25 A Yes.

- 1 Q She's to have a regular diet, right?
- 2 A Yes.
- 3 Q Does that squiggly line mean anything?
- 4 A Regular diet.
- 5 Q It's signed regular diet?
- 6 A Uh-huh.
- 7 Q Or circled?
- 8 A Just circled.
- 9 Q I'm sorry. **So** she's going to have a regular  
10 diet?
- 11 A Uh-huh.
- 12 Q You have to say yes, doctor. I'm sorry.
- 13 A Yes.
- 14 Can I just read it? Regular diet; vital  
15 signs per protocol; catheterize bladder, if  
16 necessary; hemoglobin and hematocrit, urinalysis  
17 first postpartum day; Peri-Colace --
- 18 Q Wait a minute. These three that are crossed out  
19 means those are not going to be given?
- 20 A Not necessary.
- 21 Q **So** you would have made that decision and said,  
22 don't give those?
- 23 A Right. That is if patient is RH negative.
- 24 Q Right.
- 25 A Even if I would not have signed it or crossed it

1 up, it would automatic, because she was not RH  
2 negative. And --

3 Q Peri-Colace, what's that for?

4 A That's for stool softener. Then Dalmane was  
5 sleeping pill, if necessary. She had sitz baths  
6 and tucks for her episiotomy and laceration.  
7 Here it says, she could have had fleets enema.  
8 She could have ice pack to her perineum, peri  
9 wash, Nupercaine for the hemorrhoids, and that's  
10 it.

11 Q Peri-Colace is a stool softener?

12 A Yes.

13 Q So that's given to, in every -- that's one of  
14 the normal --

15 A That's one of the normal orders, yes.

16 Q **So** that's not special for third-degree or  
17 fourth-degree tears, correct?

18 A There's a difference between third-degree and  
19 fourth-degree tear, **so** -- fourth-degree tear  
20 is -- there might be some extra orders.

21 Q Okay

22 A But third-degree tear usually is pretty regular,  
23 pretty common, so we don't have to specially  
24 change anything.

25 Q But do people with just a second degree get

1 Peri-Colace too?

2 A If they need it. The order is as necessary.

3 Q Do you know if she did get it?

4 A No. Her nurse's notes will tell whether she got  
5 it or not, but I don't know.

6 Q How would they tell if she needed it?

7 A They make rounds each night. They check them.  
8 They teach all the nurses with the patient, they  
9 teach what should be done, what happened in the  
10 delivery.

11 Q But how do they decide whether this patient  
12 needed the stool softener?

13 A Oh, they would have to assess it.

14 Q What would they look for?

15 A They would look for if that patient is having  
16 any trouble passing gas or if she feels  
17 constipated, she has any problems with hard  
18 stools, that type of thing.

19 Q What about this fleets enema?

20 A Right. She would not get it. That would be  
21 pretty automatic because if she has a tear, the  
22 nurses would first ask whether you want to give  
23 an enema or not.

24 Q But it's checked?

25 A Yeah, it's checked. But there is -- somebody is

1 always there to **look** at the orders too.

2 Q Well, was it checked when you signed it?

3 A My signature is there, so I don't know, but I  
4 guess so.

5 Q Well, couldn't you have crossed that out?

6 A Yes, I could have. Did she get it? I don't  
7 know.

8 - - - - -

9 (Plaintiffs' Exhibit No. 5 was marked.)

10 - - - - -

11 Q If you would **look** at number five. Is that the  
12 obstetric discharge summary?

13 A Yes.

14 Q Again, is that your signature on there?

15 A Yes.

16 Q Did you fill this out?

17 A Probably.

18 Q Does that appear to be your handwriting on the  
19 rest of the page?

20 A Yes.

21 Q When did you fill this out?

22 A This will be most probably when I get the chart  
23 postpartum sometimes, incomplete chart.

24 Q As far as the discharge information, her  
25 activity was going to be unrestricted, correct?

A Yes.

Q Her diet was going to be routine, correct?

A Yes.

Q No special diet?

A No special diet.

Q Her medications, none?

A Right.

Q Instructions were routine, nothing special, correct?

A Right.

Q Now, I see up in the complications, operative and postpartum, you have X'd in there, none?

A Yes.

Q And then there's a box there for degree of perineal laceration and whether it's a vaginal or cervical laceration and you don't have anything marked there?

A True.

Q Why not?

A I have no idea. Probably this was done after a few days or in the medical records, so I don't have any idea why.

Q Well, if you had put in third-degree perineal laceration, vaginal, would that have changed any of your discharge information?

1 A No.

2 Q Going back to before the labor and delivery, did  
3 you have any discussions with Patty Tippie about  
4 the possibility of an episiotomy?

5 A Usually, when they reached their ninth month, I  
6 discuss all of these things, epidural  
7 anesthesia, whether they want anesthesia,  
8 medications, episiotomies, chances of  
9 C-sections.

10 Q What do you tell the patient about the  
11 episiotomy?

12 A That if they need it, I'll do it. If they  
13 don't, I won't.

14 Q Do you talk about the risks, complications, with  
15 them?

16 A About the episiotomy?

17 Q Yes.

18 A No.

19 Q What are the risks and complications of  
20 episiotomy?

21 A Complications, the risk will be bleeding,  
22 non-healing. There would be sometimes  
23 infection, and extension, of course.

24 Q Extension of the tear?

25 A Which is one of the known complications, yes.

1 Q Again, you never discussed any of those  
2 complications with Patty Tippie prior **to** her  
3 labor and delivery, correct?

4 A I don't remember.

5 Q Okay. Well, your practice would be **not** to?

6 A **No.**

7 Q Correct?

8 A Yes.

9 Q And then during the hospitalization, prior **to**  
10 doing the episiotomy, did you have any  
11 discussions with Patty about the complications,  
12 risks of the episiotomy?

13 A No.

14 Q Okay. Then did you tell her that -- when you  
15 discovered that she had a third-degree tear, did  
16 you tell her that?

17 A Yes.

18 Q **So** you said to her, you have a third-degree  
19 laceration?

20 A No. I would say that, "Your episiotomy has gone  
21 down and we need to repair it." And if she was  
22 feeling pain, then I would give her some more  
23 local anesthesia.

24 Q After you performed the repair, when is the next  
25 time that you had any contact with Mrs. Tippie

1 in the hospital?

2 A The next day.

3 Q So you see the patient the next day?

4 A Yes.

5 Q And did you discuss anything about the  
6 episiotomy or the repair with her on that next  
7 day?

8 A Yes.

9 Q What did you discuss?

10 A I don't know.

11 Q Well, why do you think you discussed something?

12 A Because I always discuss whatever happened at  
13 the time of the delivery, why she had to have  
14 the Mity vacuum delivery, and she had had a  
15 third-degree laceration. I'll explain  
16 everything to her.

17 Q Did you tell her what the -- what did you tell  
18 her with respect to what would likely happen  
19 regarding that laceration?

20 A I don't know.

21 Q Did you tell her, you know, there's a certain  
22 amount of percentage of these that fail and have  
23 to be re-repaired or anything like that?

24 A No, I wouldn't discuss that at that time.

25 Q Did you tell her any specific things to look for

1           regarding the potential for failure?

2       A       I don't know what I told her, but the way I  
3           would set up, not to get constipated and glass  
4           of water and **do** Kegel's. That is pretty  
5           automatic with me.

6       Q       What about stool softeners?

7       A       Yes, that's pretty automatic too.

8       Q       Well, are you saying she was given a  
9           prescription for stool softeners?

10      A       No. You can get this over the counter,  
11           Peri-Colace, Colace, Doxidan, anything.

12      Q       And you're saying that she was told to get  
13           those?

14      A       I don't know. I don't remember whether I  
15           specifically told her. Usually, I'll tell them,  
16           all my patients, that they get -- this has  
17           nothing to do with third degree, just right  
18           after delivery we want them not to get  
19           constipated.

20      Q       Would she get a sheet, like home-going  
21           instructions?

22      A       Probably she would.

23      Q       And is a copy of that sheet in your chart?

24      A       No, I won't have it. It will be from the  
25           hospital record.

1 Q Do you know what's on it?

2 A No. She even got a hospital nurse visit the  
3 next day.

4 Q She got a visit from the nurse the next day?

5 A Right. The next day. I have something.

6 Q Did you have any discussions with Mr. Tippie?

7 A I don't remember.

8 Q When you discharged Patty, what did you think  
9 was the likelihood or risk of failure **of** the  
10 repair that you had done?

11 A I would say very minimal because I don't think  
12 there was any difficult repair or anything. I  
13 think unremarkable repair. I don't remember  
14 anything but according to the chart. So I would  
15 say minimal.

16 Q When is the next time that you had any kind **of**  
17 contact with Mrs. Tippie?

18 A According to the chart, when she came for a  
19 six-week checkup. I don't know whether she  
20 called or anything. That I don't remember. I  
21 don't know if she had called.

22 Q You don't know one way or the other whether she  
23 called?

24 A One way or the other, right.

25 Q Would you get a copy of the nurse's visit

1 report?

2 A Yeah. I have it here.

3 Q And that received stamp, is that your stamp?

4 A June 16th, yes.

5 - - - - -

6 (Plaintiffs' Exhibit **No.** 6 was marked.)

7 - - - - -

8 Q Can you read that note for me?

9 A That was her first postpartum examination. I  
10 think July 29, '94. Urine negative, weight **118**.  
11 She has not had a period yet. Blood pressure  
12 110 over 76. Her vulva appeared normal.  
13 Perineum normal. Vagina, normal. PAP was  
14 taken. Uterus --

15 Q What was that?

16 A PAP test.

17 Q What was next after that?

18 A Uterus was anteverted. It was normal size. It  
19 was firm, and she did not have any cyst on the  
20 ovaries. And she was put on birth-control  
21 pills, which she had taken in the past, to start  
22 after her periods.

23 Q All that said right there?

24 A Yeah. AV, anteverted, normal size, firm.

25 Q What's this part over here?

1       A       That's the Demulen, your birth-control pills.  
2               This is all chart, this says initial exam. In  
3               the old days they used to have one paper. This  
4               is not initial. That's why. The whole thing **is**  
5               used.

6       Q       **So** the repair at that point would have **looked**  
7               what?

8       A       It would have looked normal because perineum is  
9               pretty healthy.

10      Q       It doesn't appear that you have any complaints  
11              noted here at this time.

12      A       Right.

13      Q       **Do** you recall Ms. Tippie complaining **of** anything  
14              on this first visit?

15      A       I don't recall it, no. It probably would have  
16              been there, but, again, I don't remember.

17      Q       Did you have a receptionist or a nurse **by** the  
18              name of Lori or Laura back at this time?

19      A       Yeah, probably. That was her handwriting.

20      Q       Is she still with you?

21      A       No.

22      Q       When did she leave?

23      A       Beginning of this year. No, January '98. She  
24              had a baby, so she was pregnant, so --

25      Q       Is that her second baby?

1 A That's the second baby.

2 Q Was the first one around 1994?

3 A I don't remember, probably.

4 Q Have you read any of the answers or the  
5 interrogatories that Ms. Tippie has provided in  
6 this case?

7 A No.

8 Q Ms. Tippie says that at least by this first  
9 visit she was complaining about some  
10 incontinence and that she specifically told you  
11 of that at that time. That's what she says.

12 A Okay. If she says, you have to believe her, but  
13 I don't remember.

14 Q Okay. Well, if she had said that, if she had  
15 said in the six-week checkup that, you know, I'm  
16 having some incontinence, stool, gas, what would  
17 you have done?

18 A At that particular time?

19 Q Yes.

20 A I would have asked her the questions whether it  
21 is just liquid stools, it's only gas, or if she  
22 actually even -- if she has incontinence when  
23 she has hard stools or whether she has  
24 incontinence when she tried to push it through  
25 the rectum and it was coming out the vagina.

1 That would mean that she may have had a fistula.  
2 General questions.

3 Q And if she was having incontinence of liquid  
4 stool and gas, what would she have to do?

5 A The beginning I told you that I would tell her  
6 to continue with the Kegel's exercises, at least  
7 for a month and a half, and let me know what  
8 happens, and she would call if she had any  
9 symptoms, or the symptoms got worse, got better

10 And I would bring her to get checked again

11 Q Speaking of that, when was she supposed to see  
12 you again?

13 A If she had no problems, she would see in six  
14 months, for her birth-control pills checkup.

15 Q Did you have any contact with Ms Tippie after  
16 this 7-29-94 visit?

17 A Not according to the chart.

18 Q Did you have any phone contact with her?

19 A I don't remember.

20 Q Did you refer her to any other physician?

21 A For?

22 Q For her problems with her episiotomy repair.

23 A I don't remember her calling me with the  
24 problems, so, no.

25 Q I think I know the answer to this, but have you

1           referred other patients to a colorectal surgeon  
2           for follow-up with respect to their episiotomy  
3           repair?

4       A       **No**, not colorectal surgeon.

5       Q       Have you referred them to other gynecologists?

6       A       Yes.

7       Q       Why would you refer them?

8       A       Depends, but each person is different. What's  
9           going on, how their body is, what sort of tears  
10          they have, do they have fistula. Because I  
11          wouldn't repair mostly the fistulas. Things  
12          like that. Each person is different.

13      Q       When we were talking before about repairs that  
14          you had that failed, I think you could only  
15          remember one other one, one or two other ones  
16          besides Patty, right?

17      A       Uh-huh.

18      Q       You have to say yes.

19      A       Sorry, yes.

20      Q       And that other one, you repaired it -- you  
21          re-repaired it yourself, right?

22      A       Right.

23      Q       And then that was taken care of?

24      A       Yes.

25      Q       **So** what are these other ones that you're talking

1 about that you referred people to other  
2 physicians? Are those other cases in which  
3 you've had a repair that failed?

4 A No. Not the repair that failed. It was one  
5 person who was not happy cosmetically. That her  
6 sphincter control was good. She had **no** problem  
7 that way, but it didn't look good. **So** I  
8 referred her to Dr. Lester Ballard who is an  
9 expert in this, at the Cleveland Clinic. He  
10 does most of the GYN, that kind of work, of  
11 rectal-vaginal repairs.

12 Q And that's the one you were thinking of when you  
13 were talking about referring to other  
14 physicians?

15 A That's the one, yes.

16 Q When did you first notify your insurance company  
17 about Patty Tippie?

18 A When?

19 MR. AUCIELLO: Objection to the  
20 line of questioning. **You** can answer if you  
21 know.

22 A I don't remember when, probably I got a letter  
23 for the chart or something like that. That PIE  
24 wanted us to phone them.

25 MR. LANSDOWNE: Okay. That's

1           all I have for you. Your counsel can explain  
2           signature to you.

3                       MR. AUCIELLO:           We'll read it.  
4           If you wouldn't mind extending the seven days to  
5           14 days or something like that, something  
6           reasonable.

7                       MR. LANSDOWNE:        No problem.

THE STATE OF OHIO,        )  
COUNTY OF CUYAHOGA.    )

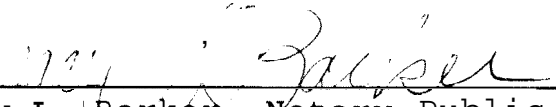

SS:                               CERTIFICATE

I, Tracy L. Barker, a Notary Public within and for the State of Ohio, duly commissioned and qualified, do hereby certify that the within-named witness, Shobha R. Tamasker, M.D., **was first duly sworn to** testify the truth, the whole truth and nothing but the truth in the cause aforesaid; that the testimony then given by her was by me reduced to stenotypy in the presence of said witness, afterwards transcribed on a computer/printer, and that the foregoing is a true and correct transcript of the testimony so given by her, as aforesaid.

I do further certify that this deposition was taken at the time and place in the foregoing caption specified.

I **do** further certify that I am not a relative, counsel or attorney of either party, or otherwise interested in the event of this action.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my seal of office at Cleveland, Ohio, on this 5th day of May 1999.

  
\_\_\_\_\_  
Tracy L. Barker, Notary Public  
within, and for the State of Ohio  
My Commission expires May 23, 1995.

THE STATE OF \_\_\_\_\_ )  
 )  
 COUNTY OF \_\_\_\_\_ )      SS :

Before me, a Notary Public in and for said state and county, personally appeared the above-named Shobha R. Tamasker, M.D., who acknowledged that she did sign the foregoing transcript and that the same is a true and correct transcript of the testimony so given.

IN TESTIMONY WHEREOF, I have hereunto affixed my name and official seal at \_\_\_\_\_,  
 this \_\_\_\_\_ day of \_\_\_\_\_, 1999.

\_\_\_\_\_  
 SHOBHA R. TAMASKER, M.D.

\_\_\_\_\_  
 Notary Public

My Commission expires: \_\_\_\_\_

### Presentation

### Position

- ☒ Vertex  
☐ Face or brow  
☒ Breech  
☐ Transverse lie  
☐ Compound  
☐ Unknown

### Intrapartum Events

- ☐ No prenatal care  
☐ Preterm labor ( $\leq 37$  wks.)  
☐ Postterm ( $\geq 42$  wks.)  
☐ Febrile ( $\geq 100.4^\circ$ )  
☐ PROM ( $\geq 1$  hr before onset of labor)  
☐ Meconium  
☐ Foul smelling fluid  
☐ Hydramnios  
☐ Abruptio  
☐ Placenta previa  
☐ Bleeding-site undetermined  
☐ Toxemia (mild) (severe)  
☐ Seizure activity  
☐ Precipitous labor ( $< 3$  hrs)  
☐ Prolonged labor ( $\geq 20$  hrs)  
☐ Prolonged latent phase  
☐ Prolonged active phase  
☐ Prolonged 2nd stage ( $> 2.5$  hrs.)  
☐ Secondary arrest of dilatation  
☐ Cephalopelvic disproportion  
☐ Cord prolapse  
☐ Decreased FHT variability  
☐ Extended fetal bradycardia  
☐ Extended fetal tachycardia  
☐ Multiple late decelerations  
☐ Multiple variable decelerations  
☐ Acidosis ( $\text{pH} < 7.2$ )  
☐ Anesthetic complications
